## Hightech in Aluminium

Witte was founded in 1969 and initially manufactured complex, high-precision parts for the aerospace industry. Today Witte has developed into a leading manufacturer of fixturing systems and gauges for all kinds of applications. Almost all leading companies from automotive and aircraft industries now rely on Witte technology in order to maintain high quality in their production process.

## Certification

Witte Gerätebau KG is certified according to  
 • DIN EN ISO 9001 • DIN EN ISO 9100  
 • QSFA (Aerospace suppliers)

TÜVRheinland®  
**CERT**  
 ISO 9001

## Why should you choose Witte ?

To decide on Witte system solutions and products is a decision for the future and reduces investment for measuring equipment and fixture cost for every following project.

The system components from product lines ALUFIX Classic and ALUFIX ECO can be 100% reused for new tasks, multiple retooling for a lifetime. Reusability presupposes durability!

Witte uses high-grade material quality without compromise. High manufacturing accuracy of the components themselves and in assembly with each other as well as hard-wearing surface protection guarantee "Systematic Quality".

All Witte system elements follow a consistent idea, are downwards compatible and at the same time build a basis for future additional items. Witte modular systems are an optimal match to today's requirements as well as being wisely combinable with each other. No matter what demand and individual application you have, Witte offers you the correct technical and cost-effective solution.

- As everything is done under one roof, time consuming interfaces and inevitable cost arising from overlapping are dispensed with.
- International sales and service network through own subsidiaries and regional solution partners.
- Experienced project teams with sound knowledge in almost all standards of the automotive industry and their related partners.

**www - Witte worldwide**  
 We meet the challenges of our customers wherever they occur.  
 Our sales and service network guarantees support worldwide.  
 Witte companies and subsidiaries in Singapore, Mexico and USA as well as long term partners in all major industrial nations ensure the same high service level all over the World.

# Product spectrum Modular Fixturing Systems

Alufix Classic is the worldwide renowned and proven modular clamping and fixturing system for almost all applications in dimensional measuring technology.

Due to the high accuracy and quantity of intelligent elements Alufix sets are also in use as assembly and positioning systems. Right across all business areas ranging from automotive industry through aerospace to biomedical sciences people trust and use Witte Alufix Classic. If you have different materials, your parts vary in size, mass or stability, or you are measuring with tactile or optical equipment, Alufix Classic is the answer!

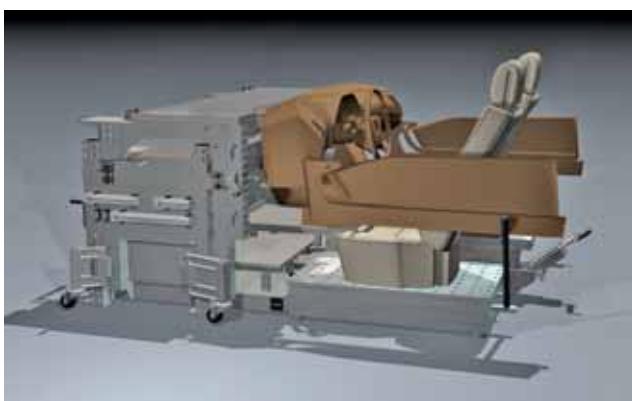

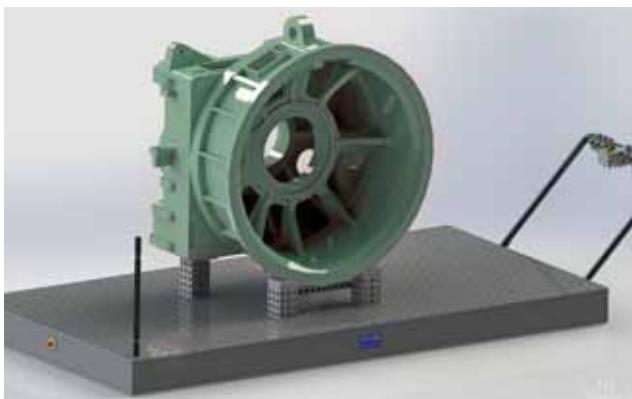

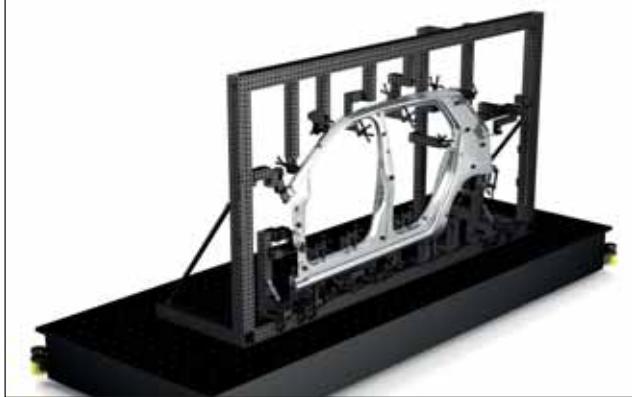

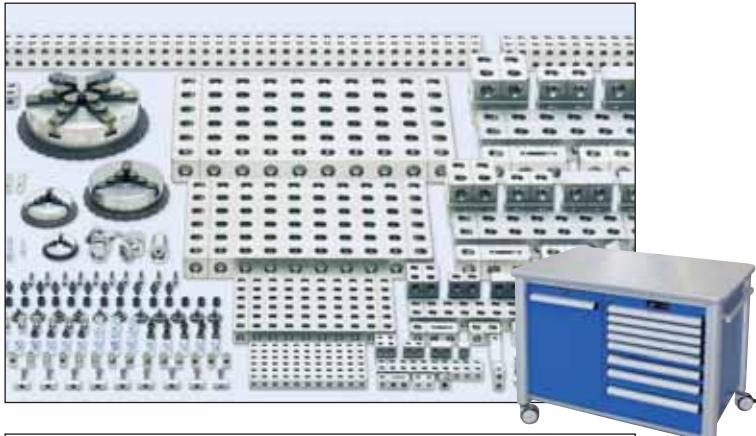

Due to the variety of components and of course the long experience of Witte Alufix Classic offers a solution for almost every task. Alufix Classic is not only an investment for current requirements but especially for the future, as all elements, according to the real idea of a modular system, are reusable and compatible with other Witte systems and elements.

Different demands call for diverse solutions!

All Witte - profiles are unique in their design but nevertheless universal. Depending on requirements with regard to targeted application and duration, material or product specification of a part to be fixed, Witte offers purposeful, economical solutions.

Independent of general specifications of individual parts or groups, holding or measuring fixtures, a crucial point is the degree of desired flexibility during use. ALUFIX CLASSIC offers the highest flexibility.

Fixtures are assembled with standard, catalogue components without any additional complex machining. At any time additions and/or modifications are just as easily possible as complete disassembly of the individual parts in order to build a new fixture for your next part. Witte profiles ALUFIX CLASSIC or ALUFIX ECO due to their system integration possibilities have extensive patented rights. This ensures that all profiles, connecting and positioning elements are compatible and complementary.

# ALUFIX - Systematic flexibility...

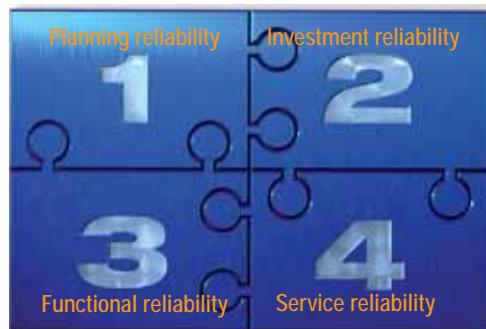

**Reliability from market leader in fixture building  
with 30 years of experience and more than 10.000 systems sold worldwide**

Why and when do you need this system?

- You want a fast solution with short reaction times and high flexibility?
- Immediate availability is a must for you because planning time is getting shorter and shorter ?
- You want to remain independent and prefer "do it yourself"?

ALUFIX supports you fourfold to master these demands successfully

**What does  
this mean?**

## Planning reliability

ALUFIX shortens your planning time and gives you a high degree of freedom with

### 100% compatibility

- Complete system is upwards or downwards compatible
- All system sizes can be combined
- No weight or size limits
- Can be used with other systems and clamps
- ALUFIX has been on the market for 25 years
- Basic design has always remained the same
- Original components still valid today
- Majority of components on stock
- Own manufacturing facilities with modern workshop

### 100% continuity

### 100% Verfügbarkeit

## Investment reliability

ALUFIX offers you 4 tangible commercial advantages

### 100% quality

### ALUFIX quality standard

- High quality aluminium raw material
- Comprehensive machining for highest precision
- Patented wear-resistant connection technology

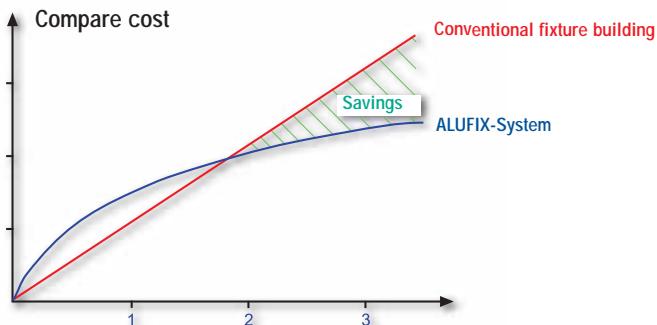

### 100% cost effective

- Fast return on investment
- Productivity advantage by minimizing your standing times
- Multiple application possibilities with few components

**100% cost effective**

- ▶ Fast return on investment
- ▶ Productivity advantage by minimizing your standing times
- ▶ Multiple application possibilities with few components
- ▶ Multiple retooling concept enables multiple use of most of the standard components built in to fixtures

*Compared to dedicated fixtures Alufix gives you a financial advantage already from second application onwards.*

**Functional reliability**

ALUFIX saves you time and money, because all tasks are solved quickly and accurately:

**100% intelligence****High versatility due to patented system**

- ▶ The Alufix principle: Outer dimensions are always a multiple of the grid, grids are maintained even over several joined elements, through bores in three directions
- ▶ Low weight and high dimensional accuracy
- ▶ No large storage space required when fixtures are disassembled
- ▶ Few special assembly tools necessary
- ▶ ALUFIX-EXPERT software for short term feasibility studies, for planning or simple partlists and pre design drawings
- ▶ Parts library ALUFIX FIXMES for common CAD applications

**100% easy handling****100% speed****Service reliability**

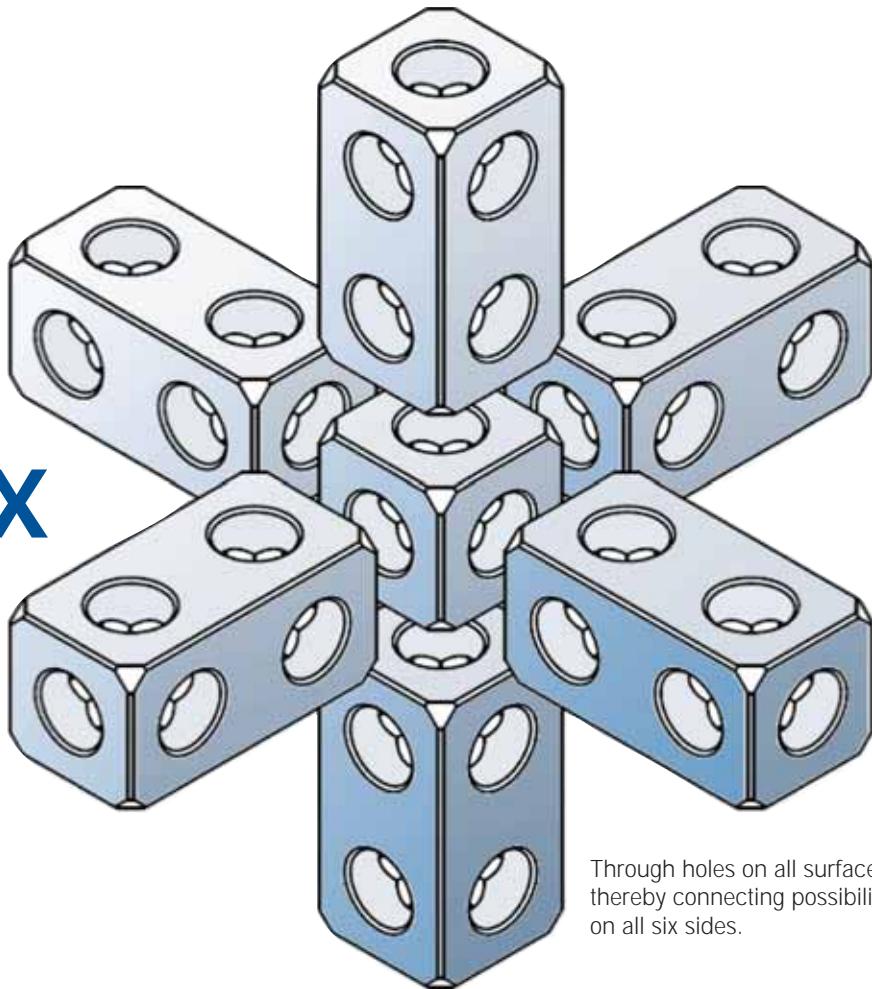

Services around ALUFIX leave nothing to be desired:

- ▶ Service stations worldwide
- ▶ Advice, Demos, training and support directly on customer's site or at Witte
- ▶ Worldwide network
- ▶ Teams of assembly engineers for installation and startup on site

**... a pleasure to work with!**

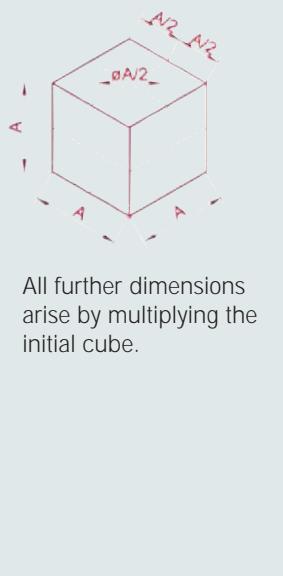

# The ALUFIX principle

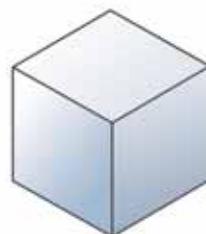

## Basic design

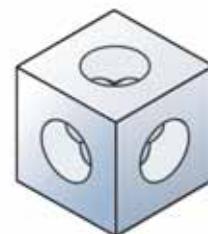

Origin of element geometry

Initial shape: Cube

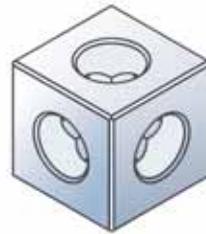

Marking for holes on all surfaces

Through holes on all surfaces

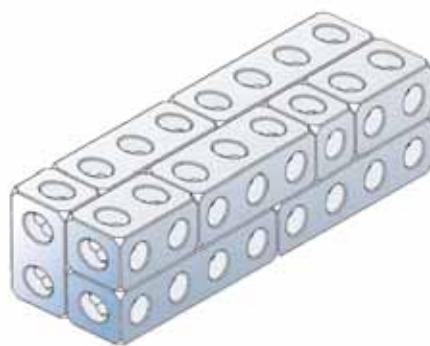

Chamfers on all edges

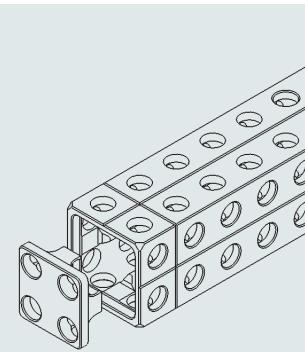

Angles on corners

Sectional view

ALUFIX element geometry guarantees that the grid in all directions across any number of joins will remain unchanged.

Hollow profiles (Light bars) are a logical extension for larger cross sections and lengths. Couplings mounted at both ends create 6 sided connection option.

## Connection technology

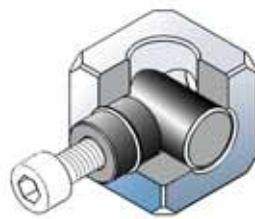

Each hole is not only for positioning but also for fixation

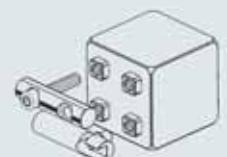

Sleeve  
for positioning

Screw  
nut

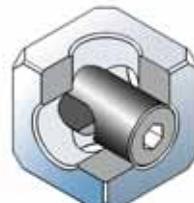

Sleeve, nut  
and screw

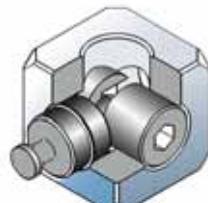

Nubs are space saving connection solution for slides, quick couplings and contour blocks.

Twin bolt  
for positioning

Lock  
for securing

Lock  
and twin bolt

# Application spectrum

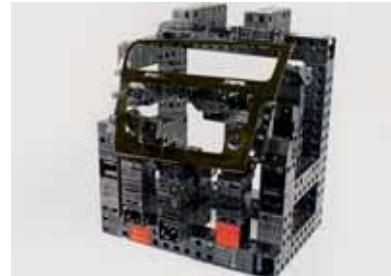

## Simple part supports

- simple, direct and without design, built according to the Alufix principle.  
Here a modular fixturing system with a large range of components comes into its own.

## Fixtures

- According to design and requirements of workpiece data, concept for repeatable use
- From checking of purchase parts to series measuring

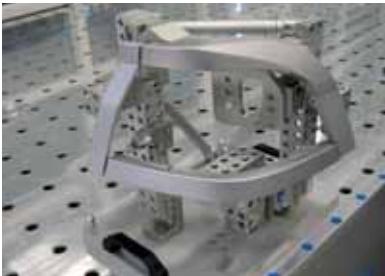

## Sophisticated part supports

- With measuring, checking and adjusting elements, i.e. dial gauges, retractable plug gauges, moving slides

## Gap and flush gauges

- with folding/removable contour stripe models and or measuring equipment

## Meisterbocks

- Outer and inner for front, decklid, floor or complete body-in-white

## Fuegemeisterbocks (Match metal fixtures)

- For front, rear, floor, sidepanels and a complete chassis

## Cubings

- For supporting reference models and single parts in changeover

## Frames for design models

- For supporting Uriol and clay models

## ALUFIX fixtures can also be used for

assembly and alignment, glueing and welding, milling and laser machining

## Versions

### ALUFIX CLASSIC

High tensile-strength aluminium for highest demands on load, stability, durability, accuracy

### ALUFIX ECO

Medium tensile aluminium as economical alternative for normal applications and moderate building intervals

## Basic Components

Base plates/grid base plates  
(small to medium size fixtures)

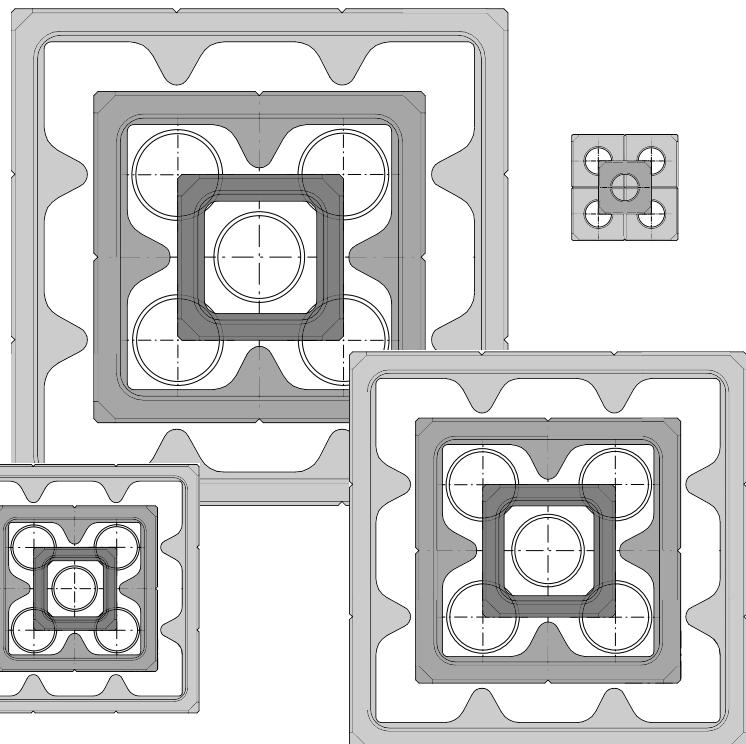

Bars full/light

Sandwich plates and grid plates  
(large fixtures, mobile)

## System sizes

ALUFIX 16  
for optical measuring,  
Mounting small parts

ALUFIX 25  
for small to medium single part fixtures

ALUFIX 40  
for medium to large assembly part fixtures, meisterbocks etc.

ALUFIX 50  
for mounting large, heavy parts

# Element groups

## Basic elements

Plates, bars, struts, angle brackets

## Adjustable elements

Slides, rockers, jacks, rotary plates etc.

## Contact elements

Centers, ball points, v-pieces, contour blocks etc.

## Clamping elements

Hold-down springs, toggle clamps, clamps, jaw chucks, vises, magnets, vacuum suckers etc.

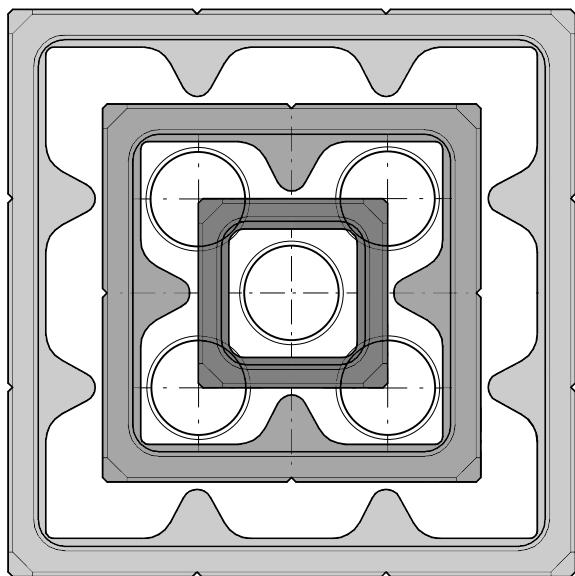

## Connection elements

Couplings, quick and screw connectors

AF 25 Light, 25x25, 50x50, 75x75, grid hole ø 12,5

## Profiles in original size

### ALUFIX

Material: EN AW 7075 (high tensile aluminium)

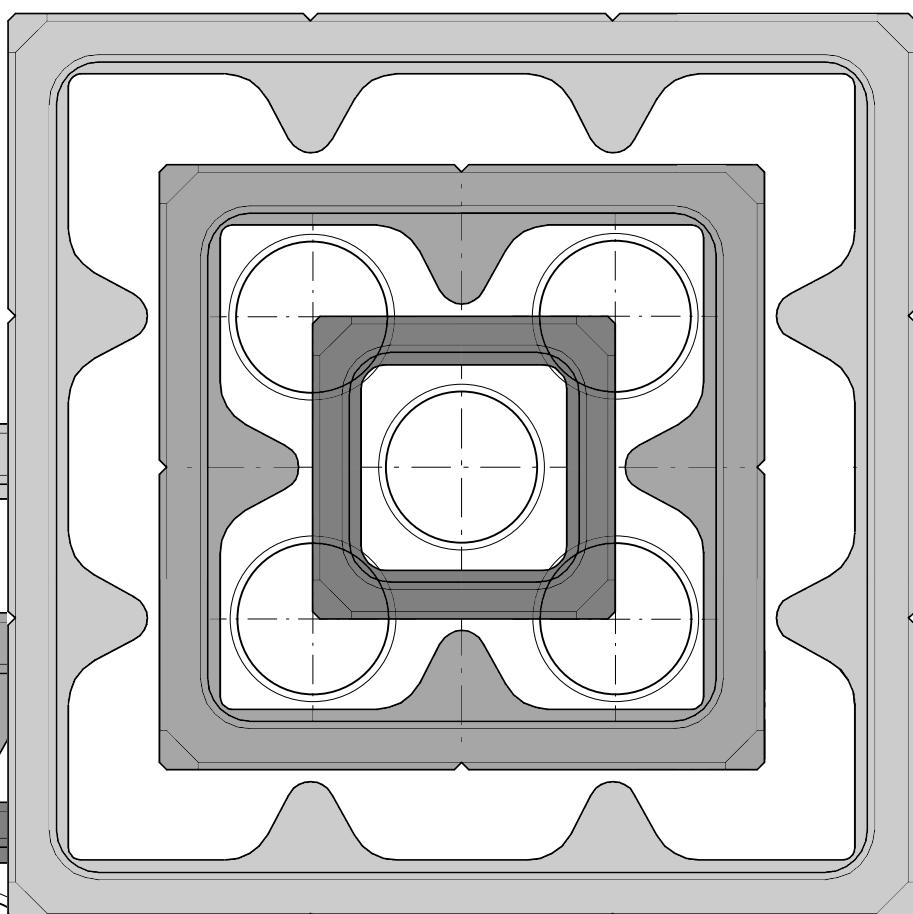

Tensile strength: Min. 480 N/mm<sup>2</sup>

Hardness: Min. 130 HB

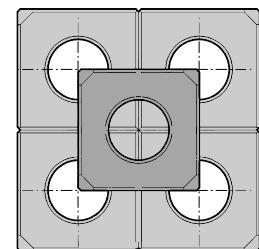

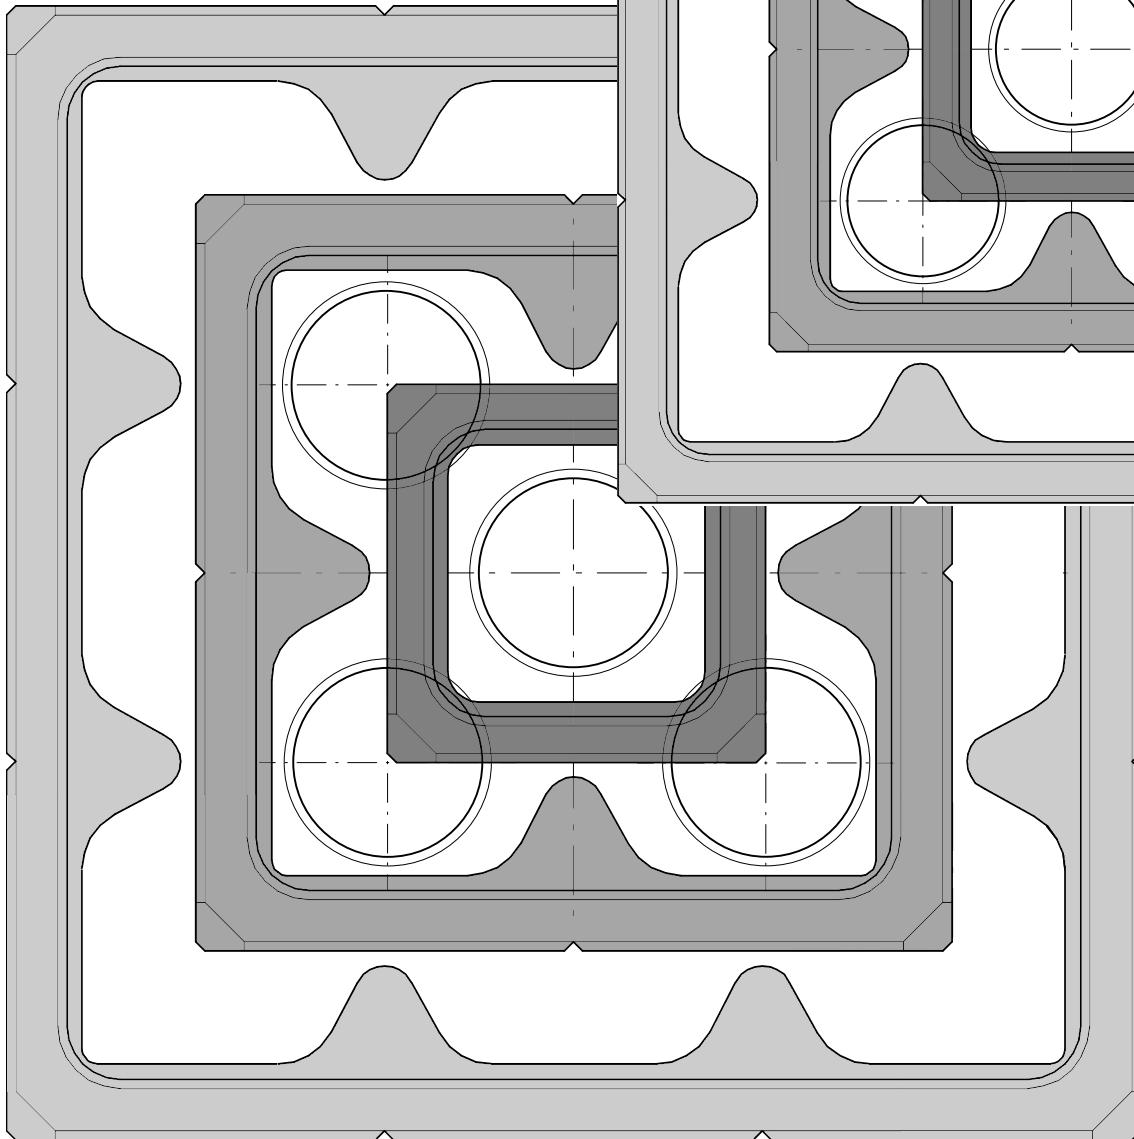

Yield strength: Min. 390 N /mm<sup>2</sup>

E Module: 72.000 N/m<sup>2</sup>

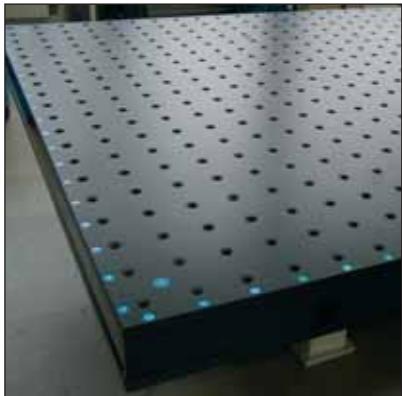

AF 40 Light, 40x40, 80x80, 120x120, grid hole ø 20

AF 50 Light, 50x50, 100x100, 150x150, grid hole ø 25

AF 16 full,  
16x16,  
32x32,  
grid hole ø 8

# ALUFIX CLASSIC Struts

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

## ALUFIX CLASSIC Quick Change Couplings

Quick change couplings comprise of a top and bottom section, which are aligned accurately together via ball seats. Locking is done with a short turn on a quick fastener. The total height is exactly in Alufix grid.

Hinges connect top and bottom sections if required and provide a fold function. The modular design enables following combination possibilities:

Quick change coupling,  
Top and bottom sections separately, standard version

Quick change coupling  
for folding back, hinge is  
mounted at the rear

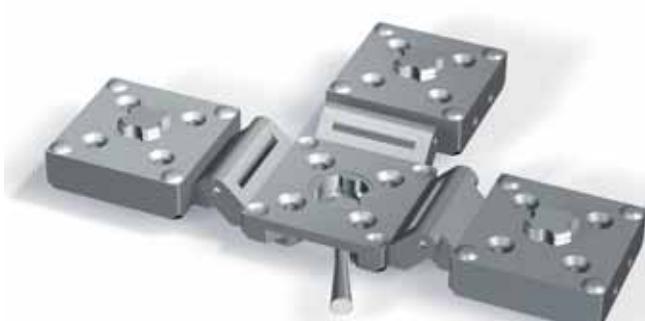

Quick change coupling  
to fold sideways to the left, hinge is  
mounted on the left

Quick change coupling  
to fold sideways to the right, hinge is  
mounted on the right

Quick change coupling with two folding options  
One hinge on the left and one at the rear.  
Not shown, one hinge on the right, one hinge at the rear

Quick change coupling with three folding options  
One hinge on the left, one on the right and one at the rear.

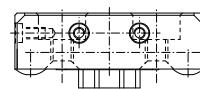

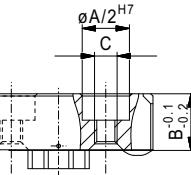

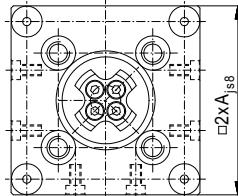

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

## Quick change coupling top section

with hinge bores, complete

Adapter plates also available including suitable connection elements  
D50 – **97893**  
D80 – **97892**

Application example:  
Keyless chuck mounted on  
a rotary plate and  
Alufix Classic bar

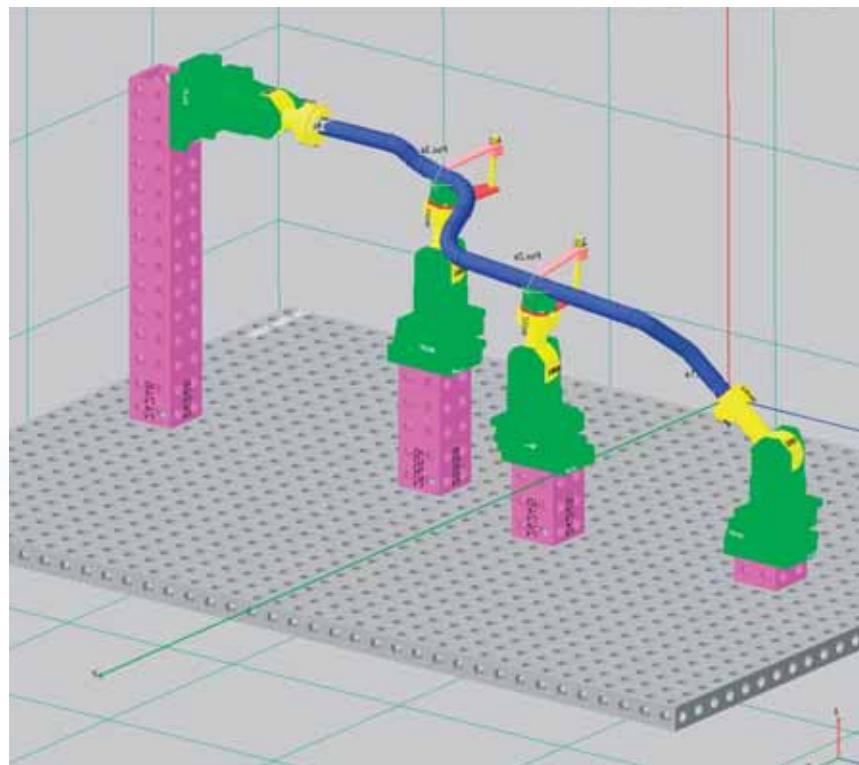

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

## Rotary swing unit

Applications

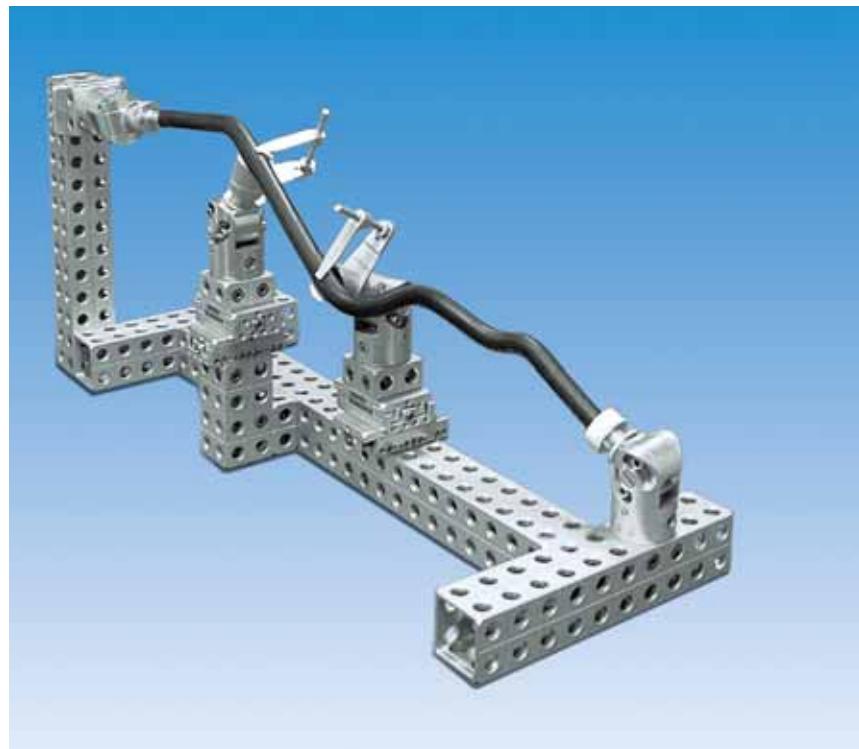

Measuring fixture for hose.

The positions and angles required are easily calculated with the help of Alufix

Expert software (page 238).

Fixtures like this are implemented very quickly.

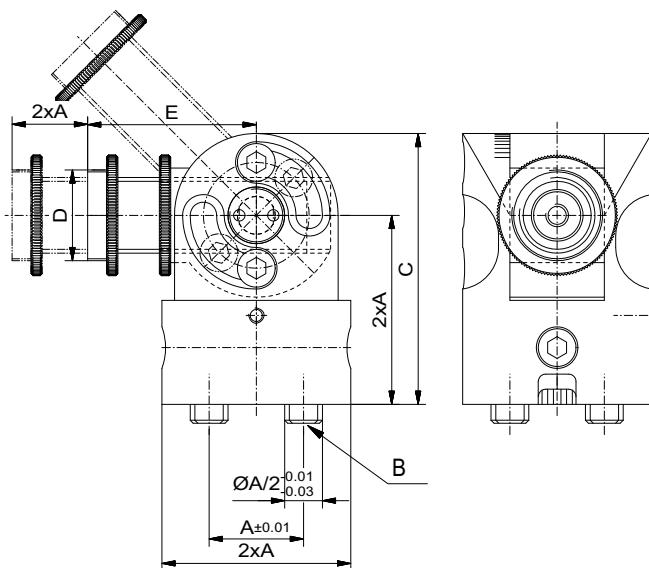

## Rotary swing unit

with thread

Nr.	A (AF)	B	C	D	E	
93063	25	M6	72	24x1	44,6	342
<b>99794</b>	<b>40</b>	<b>M10</b>	<b>115</b>	<b>32x1</b>	<b>69</b>	<b>750</b>

 Rotary swing unit 99794 for Alufix 40 with worm gear for fine adjustment in both rotating axes

## Rotary swing unit

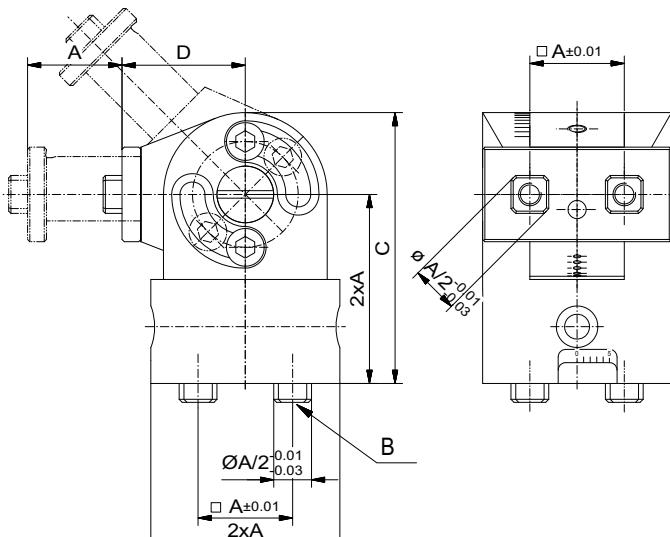

with nubs

Nr.	A (AF)	B	C	D	
93660	25	M6	72	32,6	370
<b>99807</b>	<b>40</b>	<b>M10</b>	<b>115</b>	<b>50</b>	<b>750</b>

 Rotary swing unit 99807 for Alufix 40 with worm gear for fine adjustment in both rotating axes

 Rotary swing unit 93660 and 99794 for Alufix 40 with fine adjustment

 **ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

## ALUFIX Jacks

Alufix jacks are used to position and level different sized parts for measuring. These operator-friendly jacks are configured according to application and customer requirements.

### Rack gear jack

with height adjustment using a gear jack, vernier 0,05mm

Nr.	A (AF)	B	C	max. load	
82949	25	75	25	30 kg	486
90538	40	160	80	45 kg	2.660
82821	50	200	100	60 kg	5.523

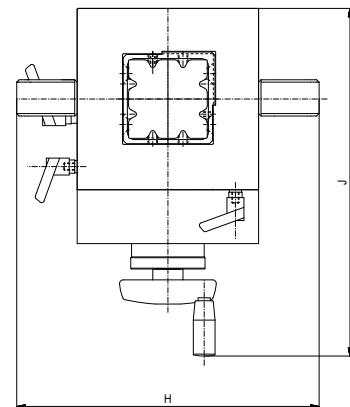

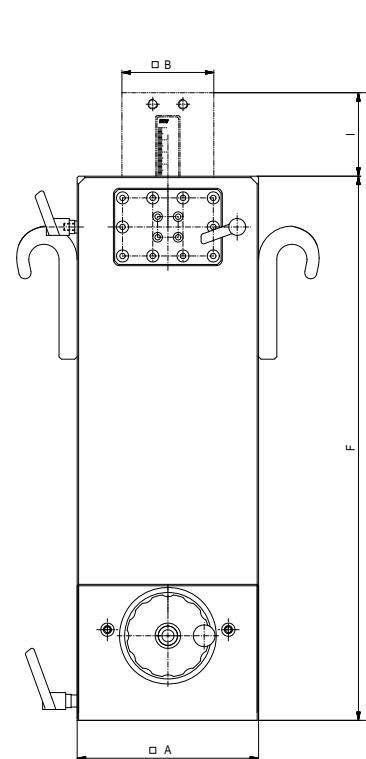

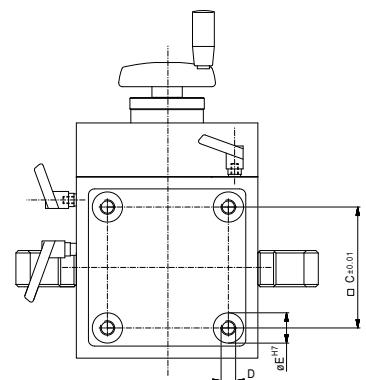

## Jack 1000, Heavy Duty

with height adjustment via crank handle, load capacity: 1000kg

Nr.	A	B	C	D	E	F	G	H	I	J	<b>g</b>
98230	150	76	100	M12	25	450	700	250	250	288	21.000

Top blocks are not included in jack supply, they must be ordered separately.

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

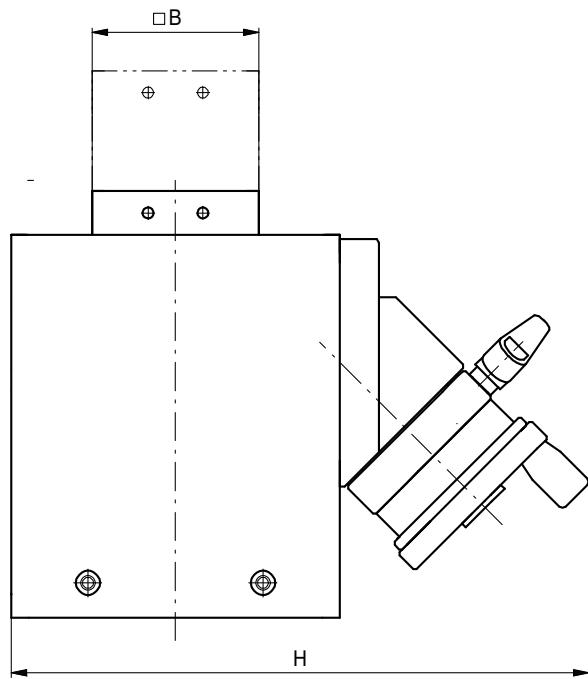

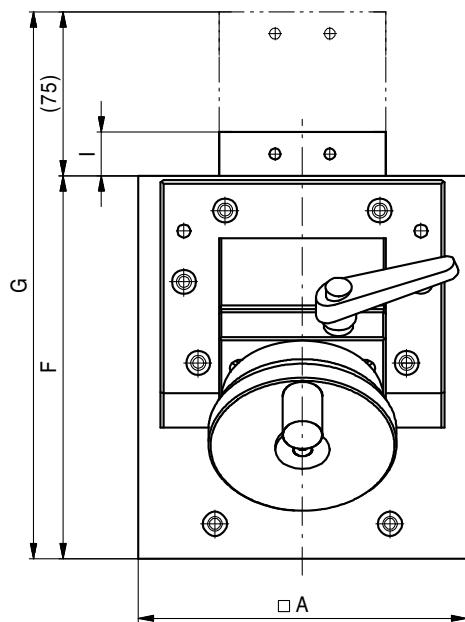

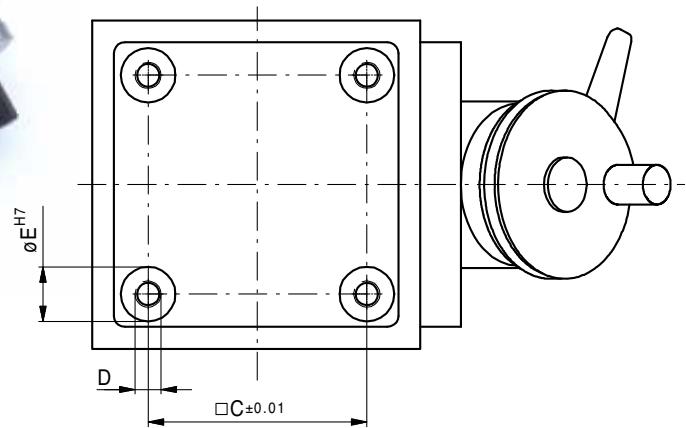

### Jack 500

with height adjustment via crank handle,  
load capacity: 500kg

Nr.	A	B	C	D	E	F	G	H	I	<b>g</b>
92949	150	76	100	M12	25	175	250	265	20	10.115

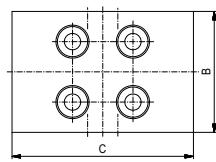

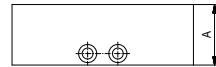

Top blocks are not included in jack supply, they must be ordered separately.

**Top block AF50 for jack**

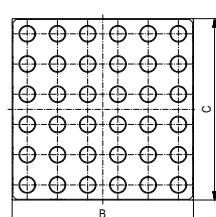

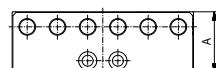

with AF50 holes and connectors

Nr.	A	B	C	
98217	50	100	150	1.924

**Top block AF25 for jack**

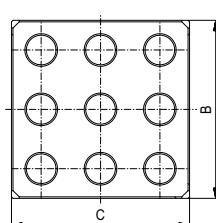

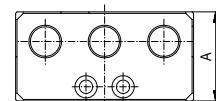

with AF25 grid and connectors

Nr.	A	B	C	
98218	50	150	150	1.823

**Top block AF40 for jack**

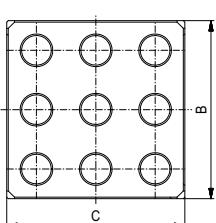

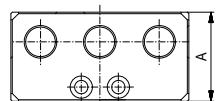

with AF40 grid and connectors

Nr.	A	B	C	
98219	60	120	120	2.150

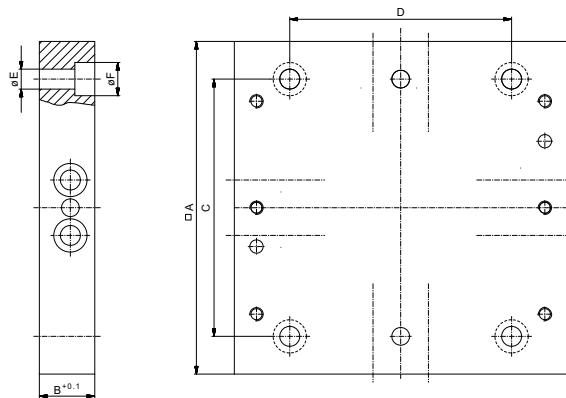

**Top block AF50 for jack**

with AF50 grid and connectors

Nr.	A	B	C	
98220	75	150	150	4.100

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

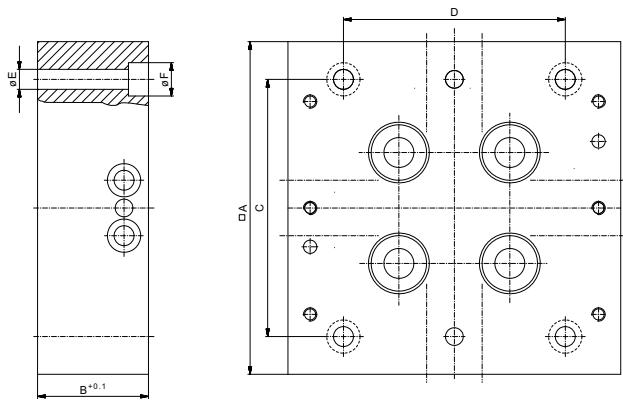

### Top block

for jack 92949

Nr.	A	B	C	D	E	F	g
289486	150	25	116	100	9	15	1.200

Top blocks are not drilled but can be supplied with customized grid on request

### Top block

for jack 92949 with AF50 holes

Nr.	A	B	C	D	E	F	g
289487	150	50	116	100	9	15	2.100

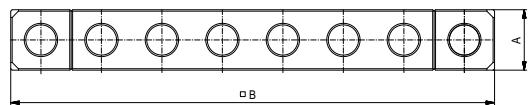

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Other dimensions on request

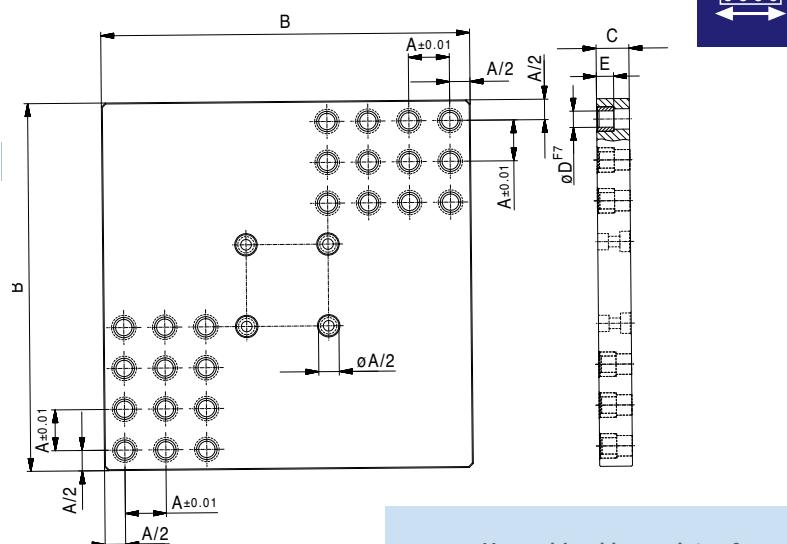

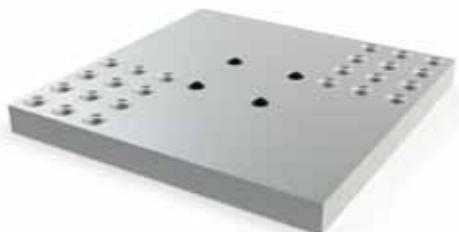

**Base plate for jack**

grid AF25, including connectors

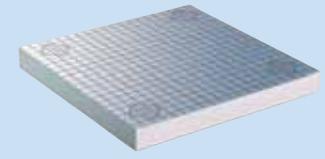

Nr.	A	B		g
98221	50	400		13.050

**Base plate for jack**

Preference item:

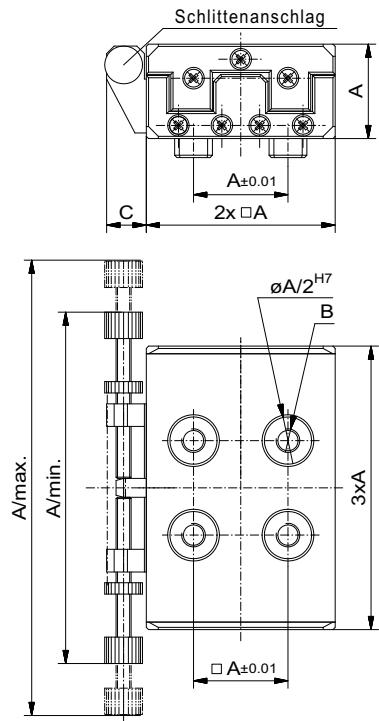

Articles with green diamond ->  
are available ex stock!

-> Article colour anodized natural  
-> Classic and/or ECO  
-> Article colour anodized black

## Slide stop

for guiding or roller slides

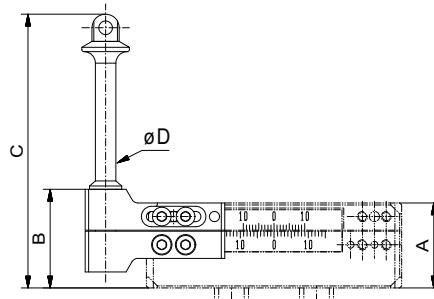

Nr.	AF	A/min	A/max	B	$\bar{g}$
82411	16	59	77	6,4	98
82412	25	93	120,5	10	115
82413	40	146,8	192	16	131
82414	50	186	242	19	140

## Positioning guide and pin

to fix guiding slides in "0" position

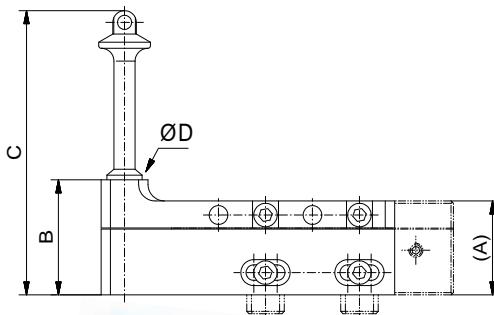

Nr.	A(AF)	B	C	$\phi D$	Type	$\bar{g}$
83120	16	18,5	52,5	4,5	left	-
84323	16	18,5	52,5	4,5	right	-
c 82711	25	29	80,5	6	left	50
c 84321	25	29	80,5	6	right	50
c 82833	40	47	119	8	left	180
c 84320	40	47	119	8	right	180
83083	50	58	135	12	left	294
84322	50	58	135	12	right	294

## Positioning guide and pin

to fix heavy duty (HD) guiding slides in "0" position

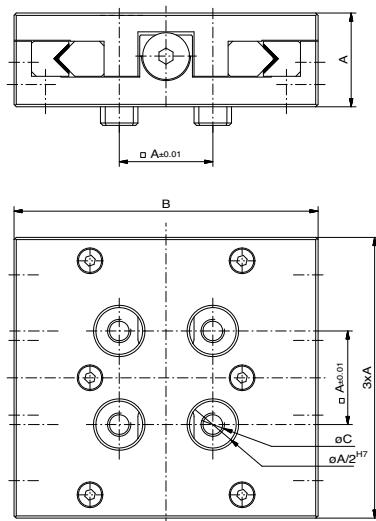

Nr.	A(AF)	B	C	D	Type	$\bar{g}$
92642	25	30,5	82	6	left	240
92643	25	30,5	82	6	right	240
92644	40	49	121	8	left	372
92645	40	49	121	8	right	372
92646	50	61	138	12	left	586
92647	50	61	138	12	right	586

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Other dimensions on request

Witte heavy duty slides are available with slide bearing or roller bearing. Slides with roller bearing can cope with a higher load capacity than with free floating operation

## Guiding slide, heavy duty guided with slide bearings

Nr.	A (AF)	B	C	max. load	shift	g
92364	25	79	M6	75 kg	+/- 12,5	450
92423	40	130	M10	225 kg	+/- 20	2.000
92424	50	158	M12	375 kg	+/- 25	3.500

## guided with roller bearings

Nr.	A (AF)	B	C	max. load	shift	g
280495	25	79	M6	150 kg	+/- 13	450
280496	40	130	M10	450 kg	+/- 21	2.000
280497	50	158	M12	750 kg	+/- 26	3.500

Version with slide bearings

Application example:  
Anodized black with positioning pin and  
guide mounted

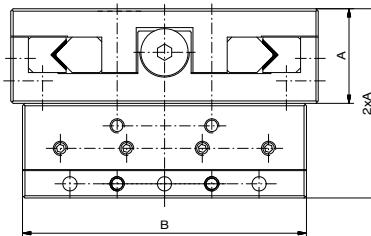

Application example:  
Hook clamp with cross guiding slide  
with slide bearings

## Cross guiding slide, heavy duty

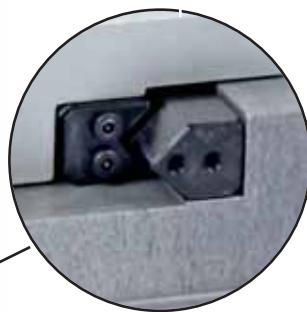

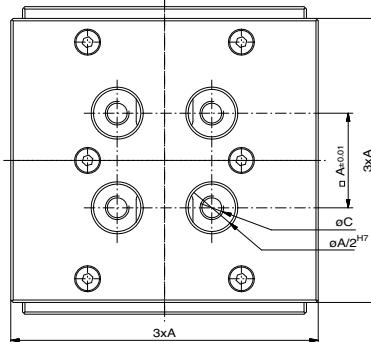

guided with slide bearings

Nr.	A (AF)	B	C	max. load	shift	g
92031	25	79	M6	75 kg	+/- 12,5	900
92425	40	130	M10	225 kg	+/- 20	4.000
92426	50	158	M12	375 kg	+/- 25	7.000

guided with roller bearings

Nr.	A (AF)	B	C	max. load	shift	g
280498	25	79	M6	150 kg	+/- 13	900
280499	40	130	M10	450 kg	+/- 21	4.000
280500	50	158	M12	750 kg	+/- 26	7.000

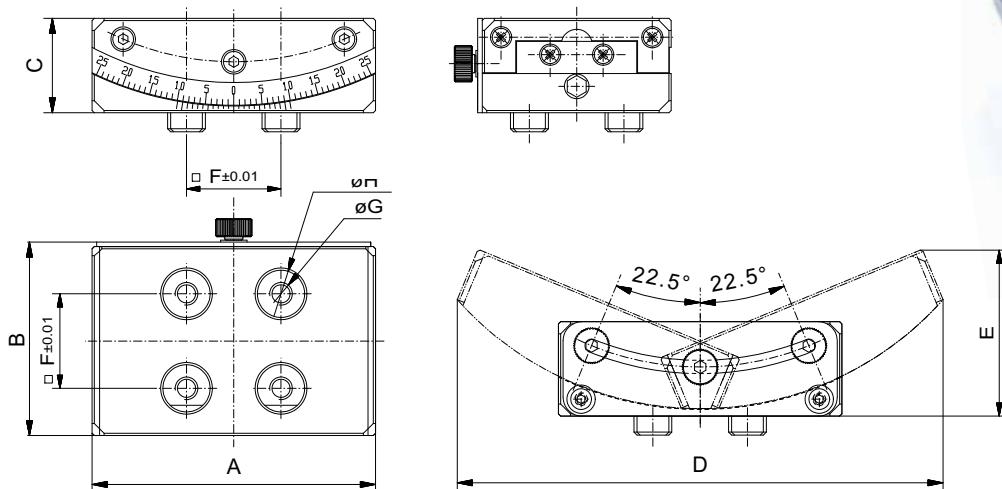

Version with roller bearings

## Rocker AF25

for positioning, with screw clamping

Nr.	A	B	C	D	E	F (AF)	G	H	g
82972	75	51	25	128,5	44	25	M6	12,5	242
283778	120	82	40	206	70	40	M8	20	900

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

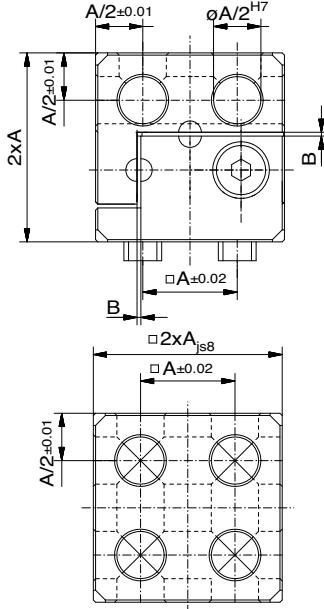

## ALUFIX shim blocks

Adjustment in X,Y,Z takes place by inserting or removing shim foils or shims. After adjustment settings are fixed using pins.

Values shown in the chart for range of adjustment are maximal values for one axis. Values in brackets show adjustment range when using more than one axis simultaneously.

ALUFIX shim blocks are available in a mirrored version on request

### 3D Shim block AF

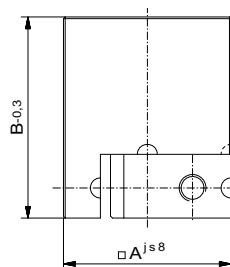

for fine adjustment in 3 axes X,Y,Z, using shim foils (page 60).

Nr.	A (AF)	shift B	
89177	25	x,y,z: +/- 1,0 (0,7)	270
89178	40	x,y,z: +/- 1,5 (1,1)	700
89179	50	x,y,z: +/- 2,0 (1,4)	2.200

### Contour block

for 3D Shim block

Nr.	B (AF)	Ax A x B	
34768	25	50x50x65	356
34769	25	50x50x90	536
34770	25	75x75x65	866
34771	40	80x80x104	1.879
34772	40	80x80x144	2.227
34773	40	120x120x104	4.871
34774	50	100x100x130	2.926
34775	50	100x100x180	5.833
34776	50	150x150x130	6.900

Other dimensions on request

Contour blocks are without surface protection, also when 3D Shim block is anodized in different colours

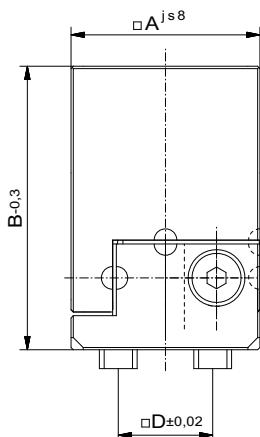

## 3D Shim block

### with integrated contour block

for fine adjustment in 3 axes X,Y,Z, using shim foils (page 63).

Nr.	D (AF)	AxAx B	shift	
91834	25	50x50x70	x,y,z: +/- 1,0 (0,7)	473
91835	40	80x80x120	x,y,z: +/- 1,6 (1,1)	2.074
91836	50	100x100x150	x,y,z: +/- 2,0 (1,4)	4.275

Contour blocks are without surface protection, also when 3D Shim block is anodized in different colours

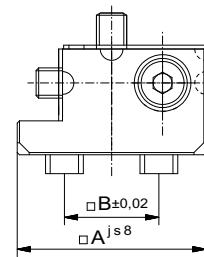

Application example: Clamping unit with ratchet clamp mounted on machined contour block (green) with 3D shim block base

## 3D Shim block base, side mounting

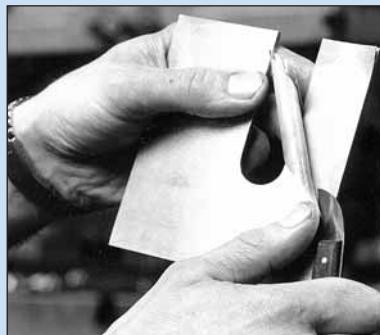

complete with shims and screws

Nr.	B (AF)	AxA	
92165	25	50x50	203
92166	40	80x80	778
92167	50	100x100	1.485

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

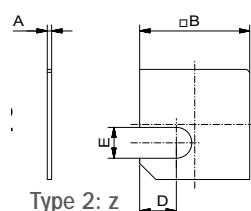

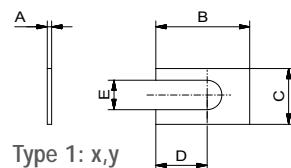

ALUFIX shim blocks are available in a mirrored version on request

**Pealable shim foil**  
for gaps between elements,  
in various thicknesses.  
Comprises of 0,05mm  
thick laminated alu-foils.  
The easy process of peeling  
with a knife can be carried  
out on the spot when spacers  
are required.

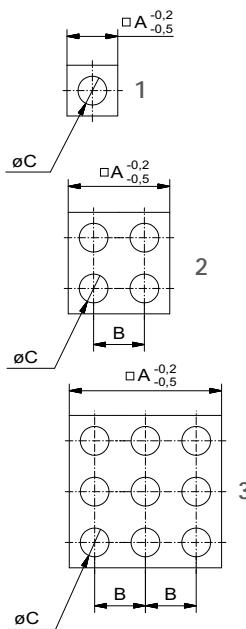

The advantages:  
 • Tolerances are evened out  
making remachining jobs  
such as milling, grinding  
etc. unnecessary  
 • Reduces setting up times  
 • Reduces amount of  
machining required

### Shimfoil type 1 or 2

peelable, in 0,05mm layers, for setting of shim blocks

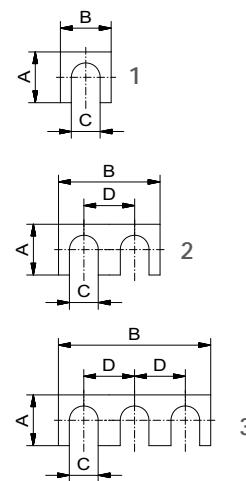

Nr.	System	Type	A	B	C	D	E	g
33013	AF 25	2	1,0	37,5	-	12,5	10	1,5

27965	AF 50	3	49	149	25,5	50	25

## Shim (with fixed thickness)

for setting of shim blocks in x,y axis

### AF 25, Type 1

B=32, C=19, D=20,5, E=10

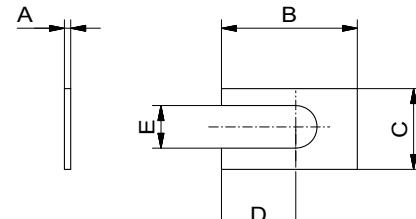

Nr.	A
128005	0,05
122010	0,1
122020	0,2
122030	0,3
122040	0,4
122050	0,5
122070	0,7
122080	0,8
122100	1,0
122150	1,5
122200	2,0

### AF 40, Type 1

B=50, C=30, D=30, E=14

Nr.	A
124005	0,05
124010	0,1
124020	0,2
124030	0,3
124040	0,4
124050	0,5
124070	0,7
124080	0,8
124100	1,0
124150	1,5
124200	2,0

Type 1: x,y

## Shim (with fixed thickness)

for setting of shim blocks in z axis

### AF 25, Type 2

B=37,5 C=37,5 D=12,5 E=10

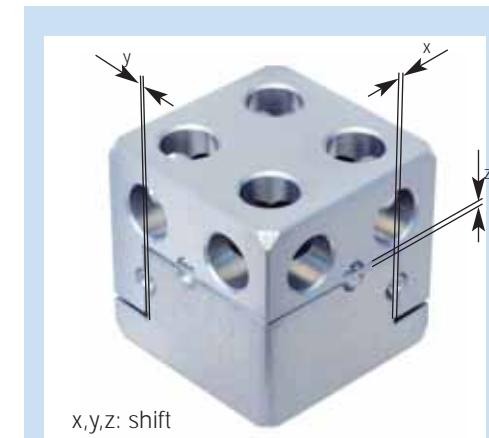

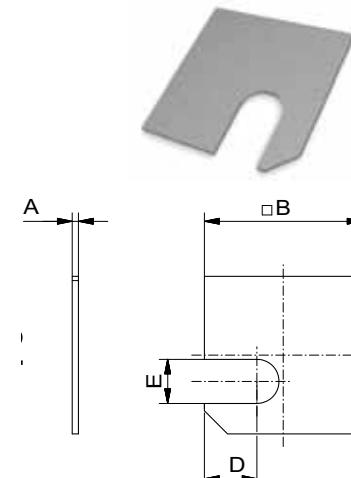

Nr.	A
129005	0,05
123010	0,1
123020	0,2
123030	0,3
123040	0,4
123050	0,5
123070	0,7
123080	0,8
123100	1,0
123150	1,5
123200	2,0

### AF 40, Type 2

B=60,5 C=60,5 D=20,5 E=20

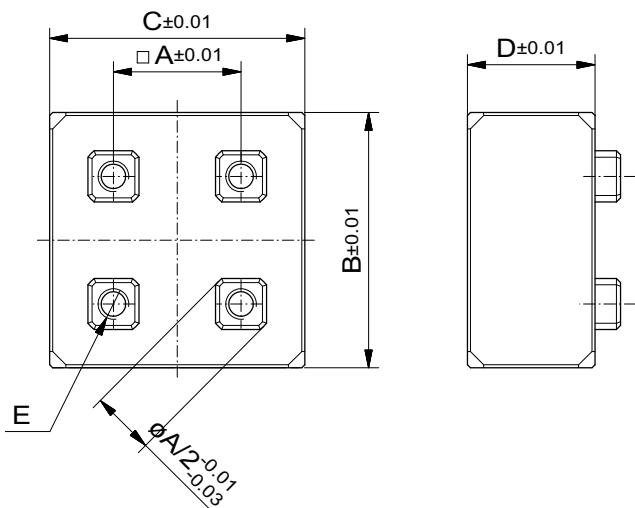

Nr.	A
125005	0,05
125010	0,1
125020	0,2
125030	0,3
125040	0,4
125050	0,5
125070	0,7
125080	0,8
125100	1,0
125150	1,5
123200	2,0

Type 2: z

Last three digits of order number correspond to shim thickness in 1/100mm.

Adjustment takes place by adding or taking away shims and/or shim foils.  
After adjustment settings can be fixed using pins.

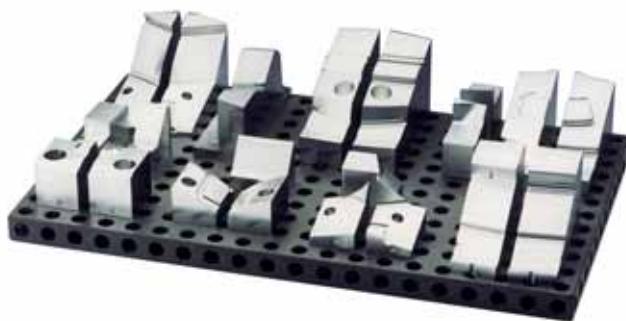

Contour blocks are without surface protection

## Contour blocks

## ALUFIX CLASSIC

### Screw-Jacks and Top Sections

Screw-jacks and top sections provide the contact between workpiece and Alufix fixture. Reliable in grid or off-grid positioning is possible with ball joints, screw-jacks and extensions available in many variations.

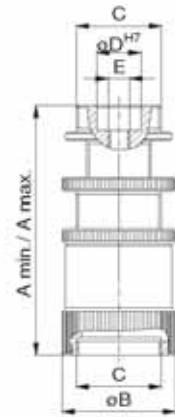

### Screw-jack

with precision thread and check nut

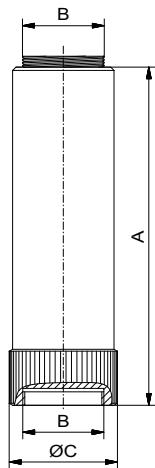

Nr.	A/min	A/max	B	C	D	E	
90614	38	50	8	32	M4	24x1	65

## Compound resin

Nr.	contents g	g
80692	100	120
80685	400	460

### Technical details:

Tensile strength 300kg/cm<sup>2</sup>

Compression strength: 800kg/cm<sup>2</sup>

Heat resistance upto +200°C

Application example for compound resin in standard moulding cap

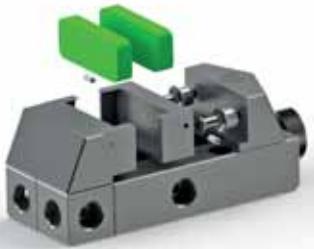

### Plasticine compound resin

Knead blue and yellow components in ratio 1:1,

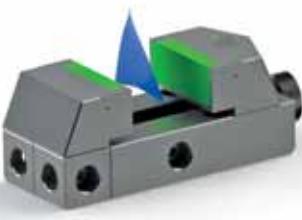

blend well until colour throughout is green.

Apply within 15 minutes. The resin hardens to full strength within 3 hours.

Attaching the forming jaws with plasticine compound:

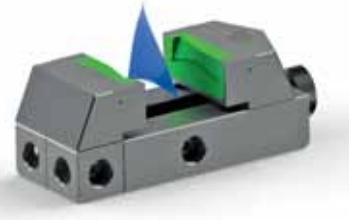

Positioning of workpiece:

The forming jaws with the compound resin are pressed together.

The compound resin adjusts to the contours of the workpiece

## Pin cushion

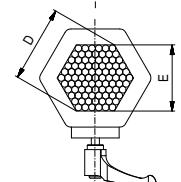

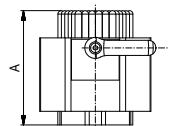

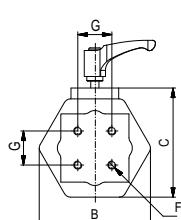

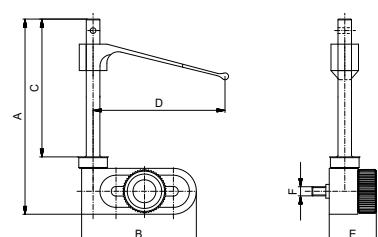

with rubberized pins

Nr	A	B	C	D	E	F	G	g
91940	84	81,5	80	55	48,5	6	25	1.400
98101	84	52	55	35	31	6	25	1.100

## ALUFIX Hook Clamps

Hook clamps are used when workpieces with a hole (especially on the inside of a workpiece, where it is difficult to clamp conventionally) have to be positioned and clamped simultaneously. They are usually connected by means of a contour block but they can be mounted directly to Alufix.

### How to order:

Hook clamps are individually manufactured for every hole or press cut and comprise of four parts:

- ① Basic unit
- ② Top pin
- ③ Support ring
- ④ Hook (optional two hooks)

When ordering a hook clamp please attach a 1:1 section drawing of the support with details of the center pin diameter and the shape of the bore (round or oval). Further we need details of clearance behind the hole, metal thickness, collar height and direction in which part has been stamped

When ordering basic unit please also state required hook size  
See also our download inquiry form under [www.alufix.de/downloads](http://www.alufix.de/downloads)

## Hook Clamp compact

Example dia 30

30760	45mm	100
28400	50mm	122
33350	55mm	125
28401	60mm	128

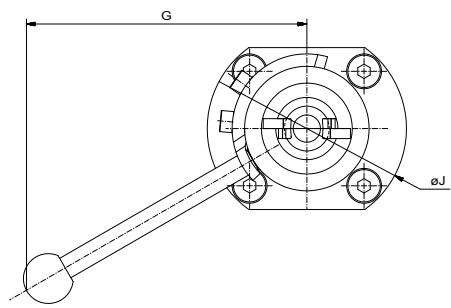

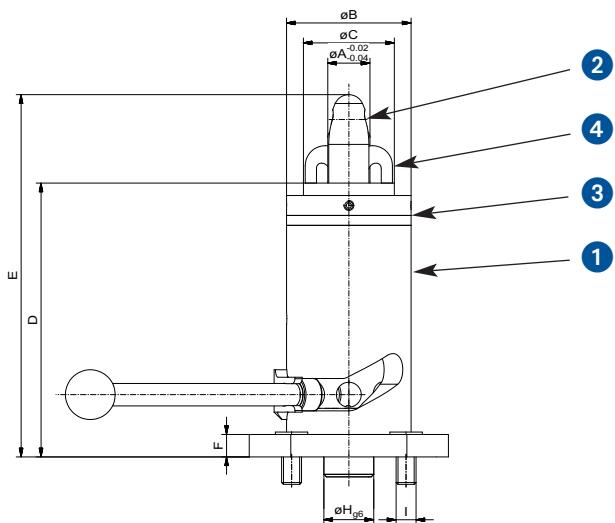

Internal excenter lever, top pin and support ring are 100% compatible (outer dimensions same as existing hook clamps). Sideways activation possible via hex key

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Other dimensions on request

Picture shows  
high base unit  
version #281887.  
Special lengths on  
request

Tolerances in workpiece thickness of up to +/- 0,3mm are evened out. Fast adjustment according to workpiece thickness possible. More space between operating lever and clamping surface = more freedom of movement and less part collision due to horizontal lever movement. Hook alignment independent of lever orientation, infinite rotary movement 360°. Support ring infinite rotary movement 360°.

workpiece thickness

X,Y,Z hook clamp,  
self centering

# ALUFIX CLASSIC Connection Elements

A variety of elements allows combination of Alufix components whenever two opposite holes, or a hole and a nub are to be connected. This works also between different system sizes using reducer sleeves.

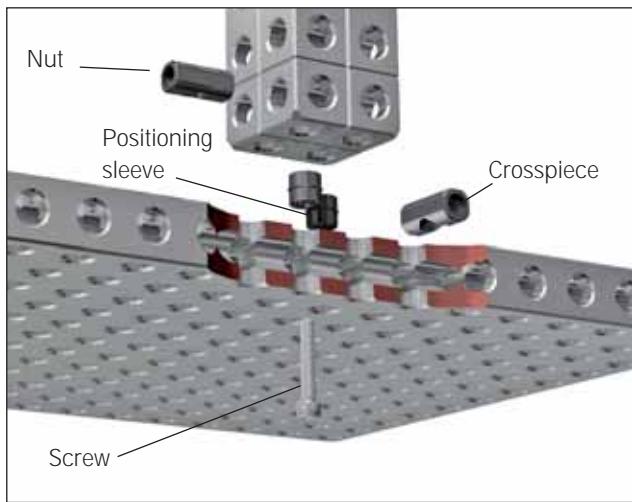

## Quick connection

For fast, constantly changing fixtures we recommend using quick connection elements.

A twin bolt is positioned between Alufix elements to be connected. An eccentric slot on the lock slides round and grips the head of a twin bolt resulting in a tight connection.

Recommended torque must be adhered to otherwise head of twin bolt may be damaged.

## Screw connection

For lasting tight connections the screw connection has proved to be the best.

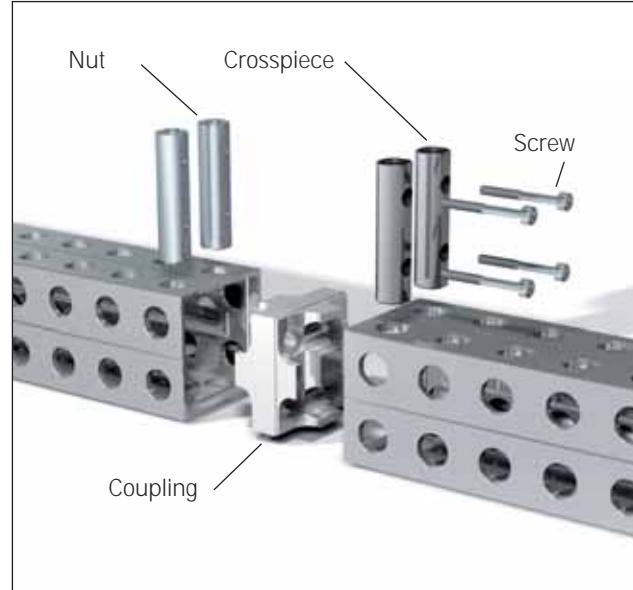

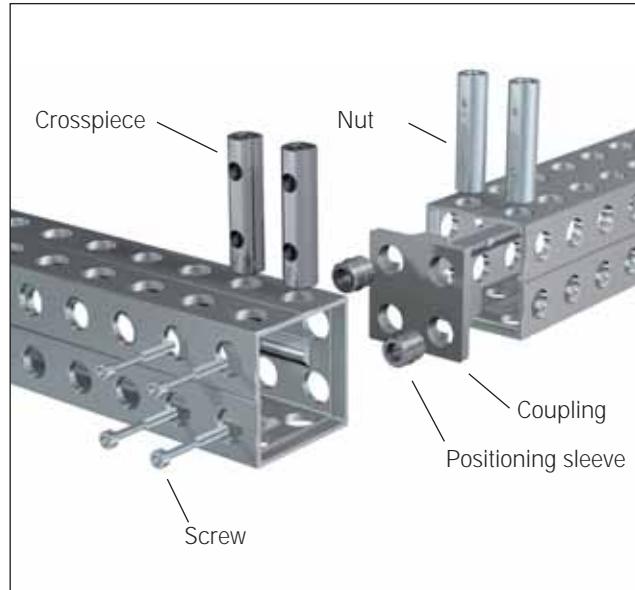

## Connecting different system sizes

Alufix elements in different system sizes are connected using

- Reducer sleeves
- Reducer bolts

## Connecting with couplings

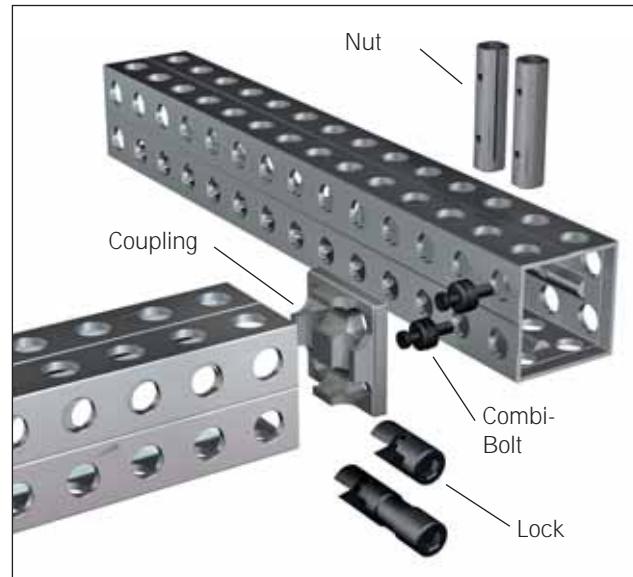

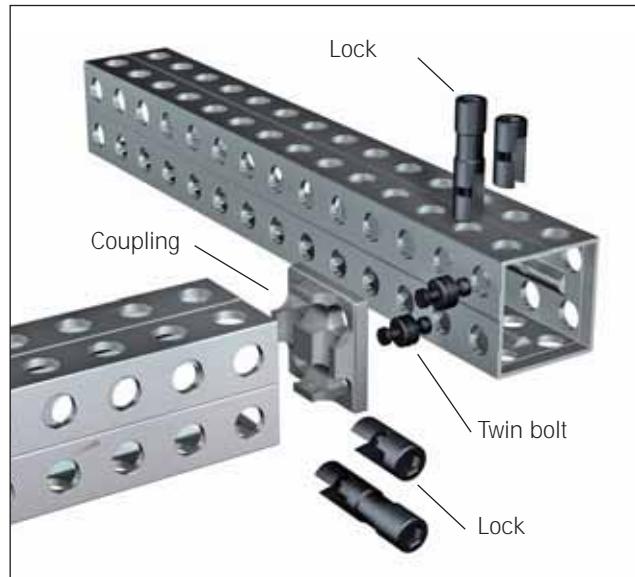

### Single coupling with screw connection

is used in face ends of Light bars for accurate positioning of further elements. Picture shows assembly using screw connectors

### Double coupling with screw connection

is used for centering two Light bars end to end. Picture shows assembly using screw connectors, quick connectors are also possible.

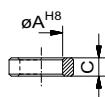

### Single coupling with quick connection

is used in face ends of Light bars for accurate positioning of further elements. Picture shows assembly using quick connectors

### Single coupling with screw/quick connection (combi bolt)

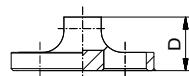

is used for centering two Light bars end to end. Picture shows assembly using screw and quick connectors.

Picture shows a screw connector with positioning sleeves which fit into Alufix bores

Classic version: Ideal for modular fixturing for fast easy handling

ECO version: Ideal for dedicated fixtures, without wear reducing helicoil inserts and without threaded hole for positioning rod

Standard thread sizes are printed in **bold** print

### Quick connection set, AF 16, small

# 82672, (36-pcs.), 160g

comprising of:

Nr.	Pcs	Name
23250	20	Lock, short
23247	10	Twin bolt
23249	3	Combi bolt
23252	3	Bolt disk

### Quick connection set, AF 25, large

# 81285, (70-pcs.), 1274g

comprising of:

Nr.	Pcs	Name
23240	30	Lock, short
23246	10	Lock, long
23223	20	Twin bolt
23228	3	Bolt for bar 1D
23239	3	Bolt disk
23330	2	Coupling, double
23325	2	Coupling, single

### Quick connection set, AF 25, small

# 82673, (36-pcs.), 1000g

comprising of:

Nr.	Pcs	Name
23240	20	Lock, short
23223	10	Twin bolt
23225	3	Combi bolt
23239	3	Bolt disk

### Quick connection set, AF 40, large

# 81516, (70-pcs.), 5020g

comprising of:

Nr.	Pcs	Name
23260	30	Lock, short
20385	10	Lock, long
23257	20	Twin bolt
23258	3	Bolt for bar 1D
23262	3	Bolt disk
20791	2	Coupling, double
20792	2	Coupling, single

### Quick connection set, AF 40, small

# 82674, (36-pcs.), 2500g

comprising of:

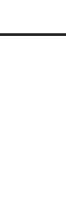

Nr.	Pcs	Name
23260	20	Lock, short
23257	10	Twin bolt
23259	3	Combi bolt
23264	3	Bolt disk

### Quick connection set, AF 50, large

# 82801, (70-tlg.), 9600g

comprising of:

Nr.	Pcs	Name
26856	30	Lock, short

# ALUFIX Tools

Alufix tool sets comprise of high quality components and are ideal for using with Alufix connecting elements.

## #81492 Tools

Alufix 16 (5-pcs), comprising of:

Nr.	St.	Name
80622	1	Positioning rod
81175	1	Extended hex key WAF 3
54902	1	Pin spanner 14/17
81118	2	Key for knurled profiles 32/42

## #81493 Tools

Alufix 25 (10-pcs), comprising of:

Nr.	St.	Name
80534	1	Positioning rod
80520	1	Handle 112,5
80521	2	Extension 150
10523	1	Hex insert bit WAF 3
10522	1	Hex insert bit WAF 4
10521	1	Hex insert bit WAF 5
21820	1	Pin spanner 14/17
81118	2	Key for knurled profiles 32/42

## #81494 Tools

Alufix 40 (10-pcs), comprising of:

Nr.	St.	Name
80535	1	Positioning rod
80439	1	Handle 112,5
80435	1	Extension 200
80437	1	Extension 300
10484	1	Hex insert bit WAF 6
10485	1	Hex insert bit WAF 8
10486	1	Hex insert bit WAF 10
21820	1	Pin spanner 14/17
81118	2	Key for knurled profiles 32/42

## #82263 Tools

Alufix 50 (10-pcs), comprising of:

Nr.	St.	Name
82551	1	Positioning rod
80439	1	Handle 112,5
80435	1	Extension 200
80437	1	Extension 300
10484	1	Hex insert bit WAF 6
10485	1	Hex insert bit WAF 8
10486	1	Hex insert bit WAF 10
27931	1	Pin spanner 17/23
81118	2	Key for knurled profiles 32/42

### Torque wrench

with adjustable torque incl. hex key  
and 3, 4 and 5 mm bits

Nr.	System	maximum torque
82840	AF 16	3N/m
98022	AF 25	5N/m

! In order to guarantee function of the quick connectors,  
recommended torque should not be exceeded.

Adjust torque  
with hex key

### Torque wrench

with pre-set torque

Nr.	System	maximum torque
82099	AF 40	25N/m
82789	AF 50	30N/m

! In order to guarantee function of the quick connectors,  
recommended torque should not be exceeded.

Tools also available separately

# ALUFIX CLASSIC Starter Kits

Fast clamping with ALUFIX

STARTER KIT

**A**

**#83131**

## Screw clamp

with ball joint and foot plate

- max clamping width 25 mm
- extension 100 mm

STARTER KIT

**C**

◆ **#81020**

## Clamping element set

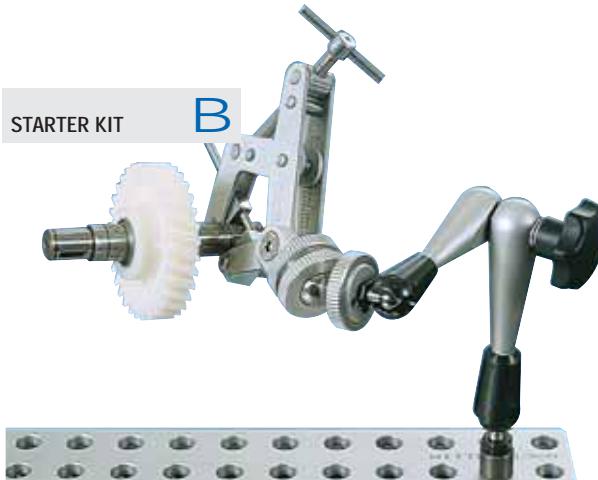

M6, 69 Pcs

Comprising:

- 20 clamps in different shapes and lengths from 45 to 85mm
- 24 threaded rods M6 in 6 lengths from 25 to 150mm
- 4 coupling nuts, 10 knurled nuts and 10 washers

STARTER KIT

**B**

**#83132**

## Screw clamp

with ball joint, swivel arm and screw clamp

- max clamping width 50 mm
- arm length 280 mm (2x140)
- hydraulic central clamping
- workpiece can be fixed in any position

STARTER KIT

**D**

◆ **#83134**

## Hold down spring

and hold down stud with M6 thread

Comprising:

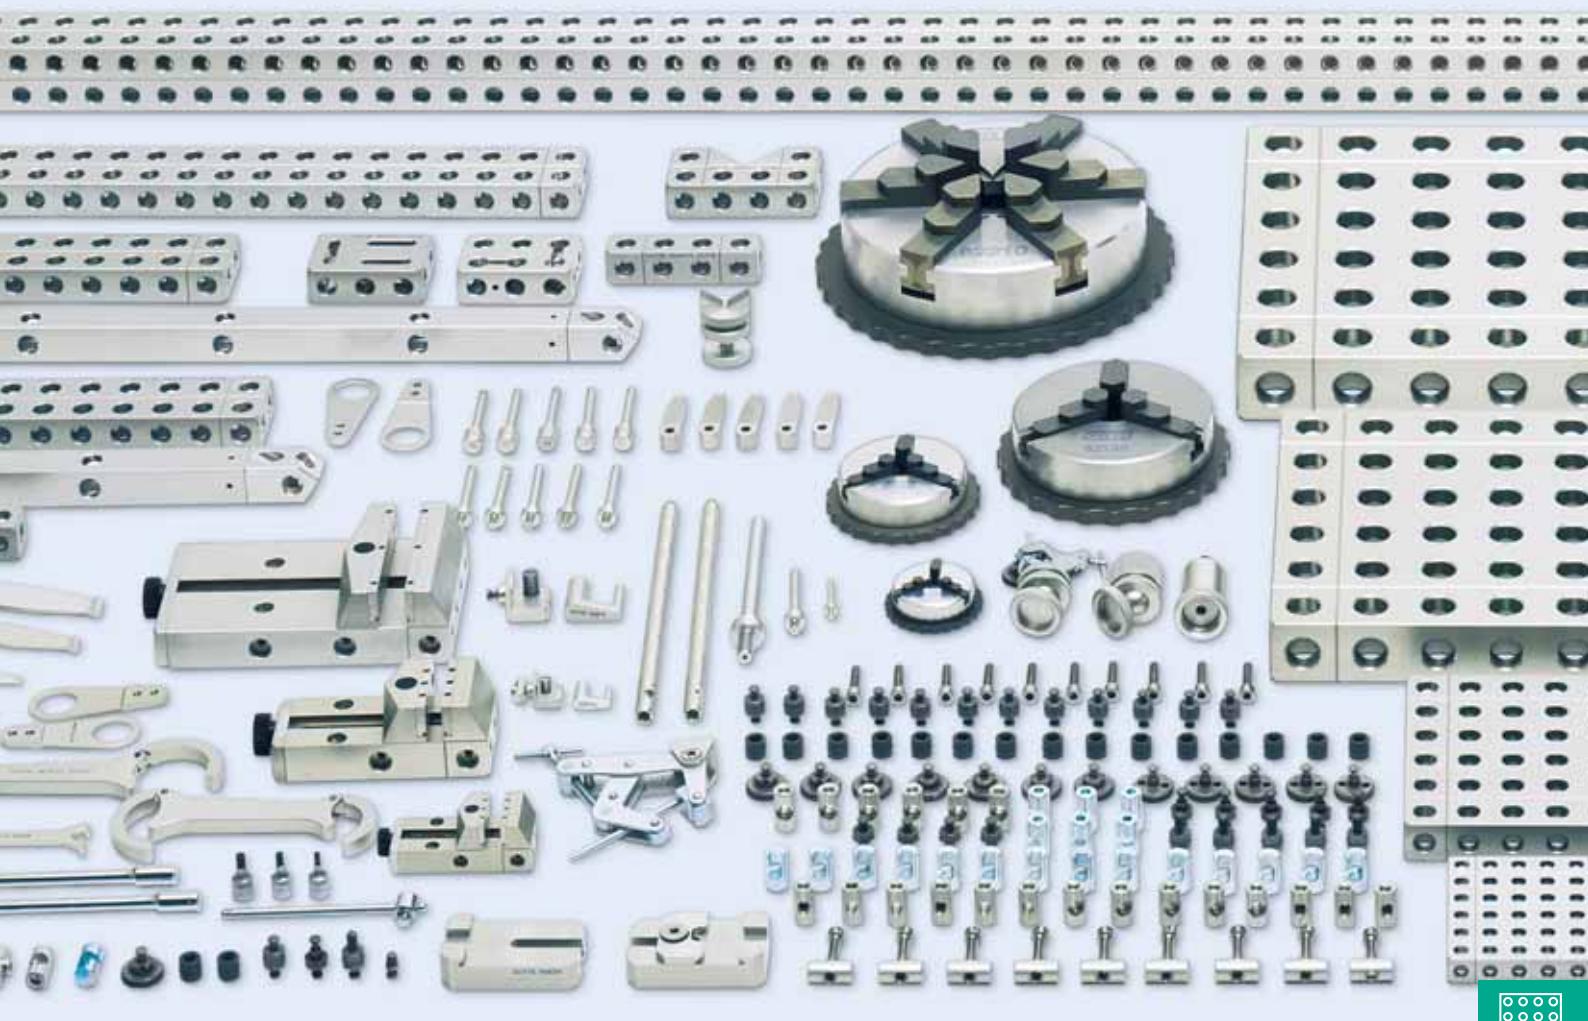

- Hold down spring L=60mm
- Hold down stud L=60mm (other length on request)
- One reducer sleeve each with thread M8, M10 und M12

Workpieces and base plates shown in the pictures demonstrate application and are not included in delivery.

Preference item:  
Articles with green diamond ->  
are available ex stock!

STARTER KIT

E

◆ #83135

**Vise**

with pins, jaw width 50 mm

- high tensile aluminium
- exchangeable jaws
- clamping width 65 mm

STARTER KIT

F

◆ #82080

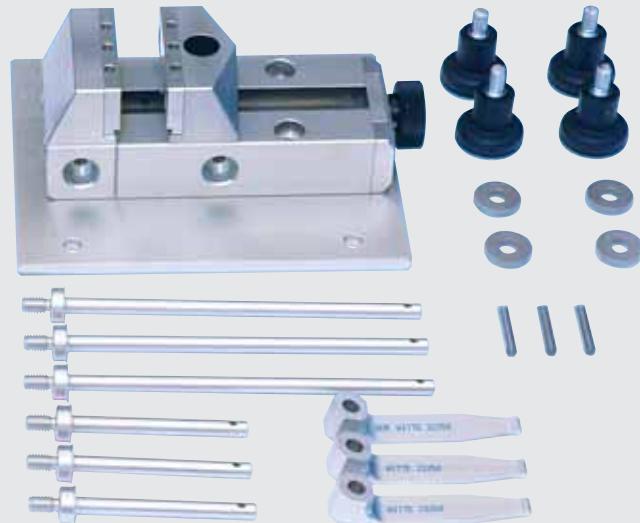

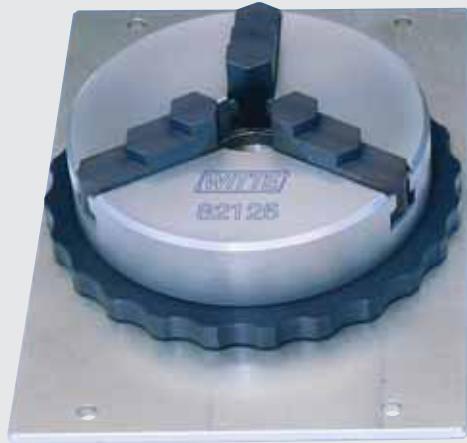

**Keyless chuck**

with reversible jaws, D80

- high tensile aluminium
- centric clamping
- diameter 80mm

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

STARTER KIT

**G**

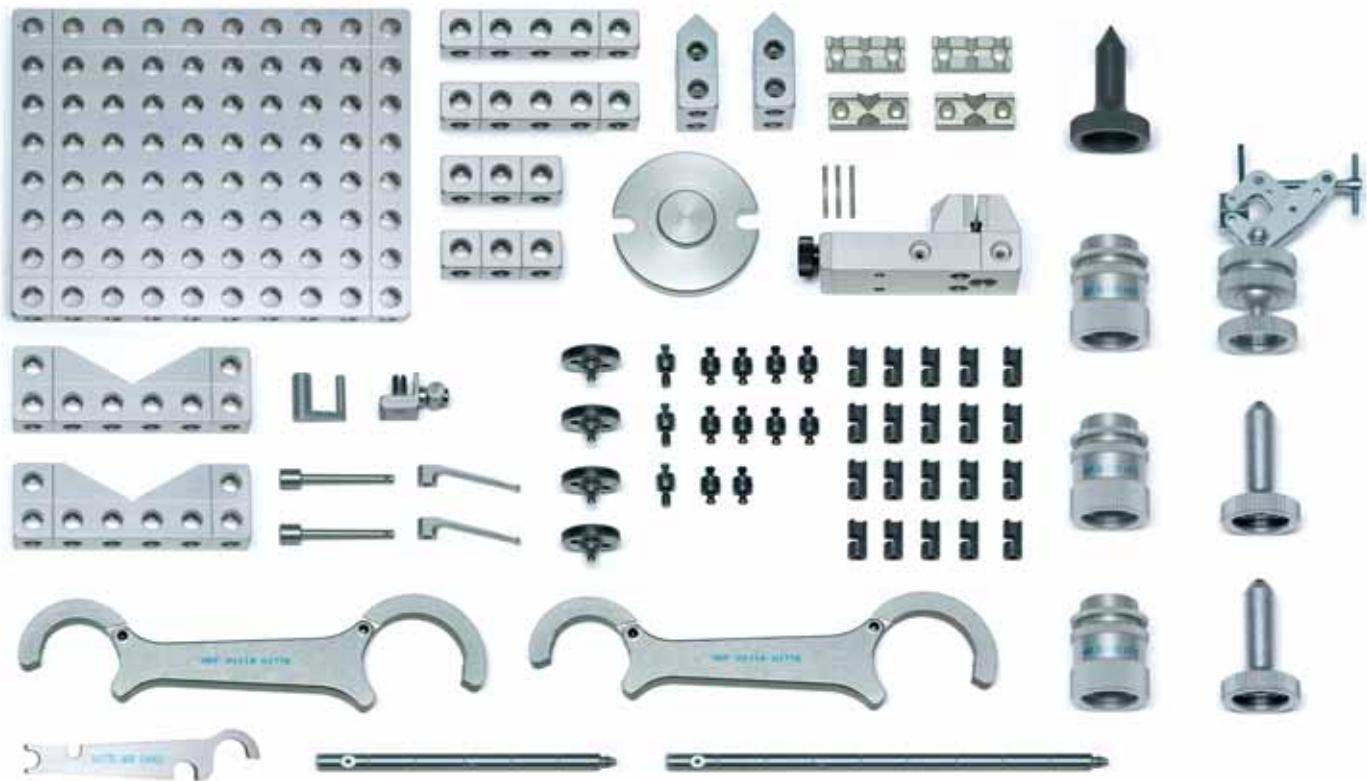

## #96092 Basic Set

Clamp accessory kit for measuring machines  
(23-pcs), 9,8kg

Nr.	Qty.	Name
96106	1	Keyless chuck ø125, 3 jaws
96107	1	Vise 50 AF25
24605	3	Pin for vise AF25
22258	3	Hod down spring
54766	3	Hold down stud AF25
54767	3	Hold down stud AF25
13086	4	Screw with knurled grip
21286	4	Washer ø 6,4
96315	1	Storage box with inlay

Keyless chuck and vise mounted on aluminium plate

## #90271 Basic Set

Alufix 16, medium (75-pcs), 2,3kg

Nr.	Qty.	Name
21573	1	Base plate 16x96x160
21586	2	Bar 16x16x80
21584	2	Bar 16x16x48
22173	2	V Block 90°
82672	1	Quick connector set (36-pcs)
81492	1	Tools (4-pcs)
82139	3	Screw-jack h38-50
23252	1	Bolt disk with stud
21670	1	Universal plate

Nr.	Qty.	Name
21646	1	Center, long
80584	2	Center with ball
21988	2	V piece 120°
80925	1	Screw clamp w ball joint
80742	1	Winder
22274	1	Deflector
20244	2	Hold down spring
20338	2	Hold down stud
81790	1	Vise set with flat and V jaws (11-pcs)

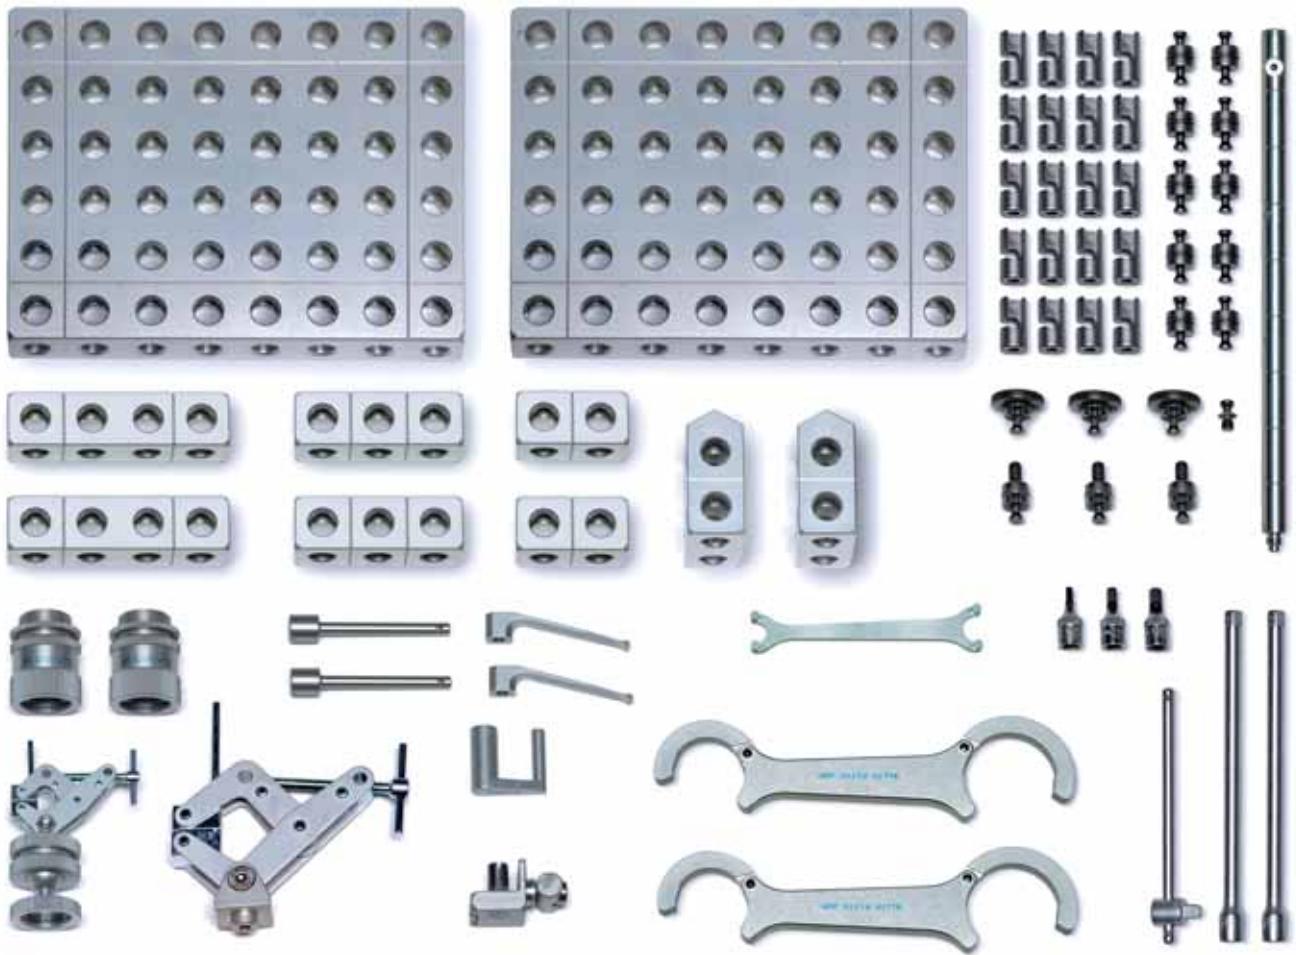

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

## ALUFIXCOLOR

All Alufix basic sets are also available anodized black for use with tactile measuring systems.  
Simply add -1 to the set number.

Exceptions are hard-anodized items like centres or connection elements in steel. These components retain their original colour unless specifically required and requested.

## #90274 Basic Set 1

Alufix 25 (67-pcs), 4,5kg

Nr.	Qty.	Name
21352	2	Base plate 25x150x200
21373	2	Bar 25x25x50
21374	2	Bar 25x25x75
21375	2	Bar 25x25x100
22256	2	Delta block 120° Form 3
82673	1	Quick connector set (36 pcs)
21500	1	Bolt, shortened for thread
81493	1	Tools (10 pcs)

Nr.	Qty.	Name
82139	2	Screw-jack h38-50
80925	1	Screw clamp with ball joint
80924	1	Screw clamp with joint
22258	2	Hold down spring
22260	2	Hold down stud
80743	1	Winder
22275	1	Deflector

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

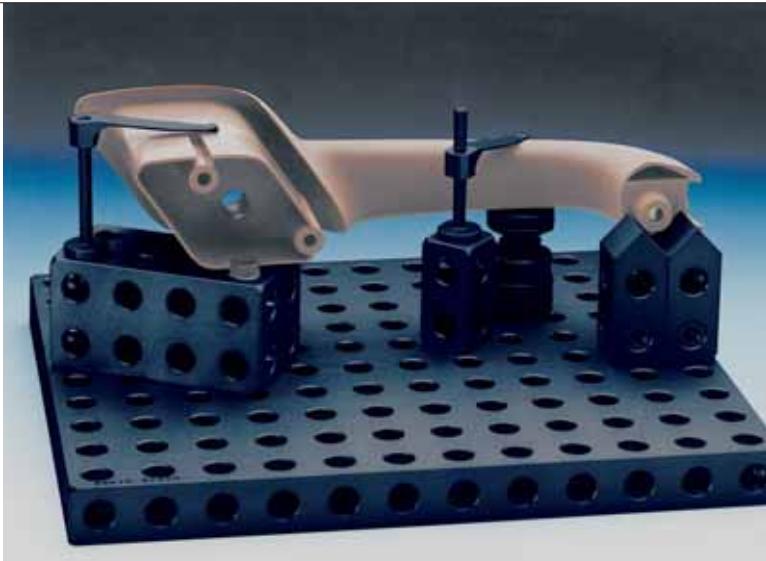

## #90275 Basic Set 2

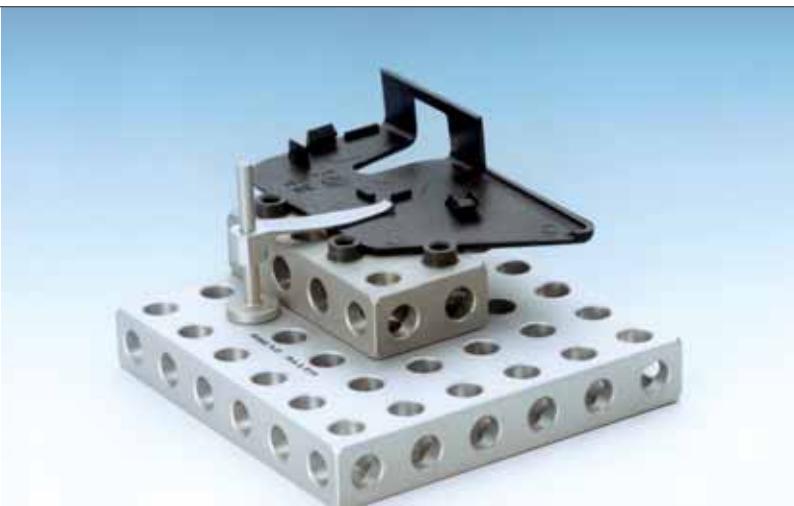

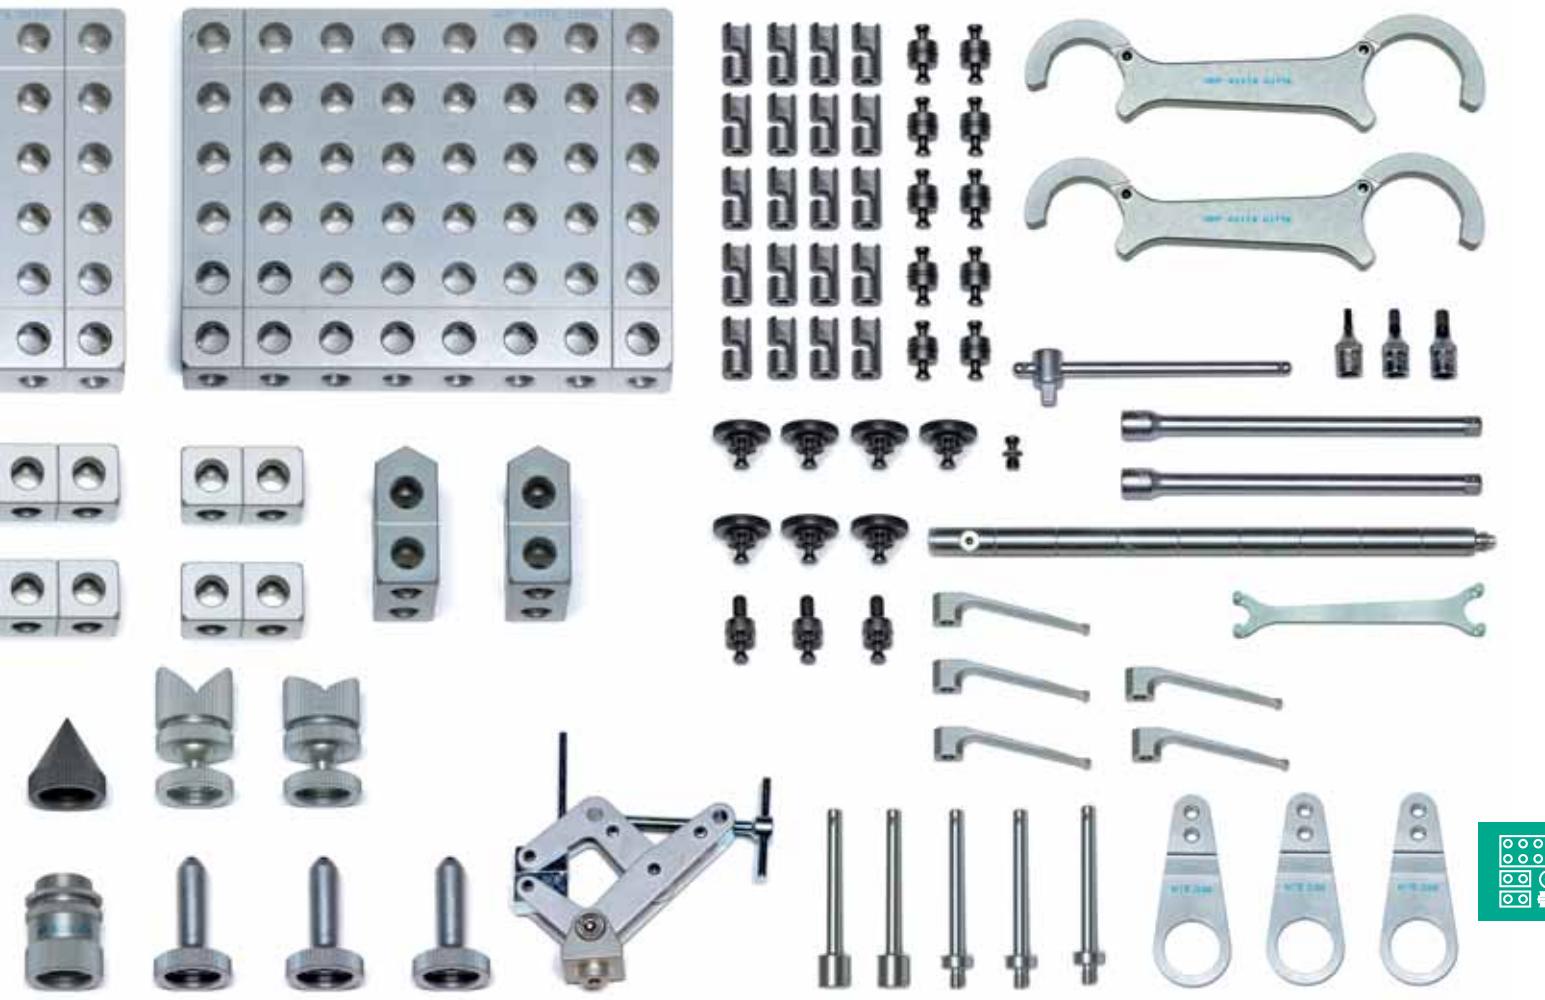

Alufix 25 (104-pcs), 5,9 kg

Nr.	Qty.	Name
21352	2	Base plate 25x150x200
21373	2	Bar 25x25x50
21374	2	Bar 25x25x75
21375	2	Bar 25x25x100
21376	2	Bar 25x25x125
22256	2	Delta block 120° Form 3
82673	1	Quick connector set (36 pcs)
21500	1	Bolt, shortened for thread
81493	1	Tools (10 pcs)
82139	4	Screw-jack h38-50
23239	4	Bolt disk with stud
80924	1	Screw clamp with joint
21644	2	Center
21646	2	Center
80584	3	Center with ball
80733	1	V piece 120° with ball joint
80725	1	V piece 90° with ball joint
80925	1	Screw clamp with ball joint
81791	1	Vise Set 50mm (11 pcs)
22258	5	Hold down spring
22260	2	Hold down stud
22263	3	Hold down stud
22268	3	Traverse holder with heel
80743	1	Winder
22275	1	Deflector

Handle set up using standard Alufix Classic elements, anodized black

Workpiece set up on  
screw-jacks and secured  
with hold down springs

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

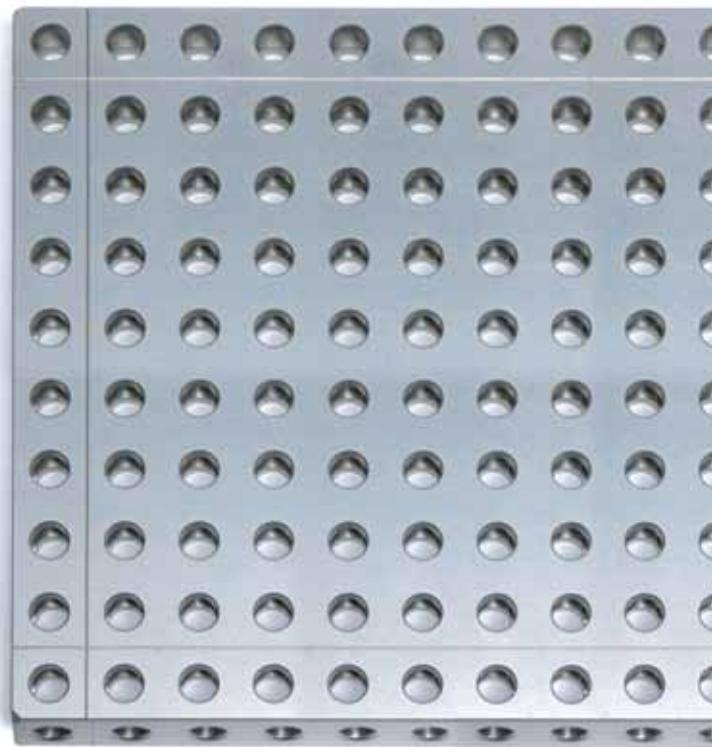

## #90276 Basic Set 3

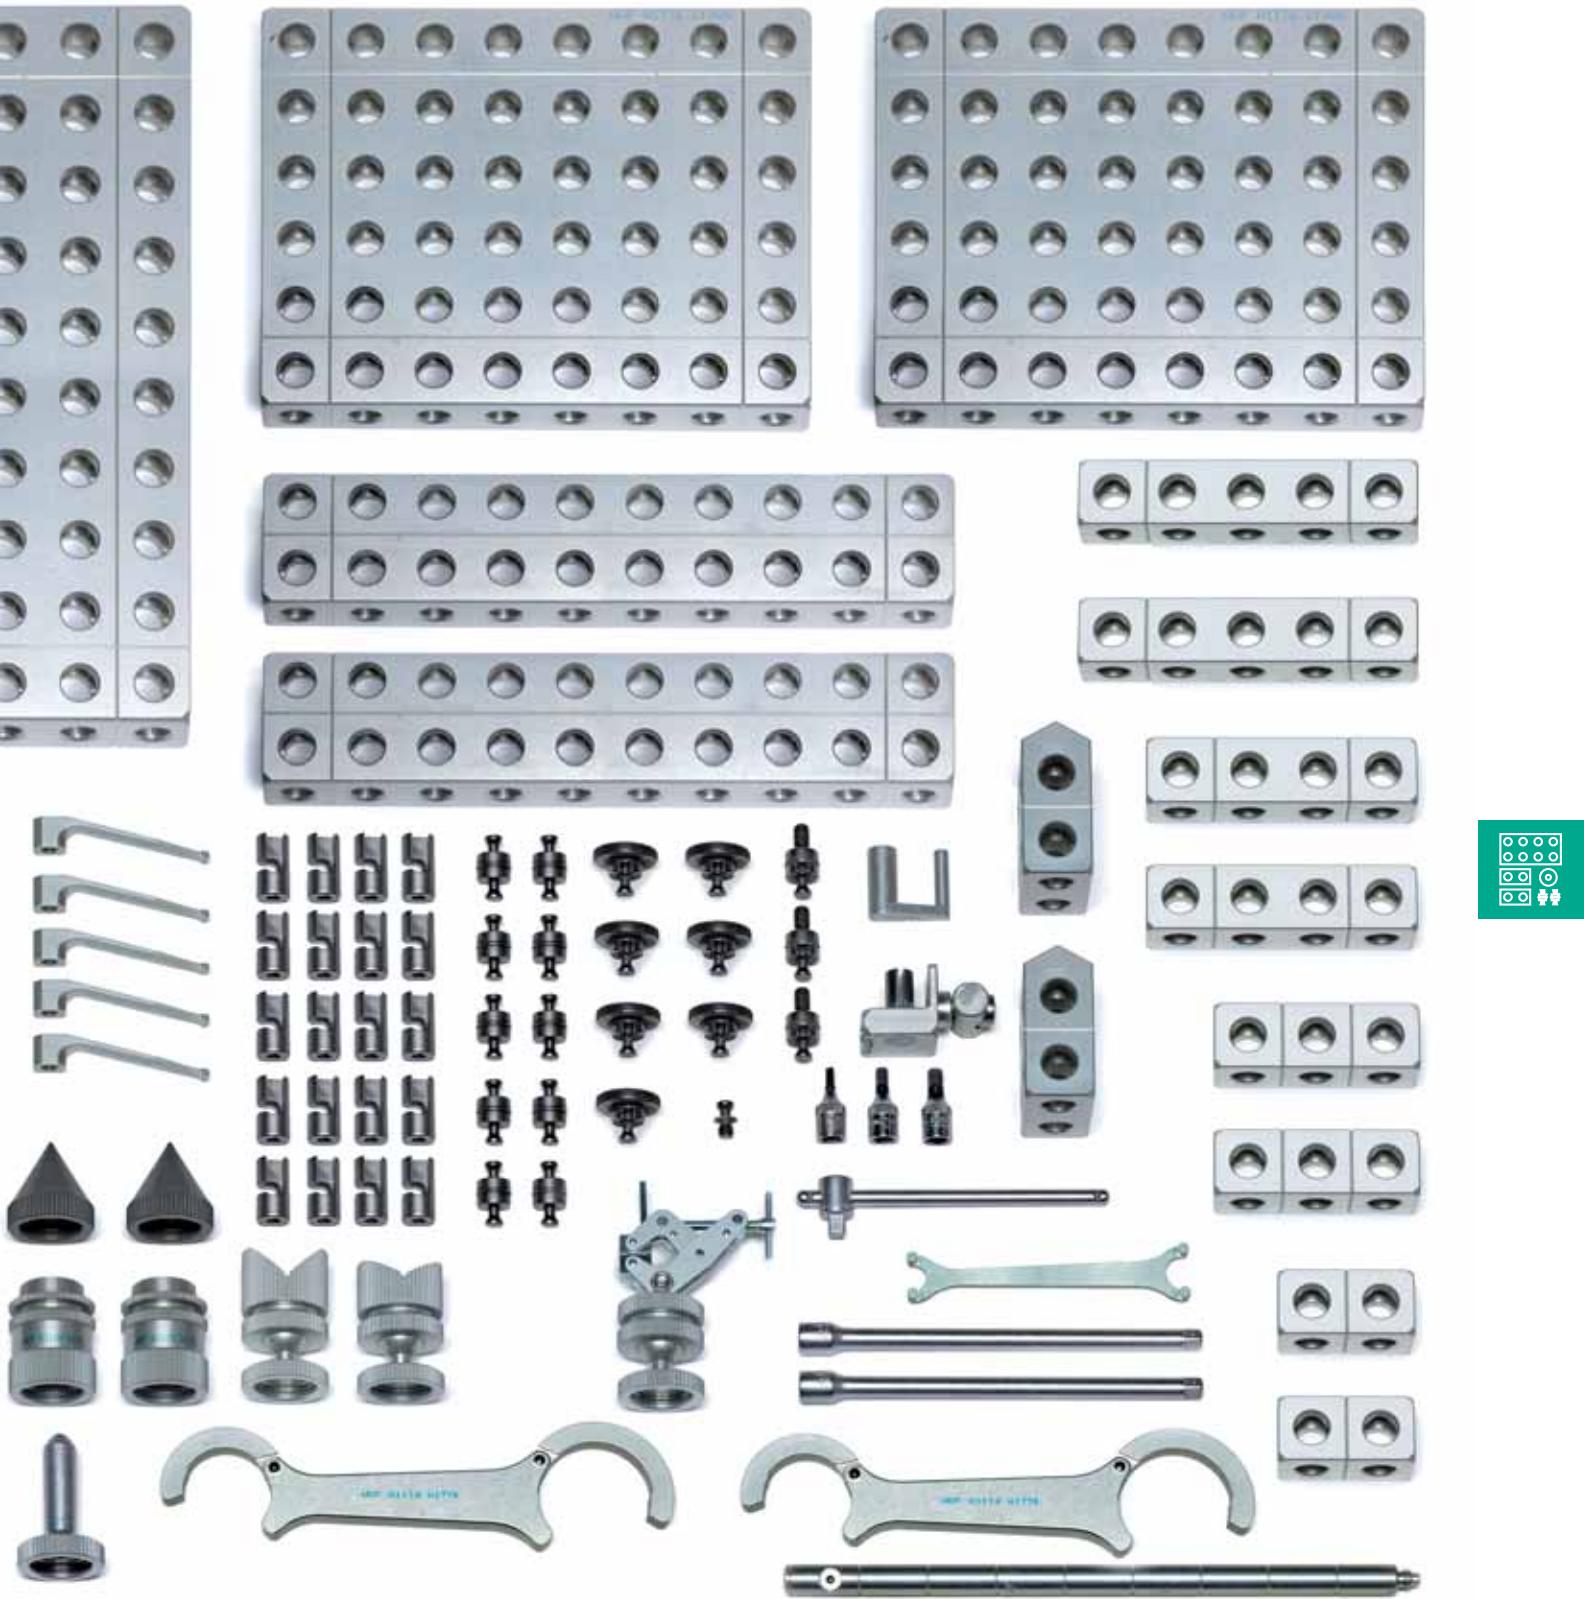

Alufix 25 (106-pcs), 12,6kg

Nr.	Qty.	Name
21360	1	Base plate 25x250x300
22885	2	Base plate 25x50x250
21352	2	Base plate 25x150x200
21373	2	Bar 25x25x50
21374	2	Bar 25x25x75
21375	2	Bar 25x25x100
21376	2	Bar 25x25x125
22256	2	Delta block 120° Form 3
82673	1	Quick connector set (36 pcs)
21500	1	Bolt, shortened for thread
81493	1	Tools (10 pcs)
82139	4	Screw-jack h38-50
23239	1	Bolt disk
80925	2	Screw clamp with ball joint
21644	2	Center, short
21646	2	Center, long
80733	1	V piece 120° with ball joint
80725	1	V piece 90° with ball joint
81791	1	Vise Set 50mm (11 pcs)
22258	5	Hold down spring
22260	2	Hold down stud
22263	3	Hold down stud
22268	3	Traverse holder with heel
80743	1	Winder
22275	1	Deflector
80924	1	Screw clamp with joint
80584	3	Center with Ball D6/M24
12584	1	Storage case

Aluminium case #12584,  
without inlays, version may be different  
to case shown, included in supply free of charge

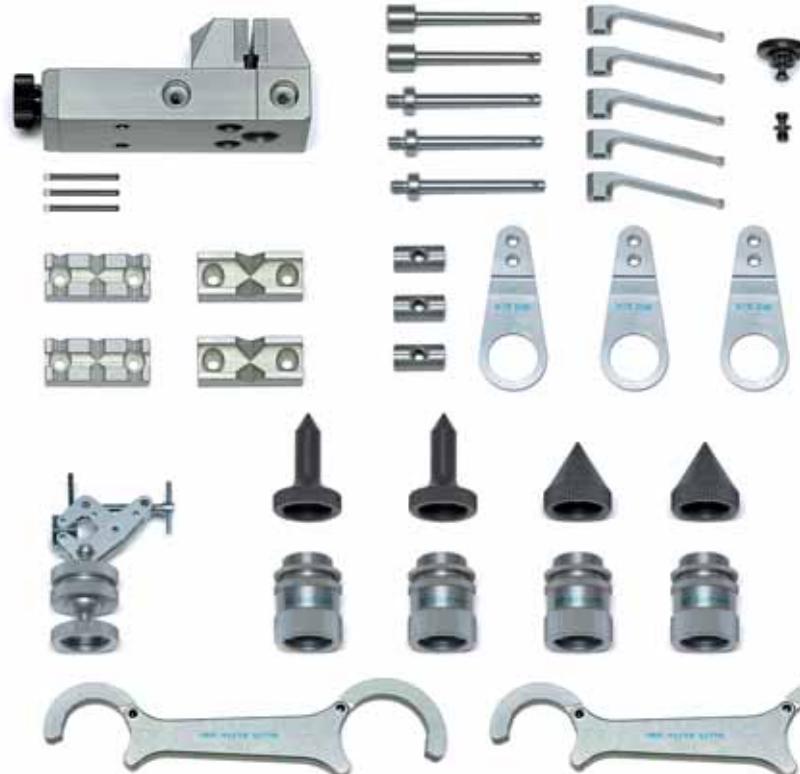

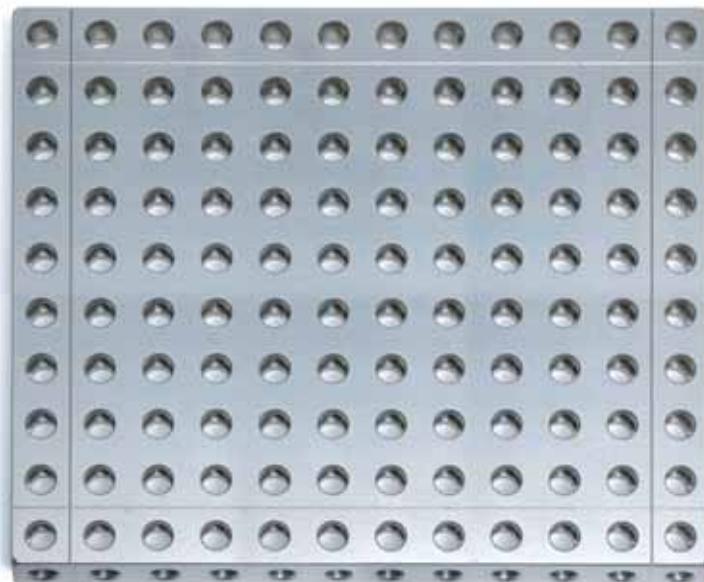

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

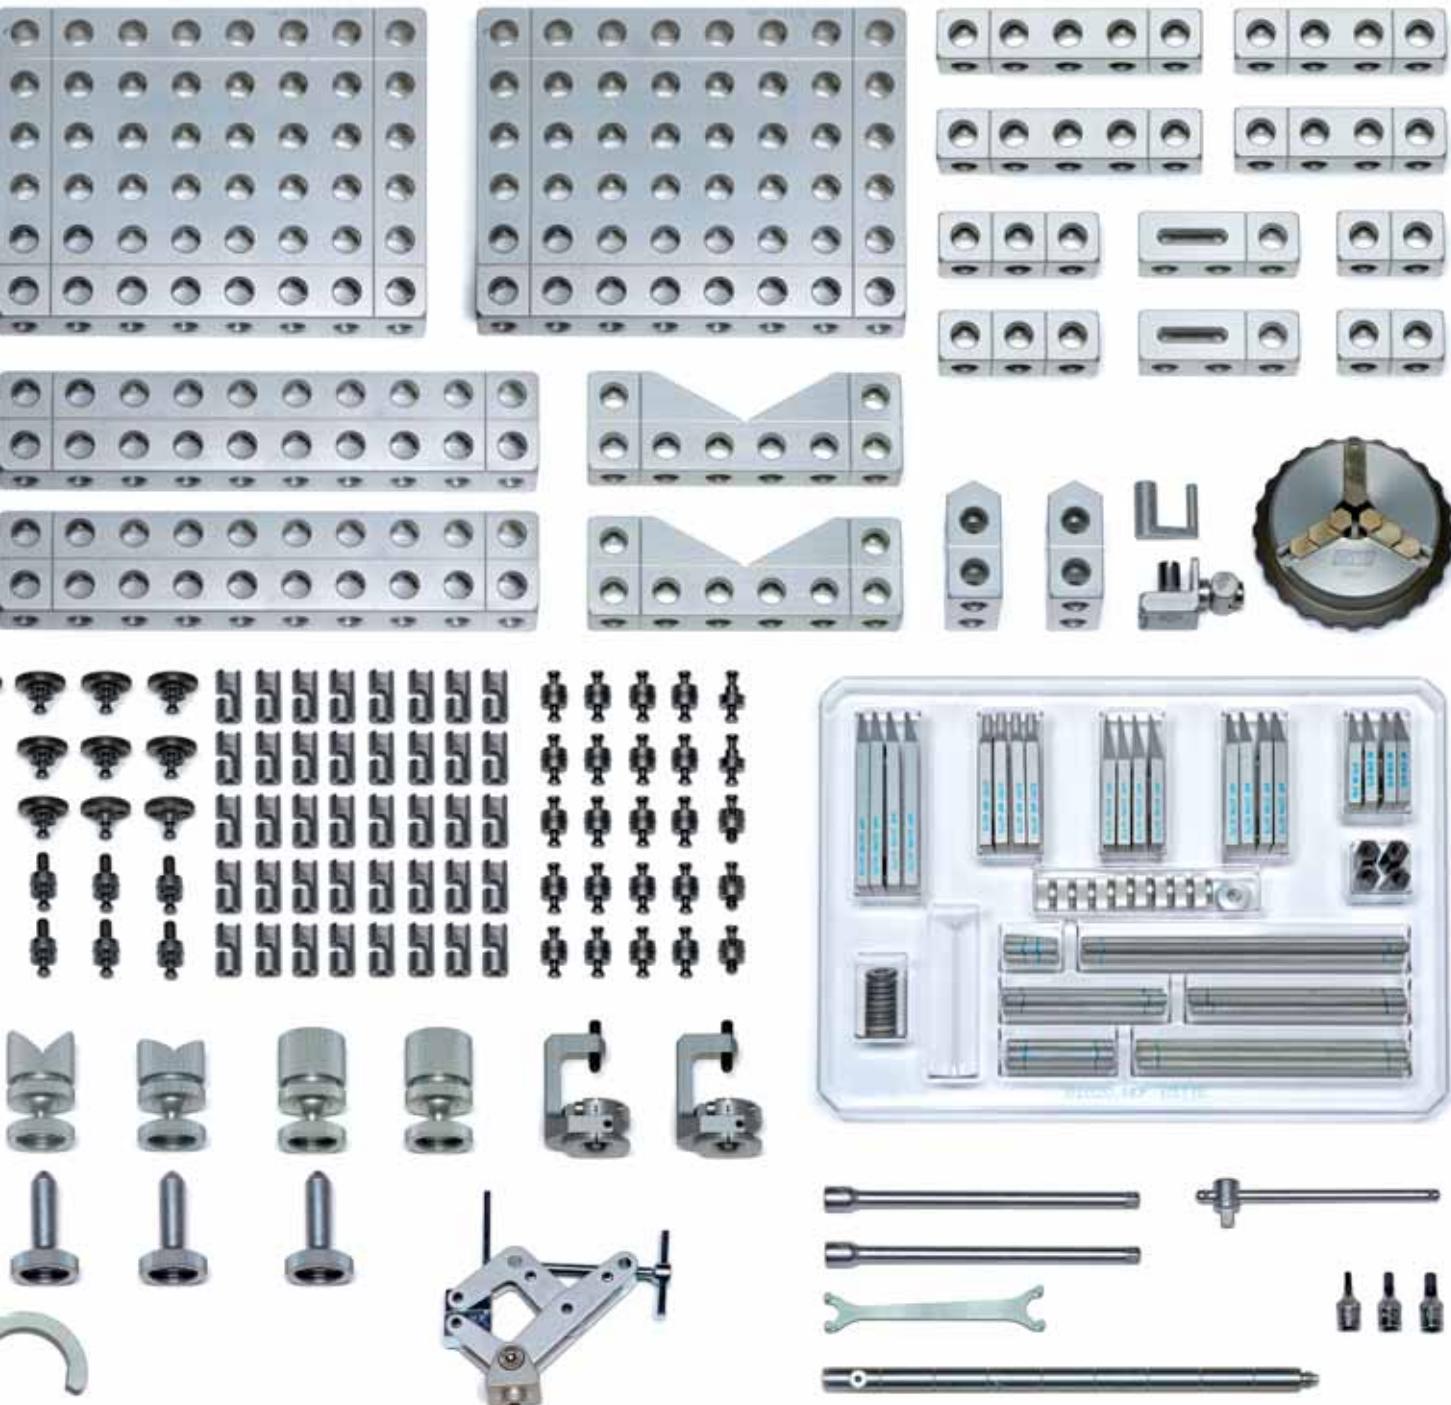

## #90277 Basic Set 4

Alufix 25 (229-pcs), 15,5kg

Nr.	Qty.	Name
21360	1	Base plate 25x250x300
21352	2	Base plate 25x150x200
22885	2	Base plate 25x50x250
21376	2	Bar 25x25x125
21375	2	Bar 25x25x100
21374	2	Bar 25x25x75
21373	2	Bar 25x25x50
23233	2	Bar 1D
21987	2	V block 120°
22256	2	Delta block 120° Form 3
82673	2	Quick connector set (36-pcs)
21500	1	Bolt, shortened for thread
25654	3	Bolt f. grid plate + keyless chuck
23228	2	Twin bolt for bar 1D/2D
23241	2	Bolt disk
80531	3	Crosspiece nut
81493	1	Tools (10-pcs)
82139	4	Screw-jack h38-50
23239	1	Bolt disk
21644	2	Center, short
21646	2	Center, long
80584	3	Center with ball
80941	2	Magnetic holder with ball joint
80733	1	V piece 120° with ball joint
80725	1	V piece 90° with ball joint
81111	2	C clamp adjustable
80925	1	Screw clamp with ball joint
81791	1	Vise Set 50mm (11-pcs)
82080	1	3 jaw keyless chuck compl. ø80
22258	5	Hold down spring
22260	2	Hold down stud
22263	3	Hold down stud
22268	3	Traverse holder with heel
80743	1	Winder
22275	1	Deflector
80924	1	Screw clamp with joint
81020	1	Clamp Set 9 M6S (69-pcs)
12584	1	Storage case

Aluminium case #12584,  
without inlays, version may be different  
to case shown, included in supply free of charge

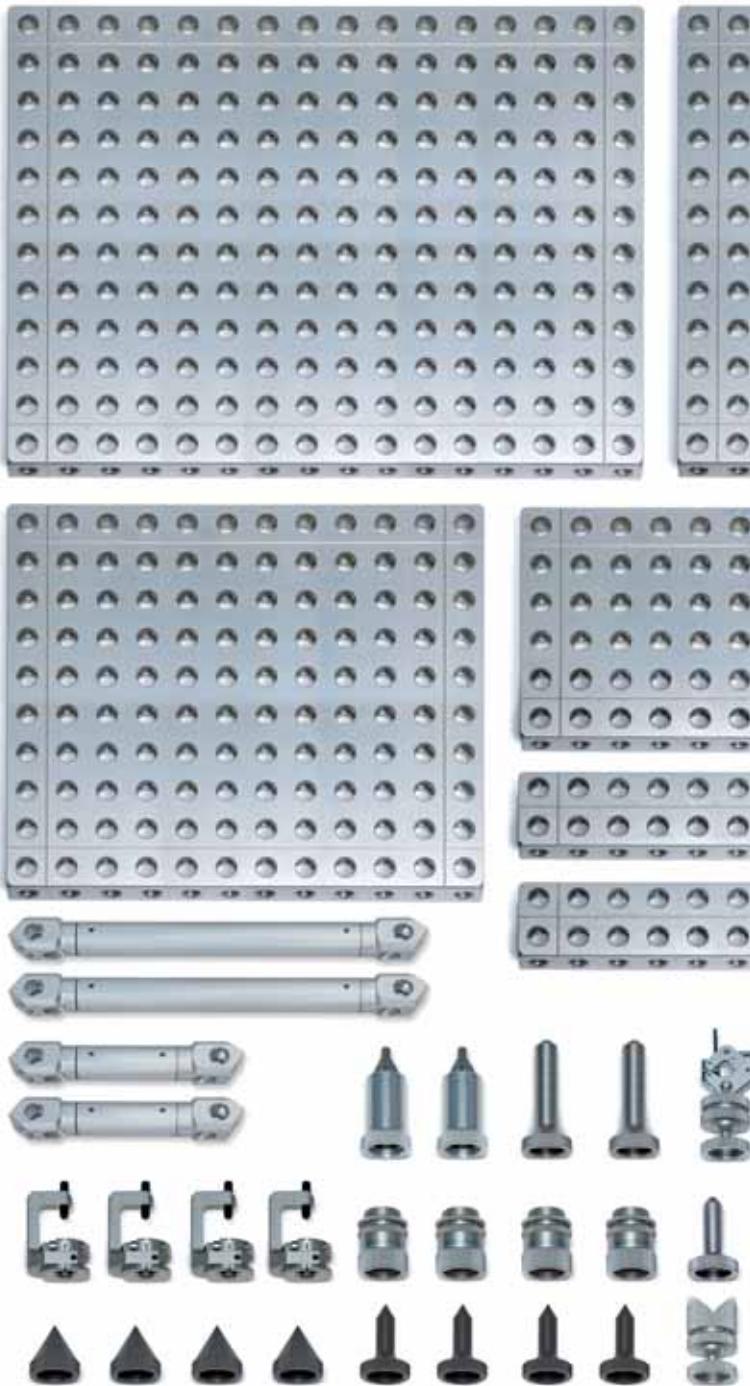

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

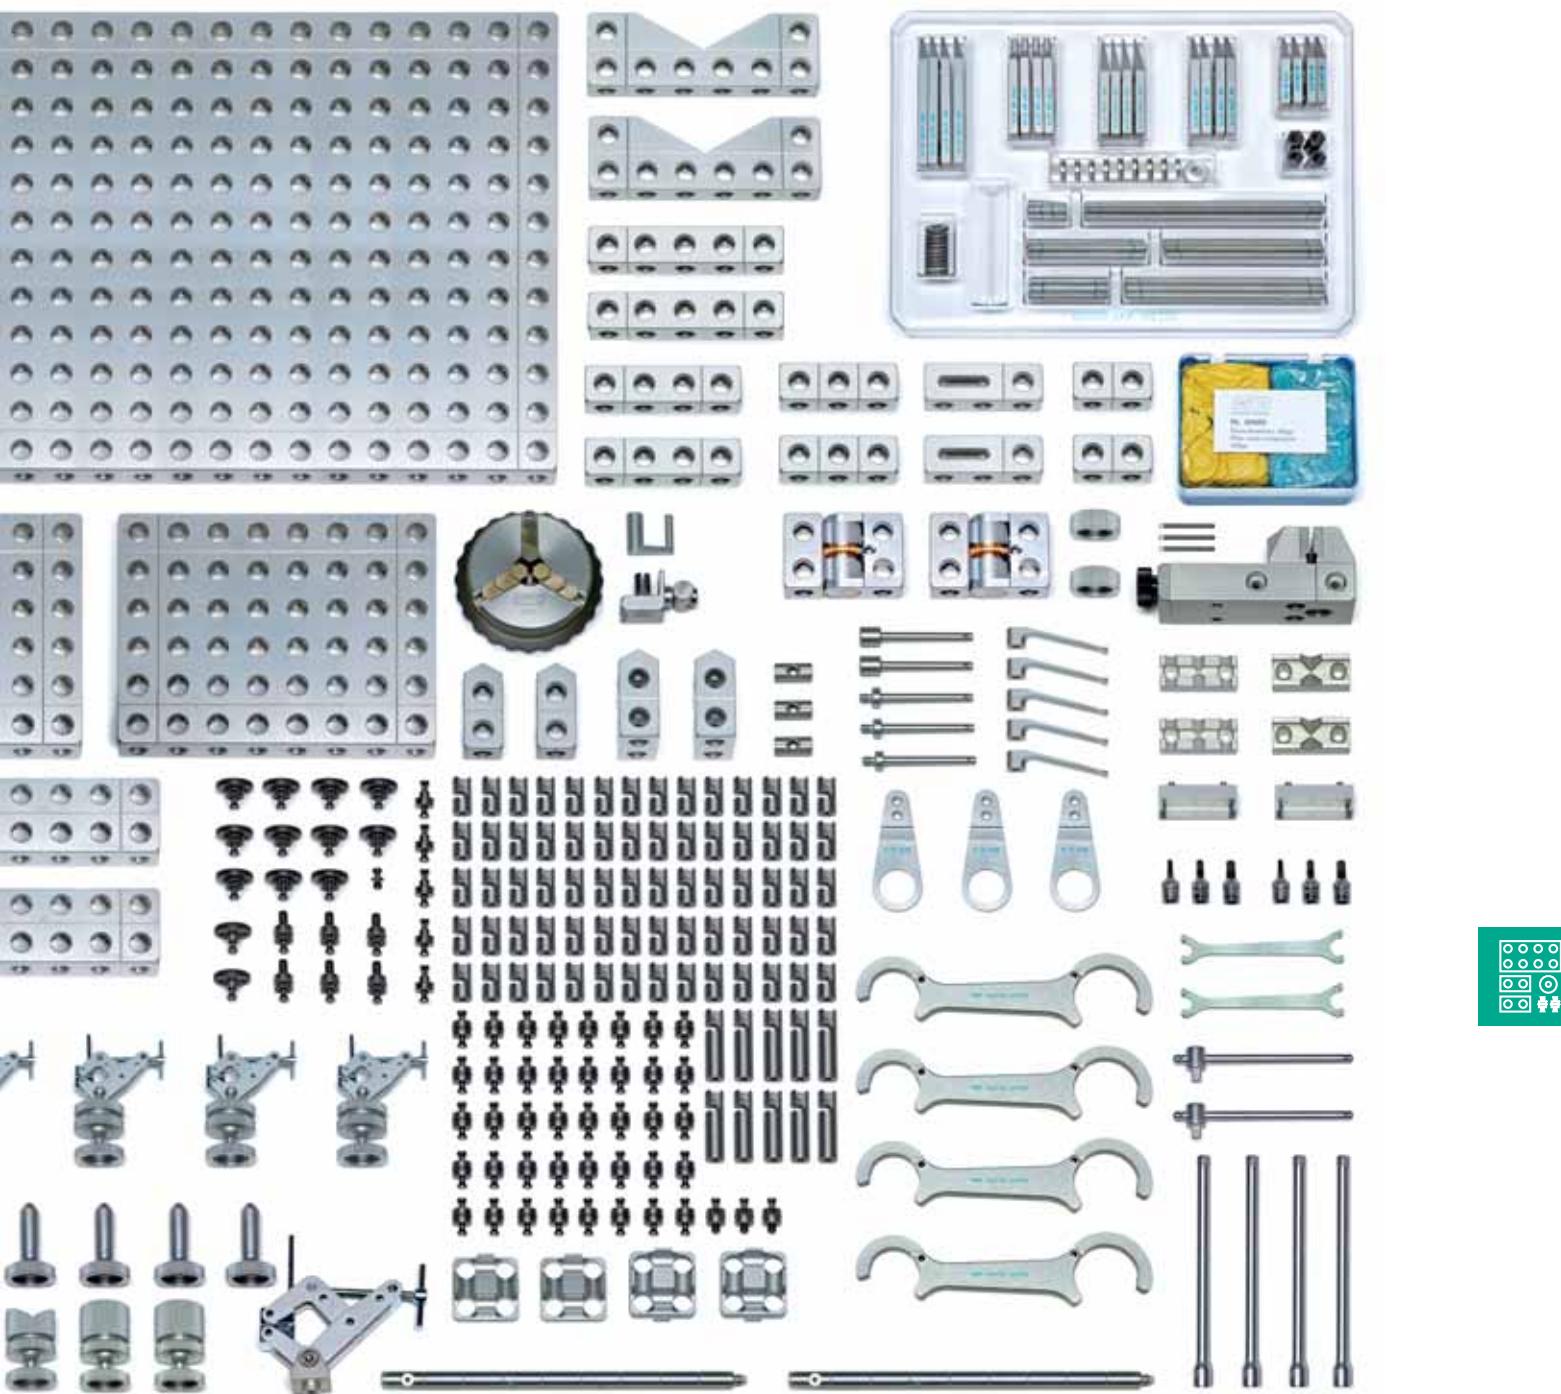

## #90278 Basic Set 5

Alufix 25 (345-pcs), 49,8kg

Nr.	Qty.	Name
21361	2	Base plate 25x300x400
21360	1	Base plate 25x250x300
21352	2	Base plate 25x150x200
22885	2	Base plate 25x50x250
21376	2	Bar 25x25x125
21375	2	Bar 25x25x100
21374	2	Bar 25x25x75
21373	2	Bar 25x25x50
81443	2	Strut 25x25x125
81444	2	Strut 25x25x250
23233	2	Bar 1D
81028	2	Double knuckle
21987	2	V block 120°
22256	2	Delta block 120° Form 3
22253	2	Delta block 120° Form 2
81285	1	Quick connector set (70-pcs)
82673	2	Quick connector set (36-pcs)
80531	3	Crosspiece nut
23228	2	Bolt for bar 1D/2D
25654	3	Bolt f. grid plate + keyless chuck
21500	1	Bolt, shortened for thread
81493	2	Tools (10-pcs)
82139	4	Screw-jack h38-50
23239	1	Bolt disk
23241	2	Bolt disk
21644	4	Center, short
21646	4	Center, long
80584	5	Center with ball
80733	1	V piece 120° with ball joint
80725	1	V piece 90° with ball joint
80661	2	True line stud
80941	2	Magnetic holder with ball joint
81212	2	Autocenter
81111	4	C clamp adjustable
80925	4	Screw clamp with ball joint
22005	2	Moulding cap
81791	1	Vise Set 50mm (11 pcs)
80685	1	Compound resin 400g
81832	2	Forming jaw with bushes (3 pcs)
82080	1	3 jaw keyless chuck compl. ø80
22258	5	Hold down spring
22260	2	Hold down stud

Nr.	Qty.	Name
22263	3	Hold down stud
22268	3	Traverse holder for stud
80743	1	Winder
22275	1	Deflector

Nr.	Qty.	Name
80924	1	Screw clamp with joint
80604	2	Base for screw clamp
81020	1	Clamp Set 9 M6S (69 pcs)
12584	1	Storage case

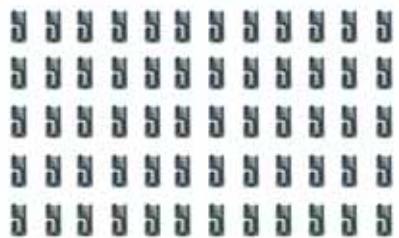

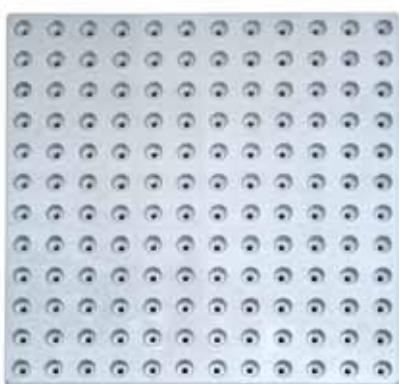

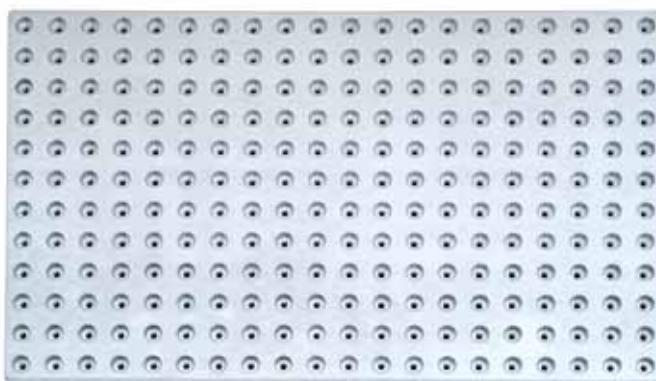

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Aluminium case #12584, without inlays, version may be different to case shown, included in supply free of charge

## #98156 Basic Set 6

Alufix 25 (332-pcs), 49,8kg

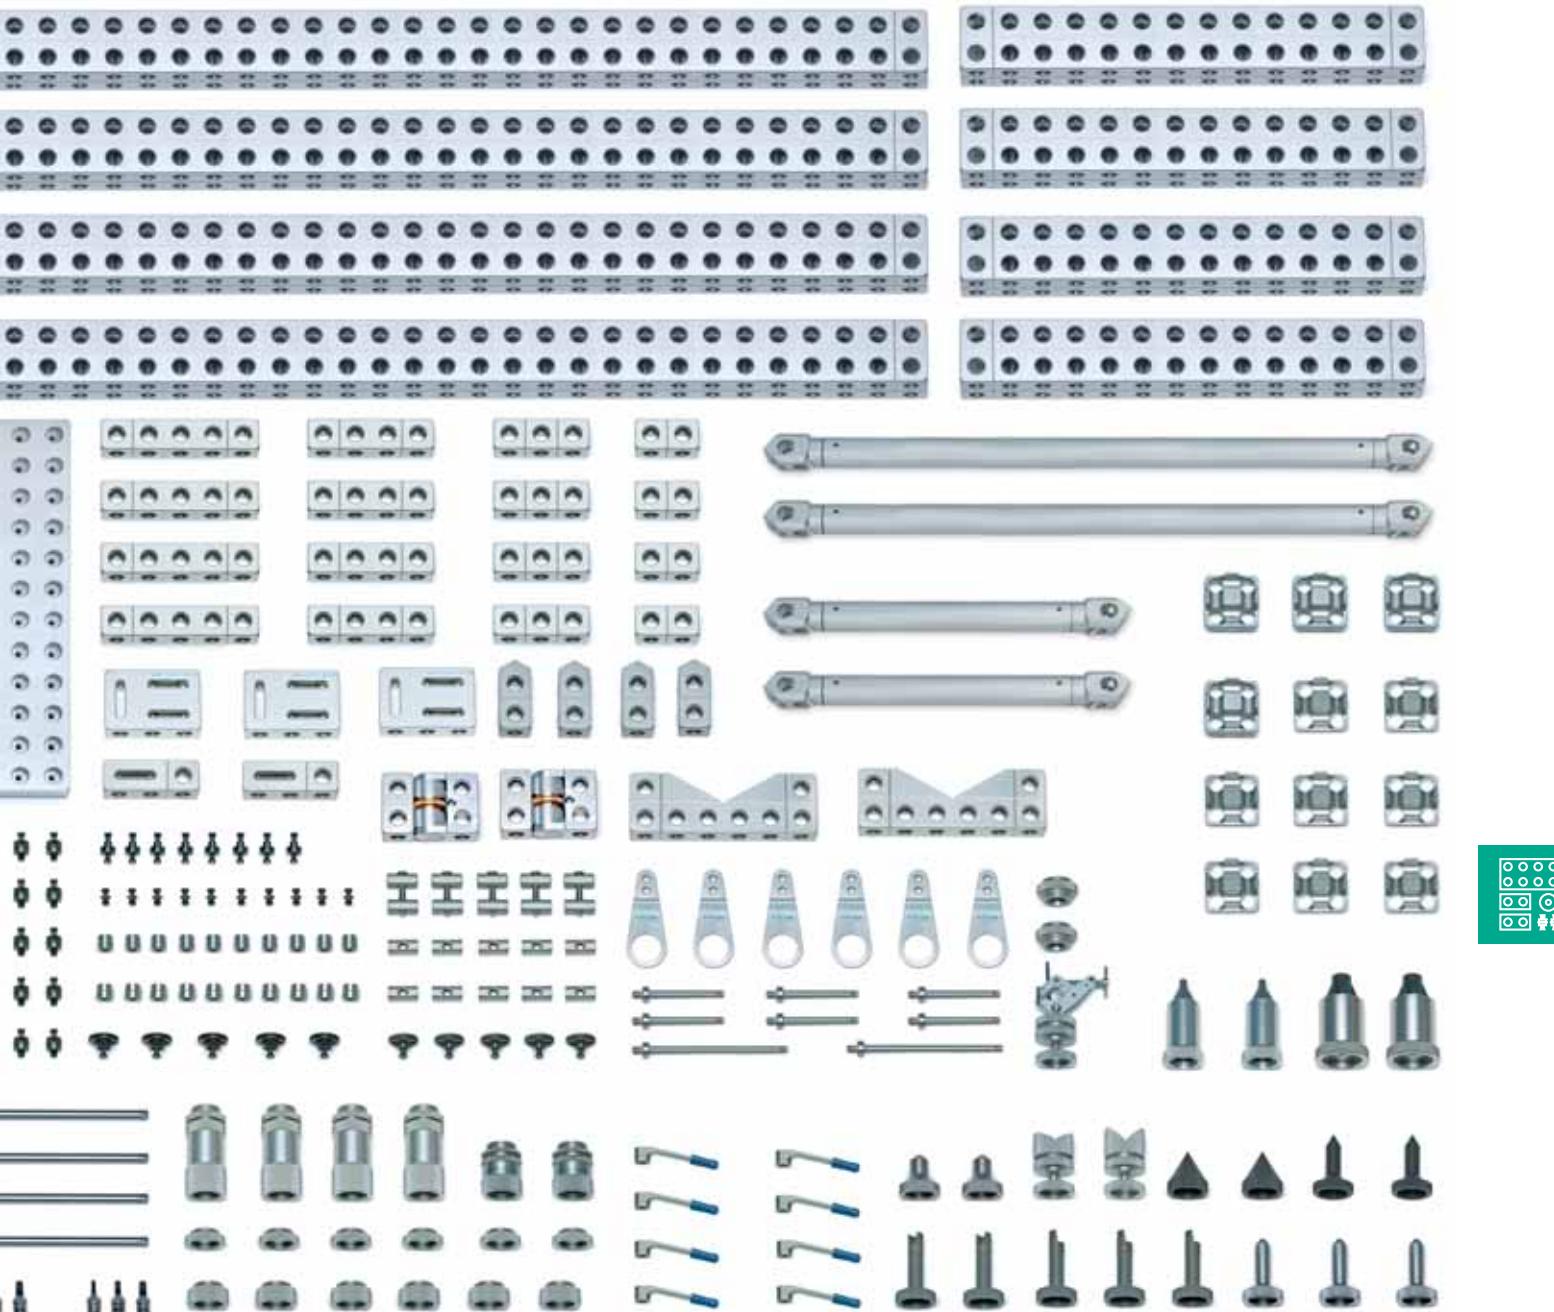

Nr.	Qty.	Name
33502	1	Base plate 25x300x500 AF25
56492	2	Base plate 25x300x300 AF25
21373	4	Bar 25x25x50 AF25
21374	4	Bar 25x25x75 AF25

81212	3	Autocenter
82252	3	Autocenter
81112	2	Stop and support 180°

**ALUFIX** CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Nr.	Qty.	Name
81113	2	Stop and support 90°
81111	3	C clamp adjustable
80925	3	Screw clamp with ball joint
22644	3	Spacer
22647	2	Cross over male/male
22258	10	Hold down spring
22260	5	Hold down stud
22263	5	Hold down stud
22268	5	Traverse holder for stud
80743	2	Winder

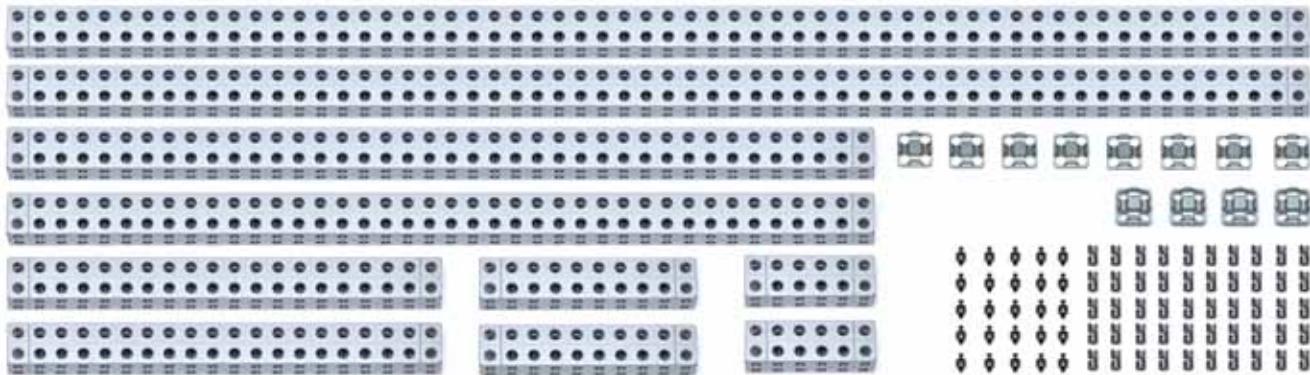

Nr.	Qty.	Name
22275	2	Deflector
80924	1	Screw clamp with joint
80604	2	Base for toggle clamp

**i Supply includes:**  
2 cross roller slides #82462  
2 roller slides #82172  
(not shown)

**i Recommendation:**  
For storage of elements workstation #282727 is available, page 151

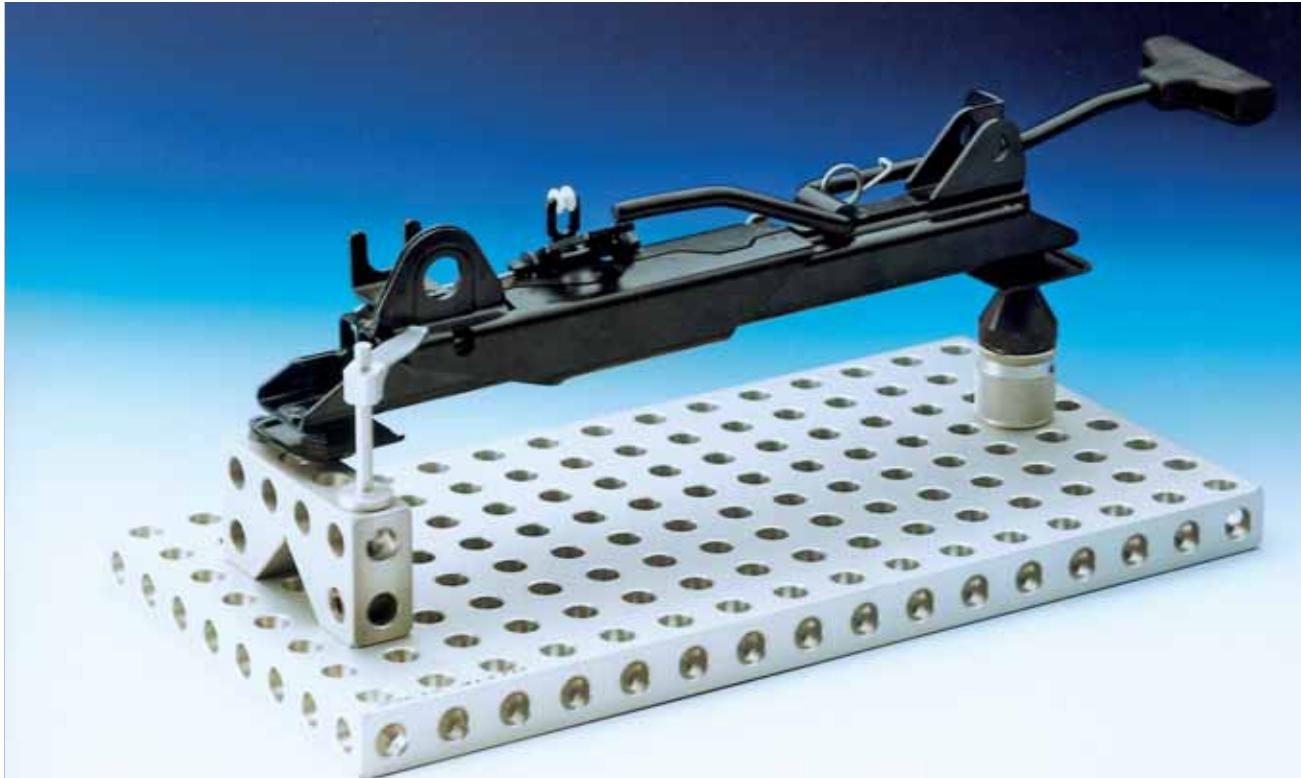

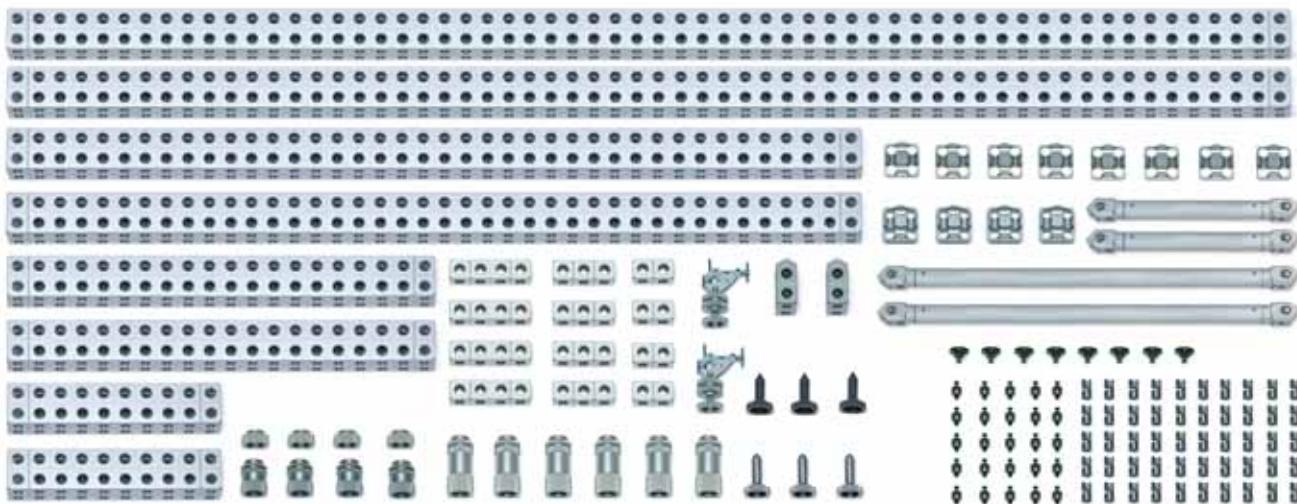

## #90283 Extension Set 1

Alufix 25 Light (97-pcs), 17 kg

Nr.	Qty.	Name
20426	2	Bar Light 50x50x150
22949	2	Bar Light 50x50x250
22950	2	Bar Light 50x50x500
22951	2	Bar Light 50x50x1000
22952	2	Bar Light 50x50x1500
23330	4	Coupling, double
23325	8	Coupling, single
23240	50	Lock
23223	25	Twin bolt

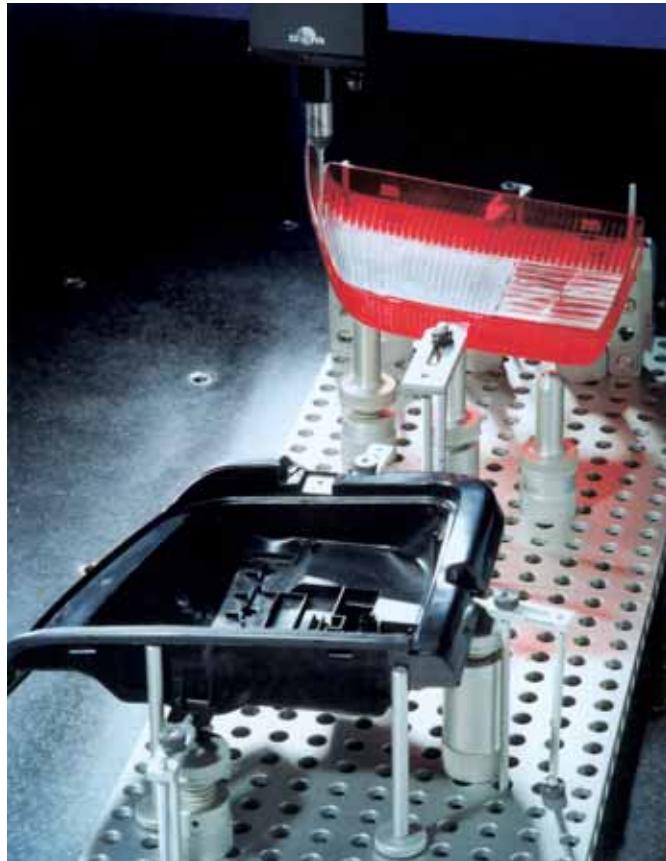

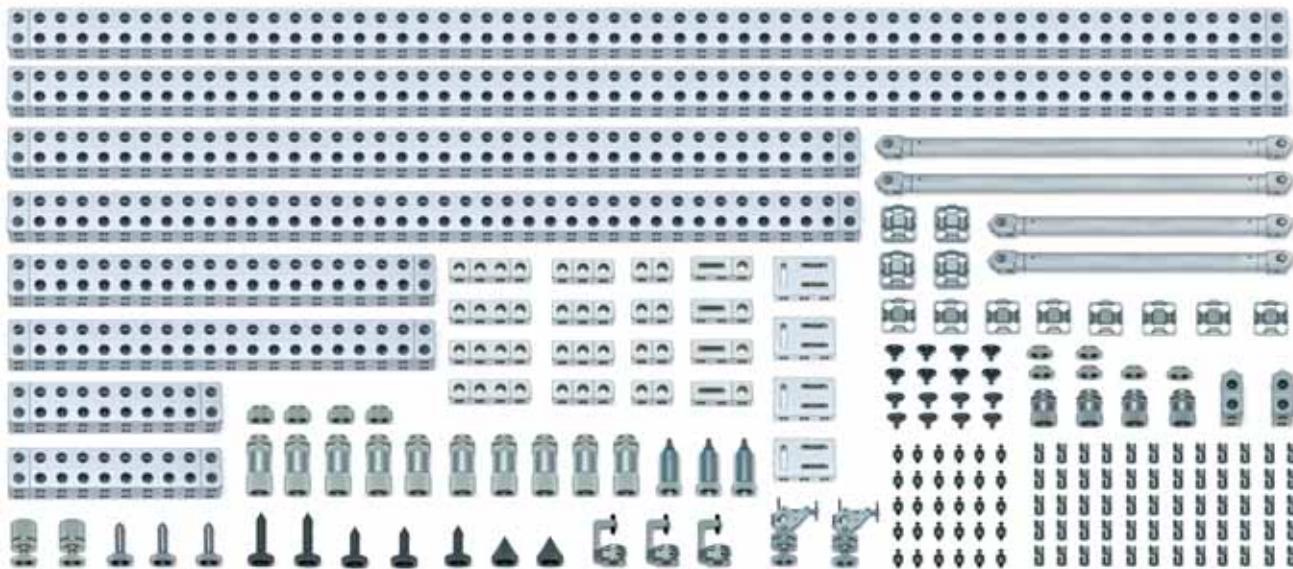

## #90284 Extension Set 2

Alufix 25 Light (143-pcs), 21 kg

Nr.	Qty.	Name
21373	4	Bar 25x25x50
21374	4	Bar 25x25x75
21375	4	Bar 25x25x100
22949	2	Bar Light 50x50x250
22950	2	Bar Light 50x50x500
22951	2	Bar Light 50x50x1000
22952	2	Bar Light 50x50x1500
23330	4	Coupling, double
23325	8	Coupling, single
81444	2	Strut 25x25x250
81327	2	Strut 25x25x500
22256	2	Delta block 120° Form 3
23240	50	Lock
23223	25	Twin bolt
82139	4	Screw-jack h38-50
82033	6	Screw-jack h70-105
23286	4	Screw-jack extension 12mm
23239	8	Bolt disk
21646	3	Center
80584	3	Center with ball
80925	2	Screw clamp with ball joint

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

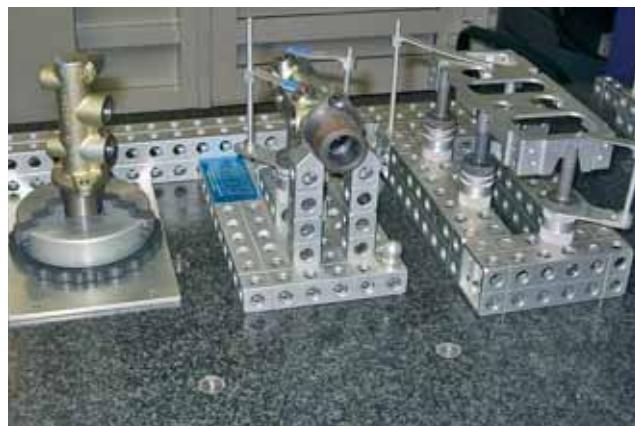

## #90285 Extension Set 3

Alufix 25 Light (209-pcs), 24,5kg

Nr.	Qty.	Name
21373	4	Bar 25x25x50
21374	4	Bar 25x25x75
21375	4	Bar 25x25x100
22949	2	Bar Light 50x50x250
22950	2	Bar Light 50x50x500
22951	2	Bar Light 50x50x1000
22952	2	Bar Light 50x50x1500
23330	4	Coupling, double
23325	8	Coupling, single
23233	4	Bar 1D
23232	4	Base plate 2D
81028	2	Double knuckle
81445	2	Strut 25x25x375
81329	2	Strut 25x25x750
22256	2	Delta block 120° Form 3
23240	60	Lock
23223	30	Twin bolt
23228	10	Twin bolt for bar 1D
82139	4	Screw-jack h38-50
82033	10	Screw-jack h70-105
20628	6	Screw-jack extension 6mm
23286	4	Screw-jack extension 12mm
23239	8	Bolt disk
23241	8	Bolt disk

Nr.	Qty.	Name
21644	2	Center, short
21646	3	Center, long 50
21648	2	Center, long 70
80584	3	Center with ball
80941	4	Magnetic holder with ball joint
82252	2	Autocenter
81111	3	C clamp adjustable
80925	2	Screw clamp with ball joint

## Workstation, metal, lockable

#282562, suitable for Basic Sets 6 and 7

H x W x D: 780 x 570 x 960

Weight unloaded approx. 85kg

Storage of Alufix components in 6 clearly laid out, spacious and fully extendable drawers, also suitable for Alufix 40 Bars 80x80.

Two top drawers are equipped with inlays for small components. Lower drawers equipped with non-slip mats.

Load capacity per drawer 75 kg

Mobile measuring units see page 182

## Workstation, metal, lockable

#282727, suitable for Basic Sets 9 and extension sets

H x W x D: 780 x 570 x 1030

Weight unloaded approx. 88kg

Storage of Alufix components in 6 clearly laid out, spacious and fully extendable drawers, also suitable for Alufix 40 Bars 80x80.

Additional storage compartment mounted at rear for safe storage of long bars and profiles 50x50.

Two top drawers are equipped with inlays for small components. Lower drawers equipped with non-slip mats.

Load capacity per drawer 75 kg

## Storage compartment

#51753 for storage of long bars 50x50

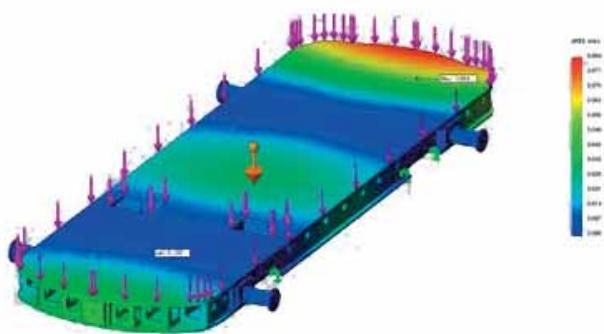

H x W x D: 660 x 480 x 68 mm

Storage of long bars in 6 pockets.

Assembly on rear of workstation with M8 screws included in supply.

Workstations and sets are packed and shipped as two separate units

All sandwich plates are tested and optimized for capacity and rigidity according to FEM analysis

## Witte FixBase®

### Base plates and positioning systems

■ Accurate and very rigid Sandwich plates are used as bases for measuring or holding fixtures, as a cantilever for CMM measuring surfaces or as transport plates. They offer highest rigidity but are comparatively lightweight

■ Sandwich plates can be used vertically or horizontally.

■ According to customer request plates are available with natural or black anodized surface, hard coating is also possible.

■ Whether extremely lightweight and economical or very accurate and demanding one of our options will suit your company's needs. Almost any type of grid can be integrated into the plate surface/s.

■ Important accessories to large plates are PWS (Precision Witte System) or PPS (Precision Positioning System) quick clamp systems. These are systems integrated into the plate to allow quick, accurate and repeatable positioning of sub-plates or adapter plates onto the Sandwich plate.

■ Optional accessories i.e.

- Cable/radio remote control
- Camera with monitor
- Position sensors
- Visual and acoustic warning signals
- Laser-scanner to monitor area of movement

As well as special versions such as

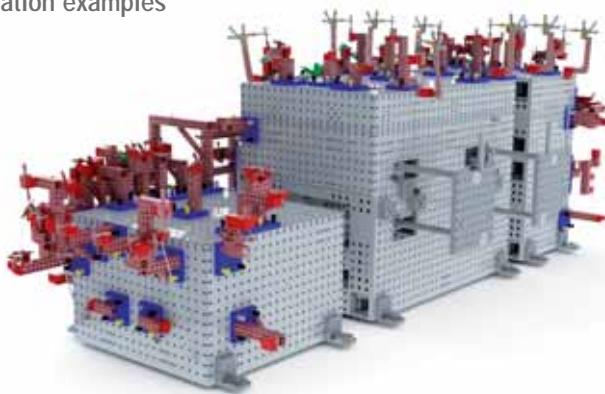

- Motor driven, automated
- Contoured plates which fit to work piece, also three dimensional plates
- Contoured plates which fit to work piece, In segments or modular
- Mounted with moveable surface plates
- With integrated scissor trolleys are available on request

Horizontal and vertical structure plates,  
on guide rails, automated

## Witte FixBase®

Application examples

FixBase cube combination mounted with column type supports

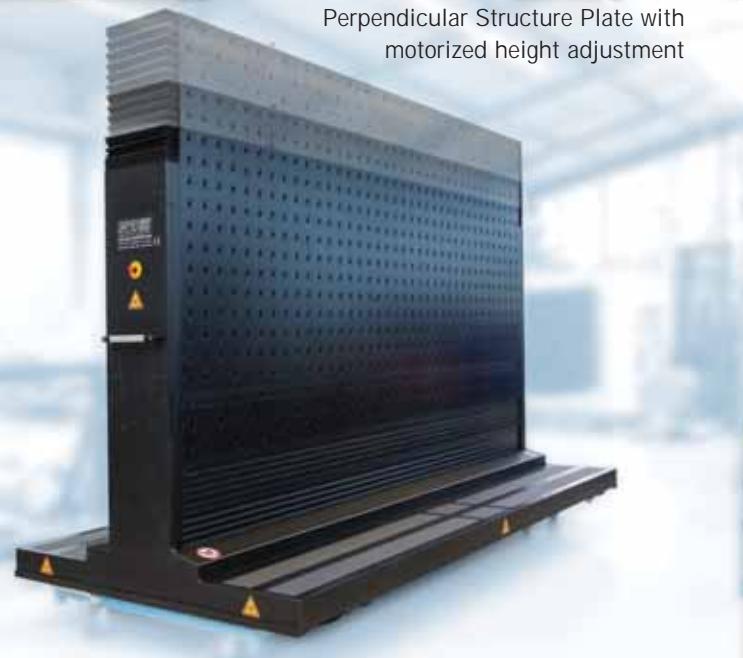

Fixbase Cube for mounting single parts of vehicle front

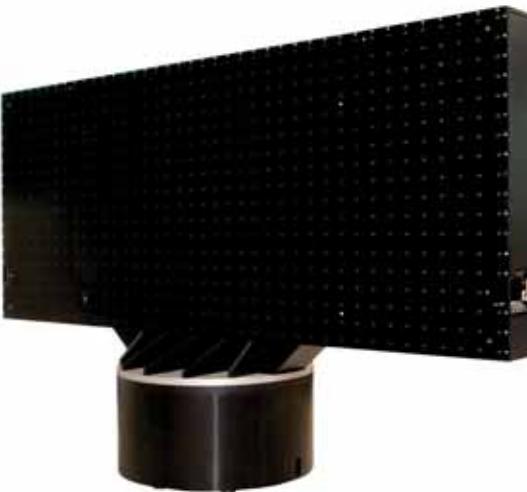

Perpendicular Structure Plate with  
motorized height adjustment

Horizontal Structure Plate  
with integrated motor driven jack system

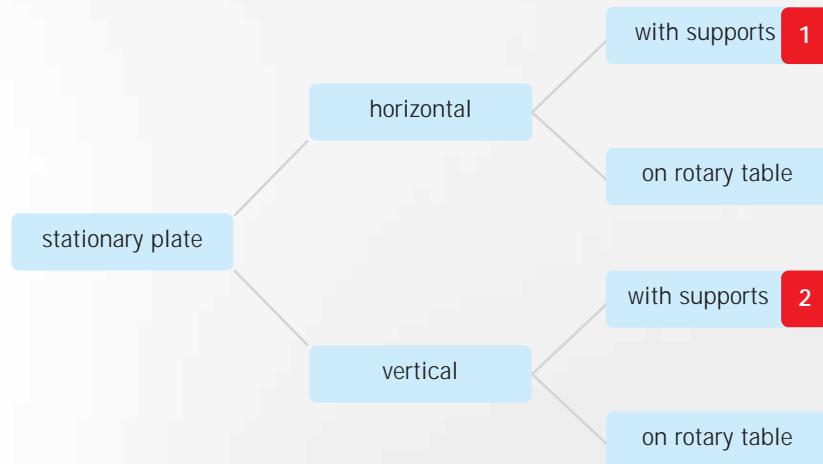

Horizontal Structure Plate  
with integrated motor driven jack system

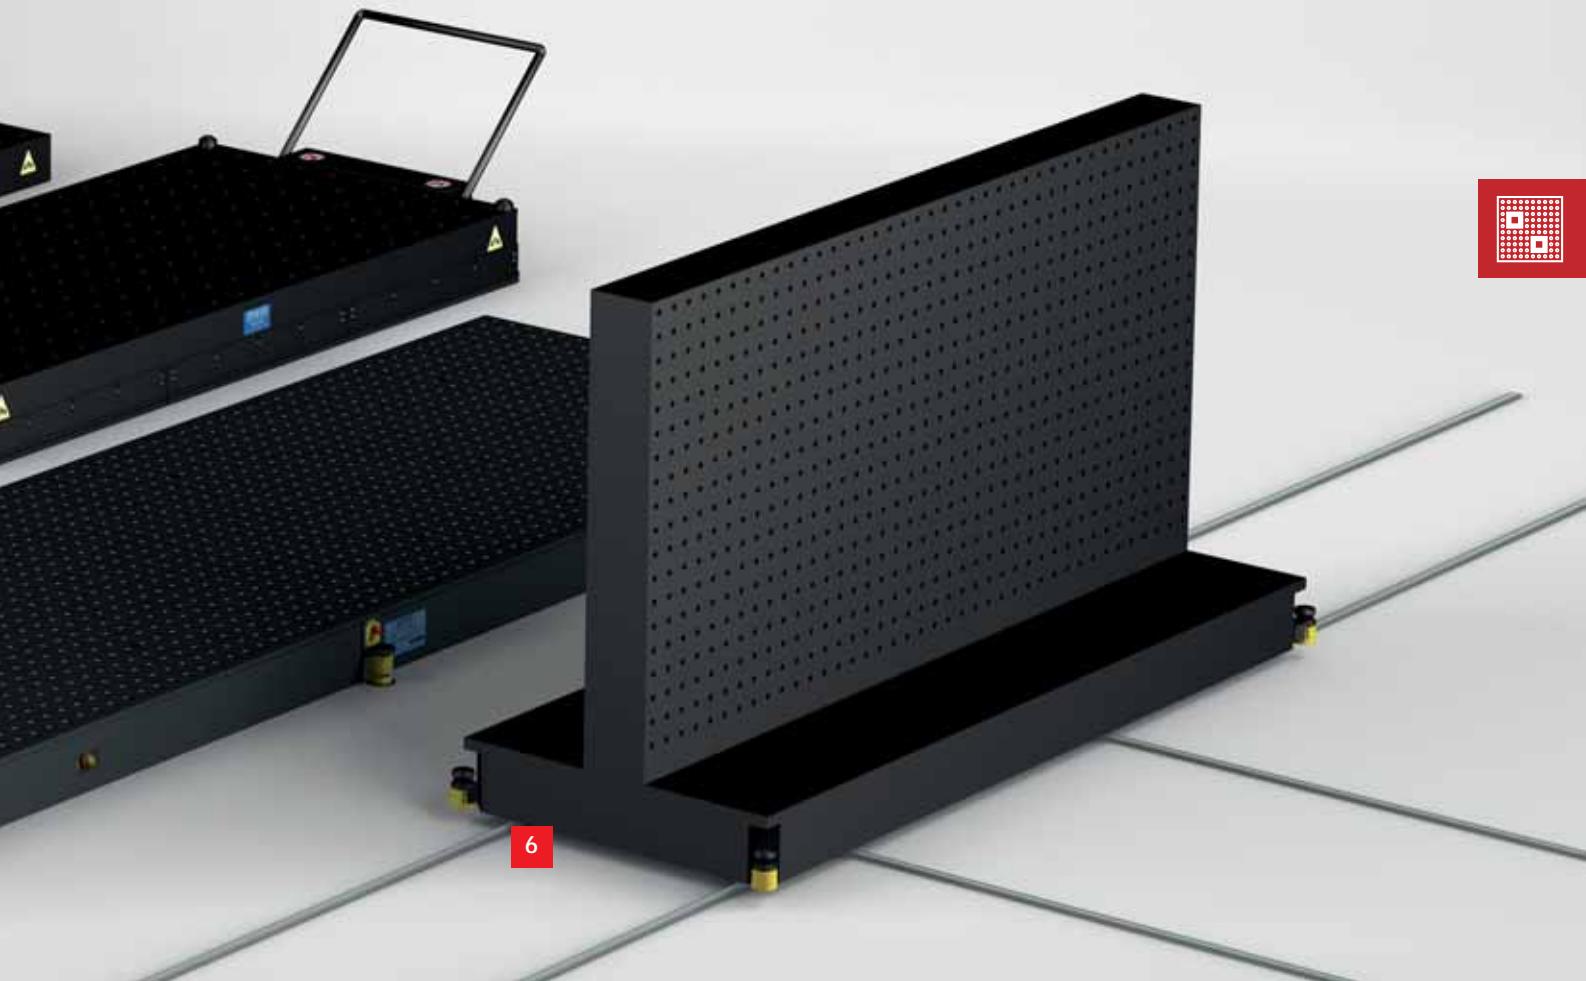

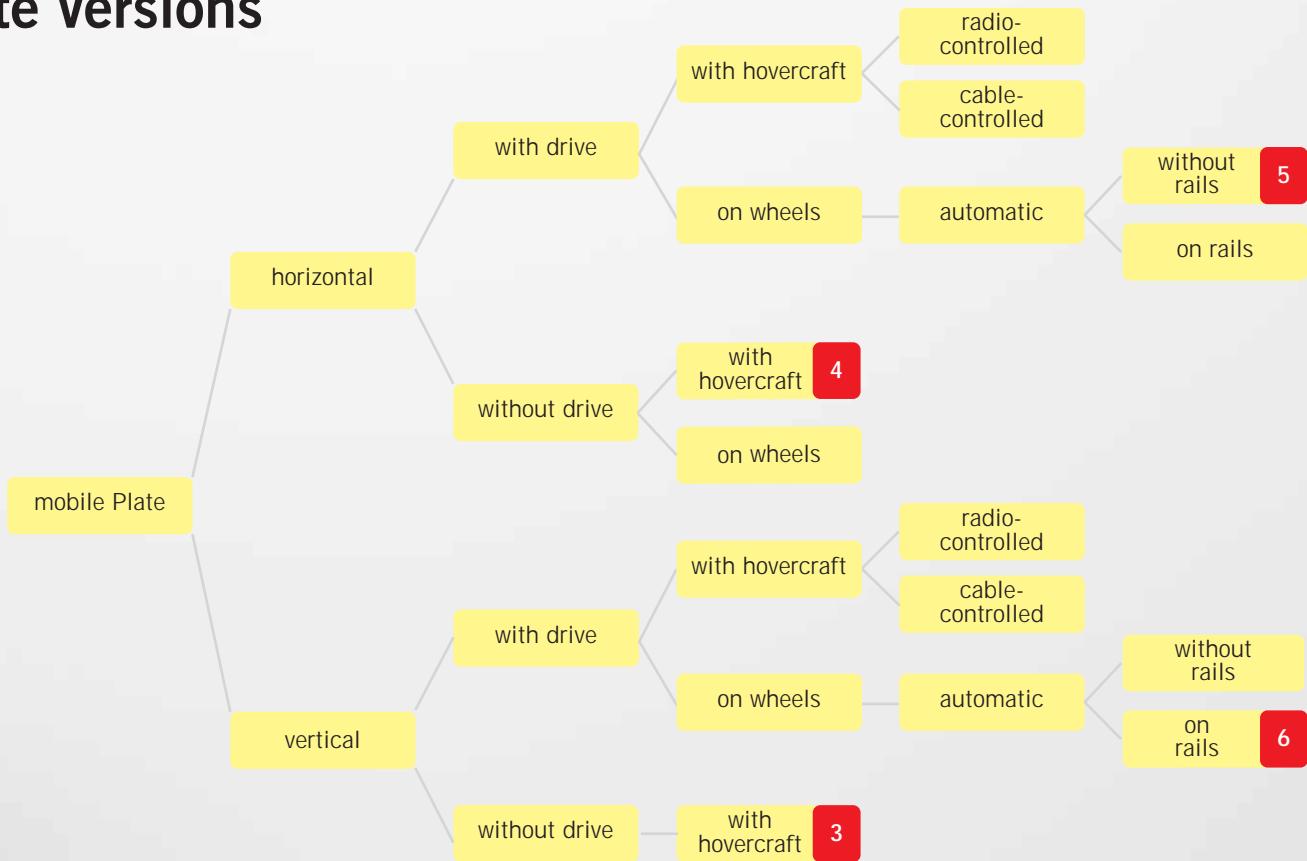

**Witte FixBase®** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

# Witte FixBase®

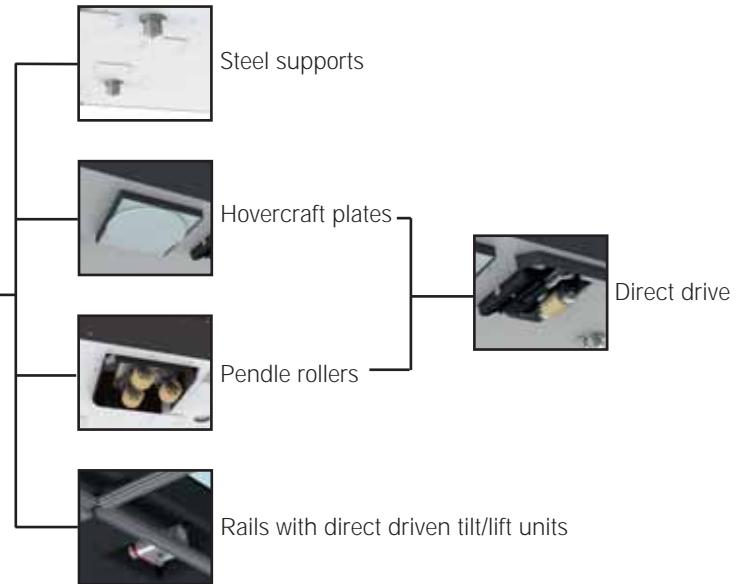

# Plate versions

# Witte FixBase® Equipment

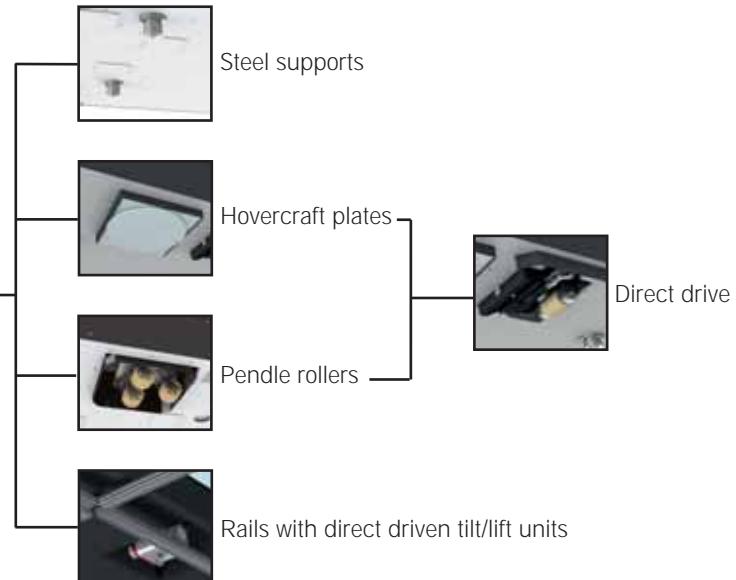

According to design

## Horizontal Structure Plate:

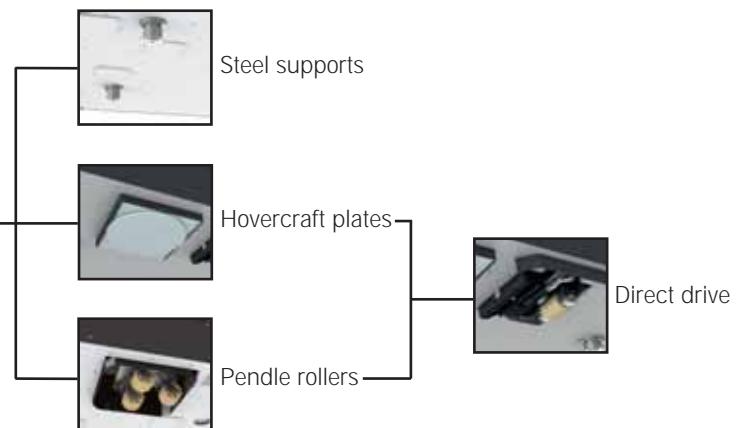

## Vertical Structure Plate:

with horizontal substructure

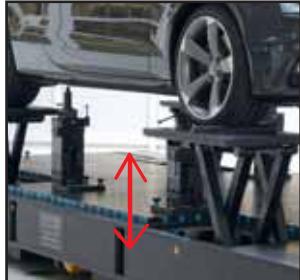

## Vertical Structure Plate:

# Witte FixBase® Special versions

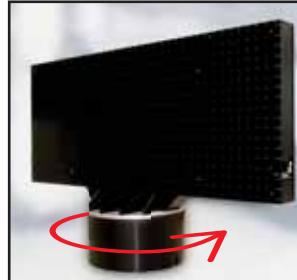

## - Examples

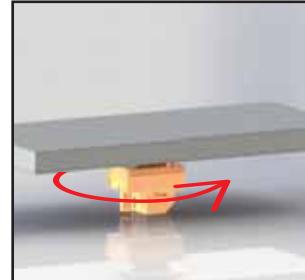

With integrated jack lift  
and air-cushioned  
and floating support plate

With integrated, motor  
driven height adjustment

On air-cushioned rotary  
table, for manual rotation

On electrical rotary table,  
motor driven rotation

# Witte FixBase® options

## - Examples

### Slide units

Manual operation

Versions:

- mounted or integrated
- for vertical and horizontal sandwich plates
- mounted version possible for plates already in use
- freely selectable grid
- fixed positions using pins

### Drive camera and monitor

For motor driven plates

Control unit with path monitor

Drive camera

### Precision coupling units

for horizontal plates

## Witte Fixbase Structure Plates

### Dimensions

Surface dimensions:

Length x width, in one piece  
1,5 x 3m up to 2,4 x 10m

Thickness:

150mm up to 1000mm  
Larger dimension (in segments) available

Evenness:

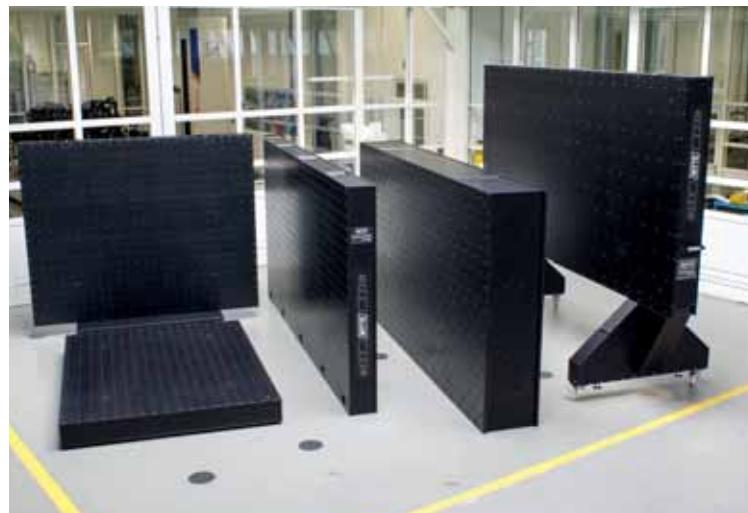

Acc. to DIN 876 II Gen. 3  
(up to 5m x 2m)  
Higher accuracy available on request

Hole grid

Tolerance for grid JS7  
Total toleranz JS8  
Higher accuracy available on request

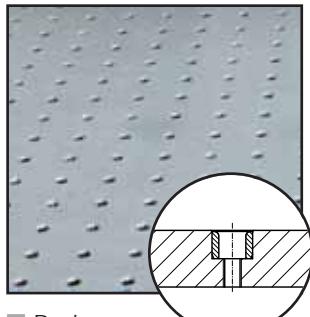

Load capacity for horizontal plates

500kg/m<sup>2</sup> up to 2000kg/m<sup>2</sup> standard  
Higher load capacity available on request

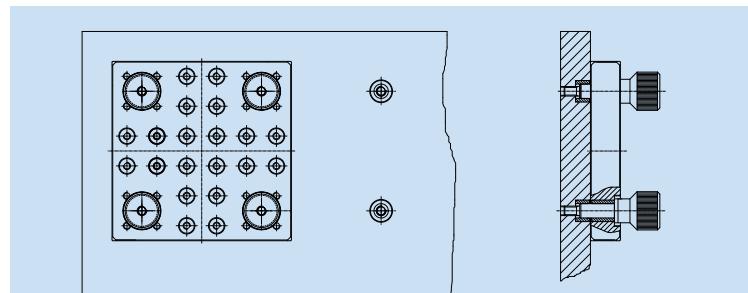

## Set up surface

### Classic

■ Basic  
thread with fitted sleeve

Column connection classic – with fitted screw

Simple and proven version.

Two types of locators are available:

- Snug fit, floating (XY positioning)
- Without fit (only clamping)

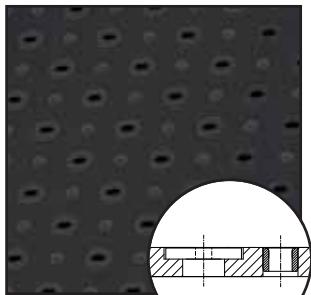

Maximum size of grid holes

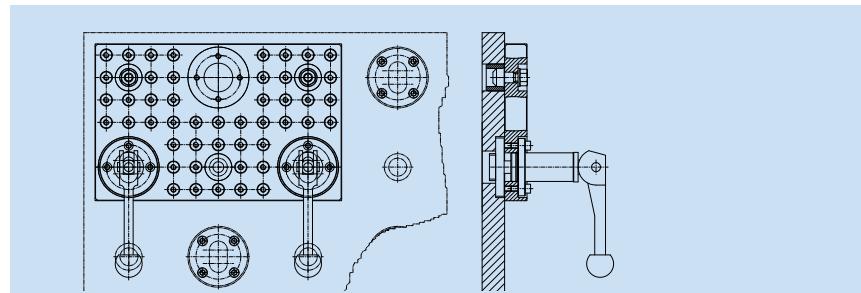

System size Alufix 25, Dia 12,5mm / M6

## Set up surface

PPS

■ PPS-system

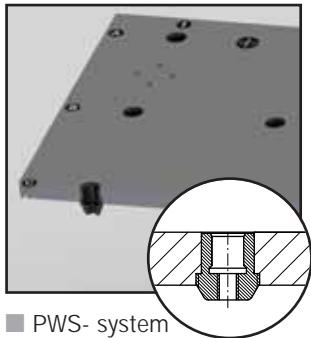

Column connection with Witte PPS-quick clamp system

Separate positioning and fixation of footplates via centering pin and clamp units

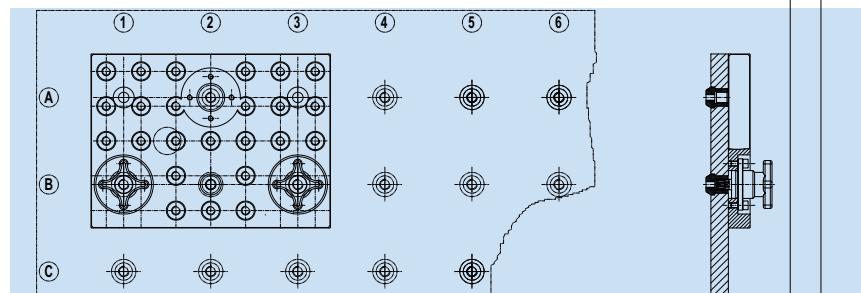

## Set up surface

PWS

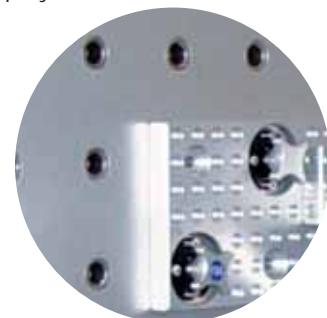

■ PWS-system

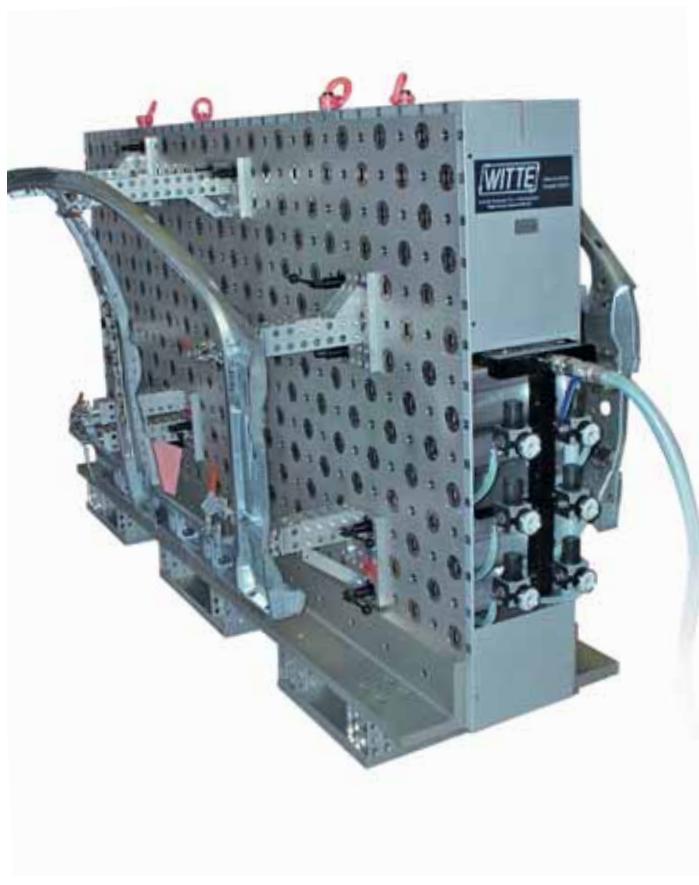

Column connection with Witte PWS-quick clamp system

Expanding clutch bolt centers and clamps footplate on PWS grid or sandwich plate

Witte FixBase® elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

## Alu Sandwich Plate with hovercraft hose connected

Sandwich plates can be Witte-equipped with a hovercraft cushion system. This enables easy and quick transport of the plate from loading area to checking area (CMM surface area). Even plates with heavy loads can easily be moved over cracks, seams or ridges in the floor.

Air pressure is individually regulated to adjust to irregular weight distribution guaranteeing a smooth and even ride.

For effective and problem free performance of hovercraft systems, a smooth non porous surface i.e. plastic coated, ground cement or vinyl flooring is ideal. Please contact us for specifications to ensure proper function in your facility.

Hovercraft cushions mounted on underside of Structure Plate, optional direct drive and steel supports

## Alu Sandwich Plate with hovercraft

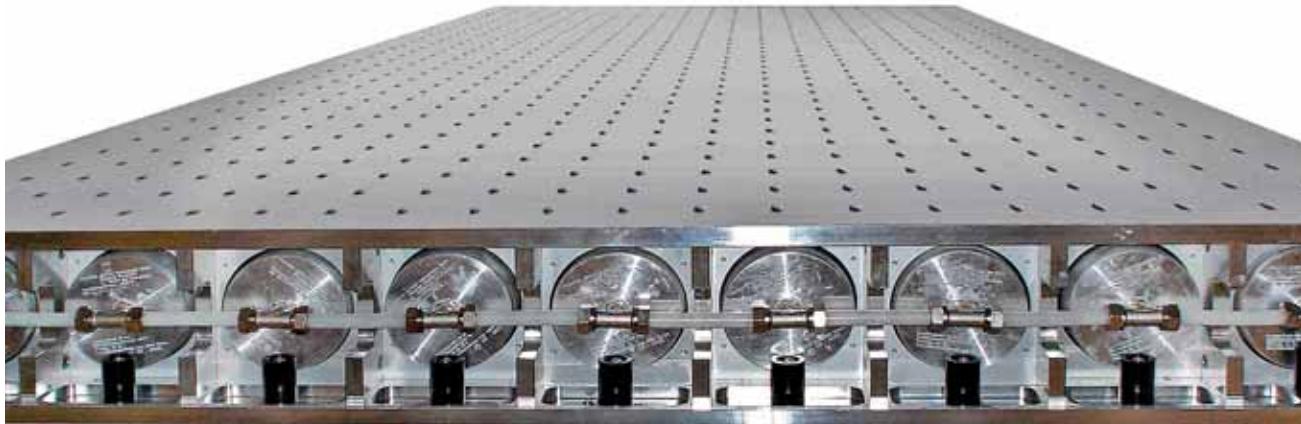

Independent, operation with integrated air tanks

A special way of moving sandwich plates is by using intergrated air storage system. Internal pressure cylinders allow self sufficient plate movements meaning that no air supply hose is necessary. Besides increased mobility it also adds to flexibility.

The air reservoir system is designed for a drive mode for a minimum of 2 minutes. Filling up of the reservoir (max 12 bar) is completed after a short period of time. Depending on floor conditions drive mode of 2 minutes can often be exceeded.

This option for Witte Sandwich plates has to be integrated into initial design and purchase of a plate. The air storage system cannot be re-tooled or added to a plate at a later date.

- i Minimum plate thickness 250mm  
Reloading via normal house circuit  
Low working pressure (max 20 bar)  
No high pressure compressor system required
- ! Safe, low-maintenance and economical complete concept

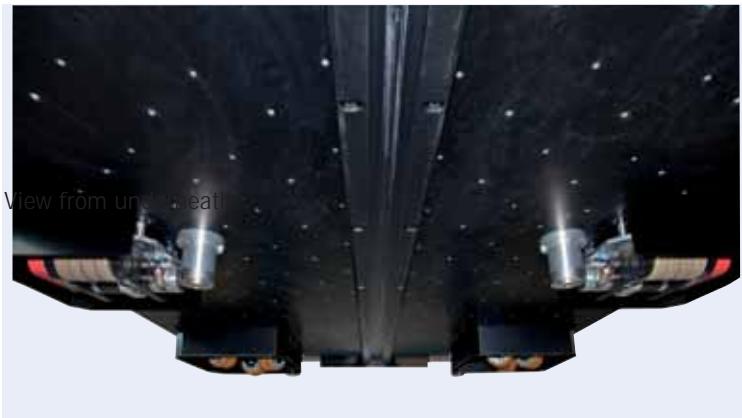

Witte FixBase® elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

## AluSandwich Roller Plate

with floating heavy duty guided rollers

### Applications:

- For uneven, porous or joined (tiled) floors
- If no air pressure is available or current operations will be adversely affected

### Characteristics:

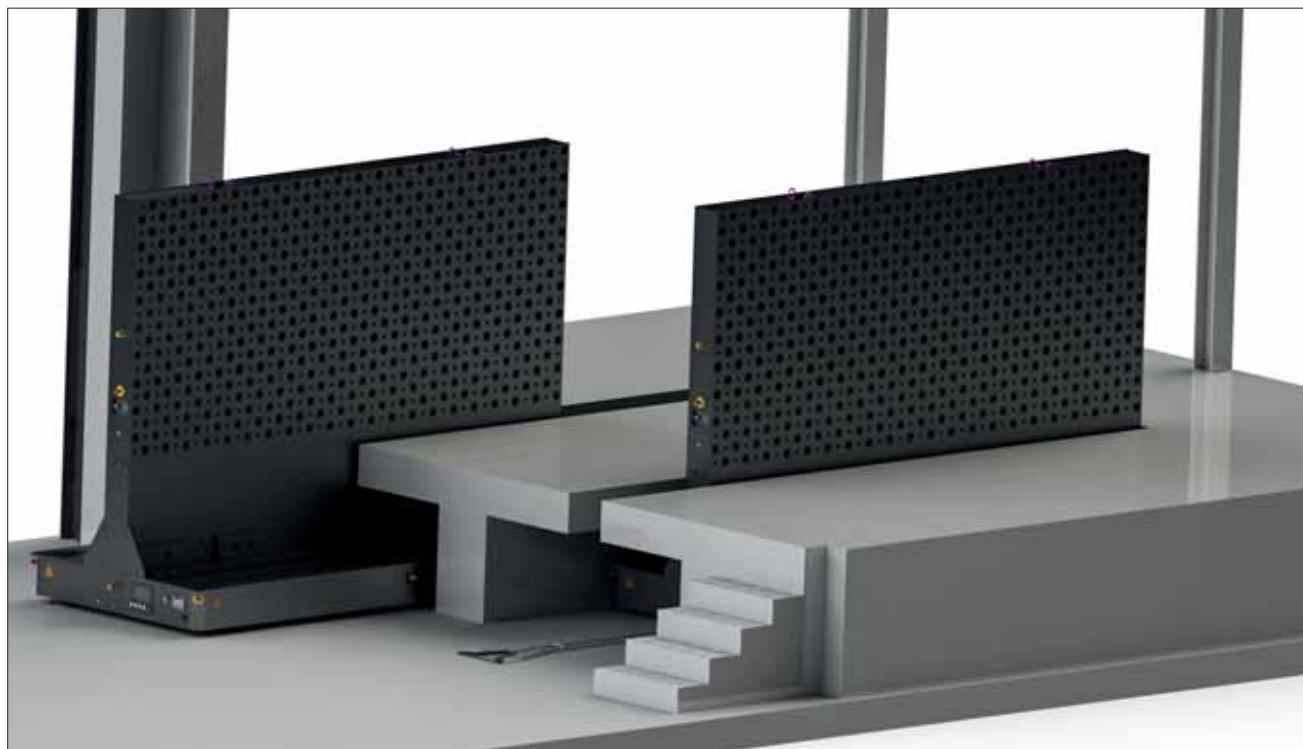

- Automatic crawl speed when reaching final position

Control panel with camera monitor

Drive camera and path monitor optional on all motor-driven Structure plates

**Witte FixBase®** Elemente können in unterschiedlichen Farben eloxiert geliefert werden. Die Farbe „Natur“ ist Standard, „Schwarz“(-1) ist alternativ lieferbar. Weitere Farben auf Anfrage

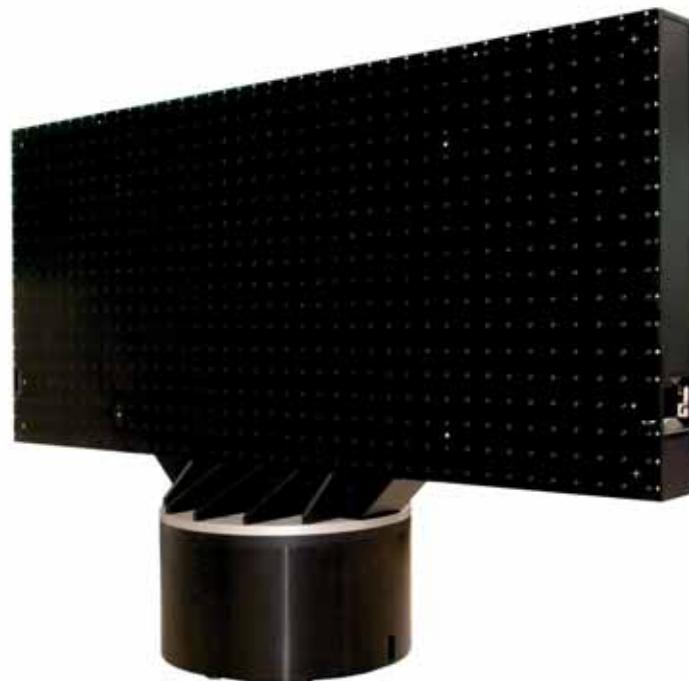

## Alu Sandwich Plates

rotating

Robot measuring cell for optical measuring

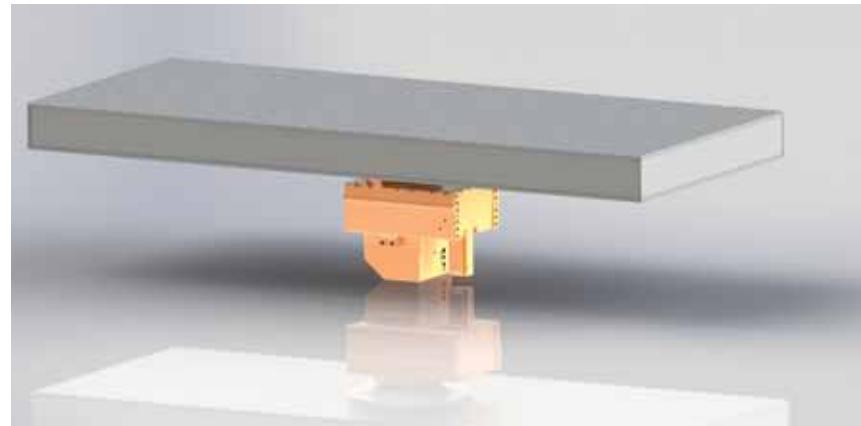

Configuration:

- 2 vertical sandwich plates mounted on rotating hovercraft supports, rotatable by 180°
- 1 stationary, horizontal sandwich plate with extended height
- On hovercraft, rotary and tact tables
- To reach both work pieces or do assembly from outside without interrupting measuring process
- Integrated safety monitoring, release switch

Vertical alu sandwich plate on hovercraft rotary table

Horizontal sandwich plate on motorized rotary table (shown without base unit). Force is directed to the rotary plate via inner plate structure

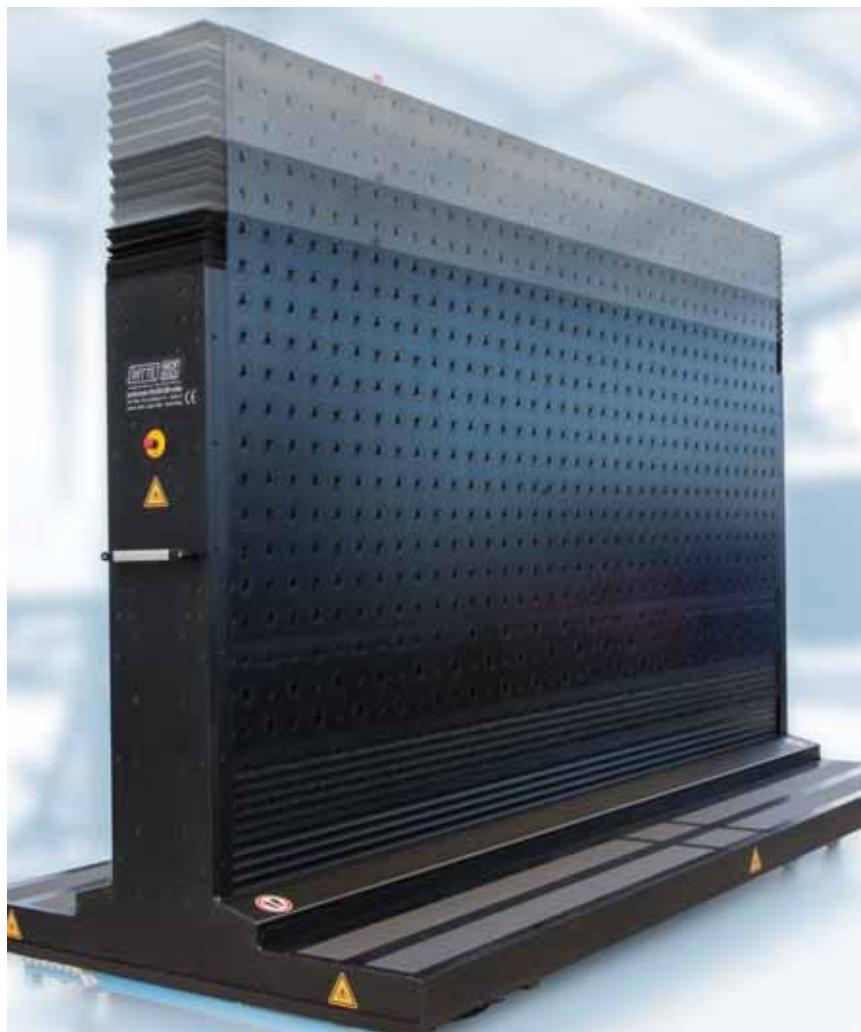

## Alu Sandwich Plates

height-adjustable

Motor driven height adjustable sandwich plate for parallel use of tactile and photogrammetry measuring tasks.

Example configuration on the right:

- 750 mm lift  
from 2050 to 2800 mm.
- Clamping surface on both sides  
3700 x 1700 mm
- Hovercraft with direct drive
- Double sided PPS grid
- Walk-on base for easy use of plate
- Grid surface anodized black
- Equipped with safety features,  
hook-eyes, emergency stop on  
both face ends and allround  
foot protection

Witte FixBase® Elemente können in unterschiedlichen Farben eloxiert geliefert werden. Die Farbe „Natur“ ist Standard, „Schwarz“(-1) ist alternativ lieferbar. Weitere Farben auf Anfrage

# DTS - Driverless Transport Systems

## With alu Structure Plates Rail-guided

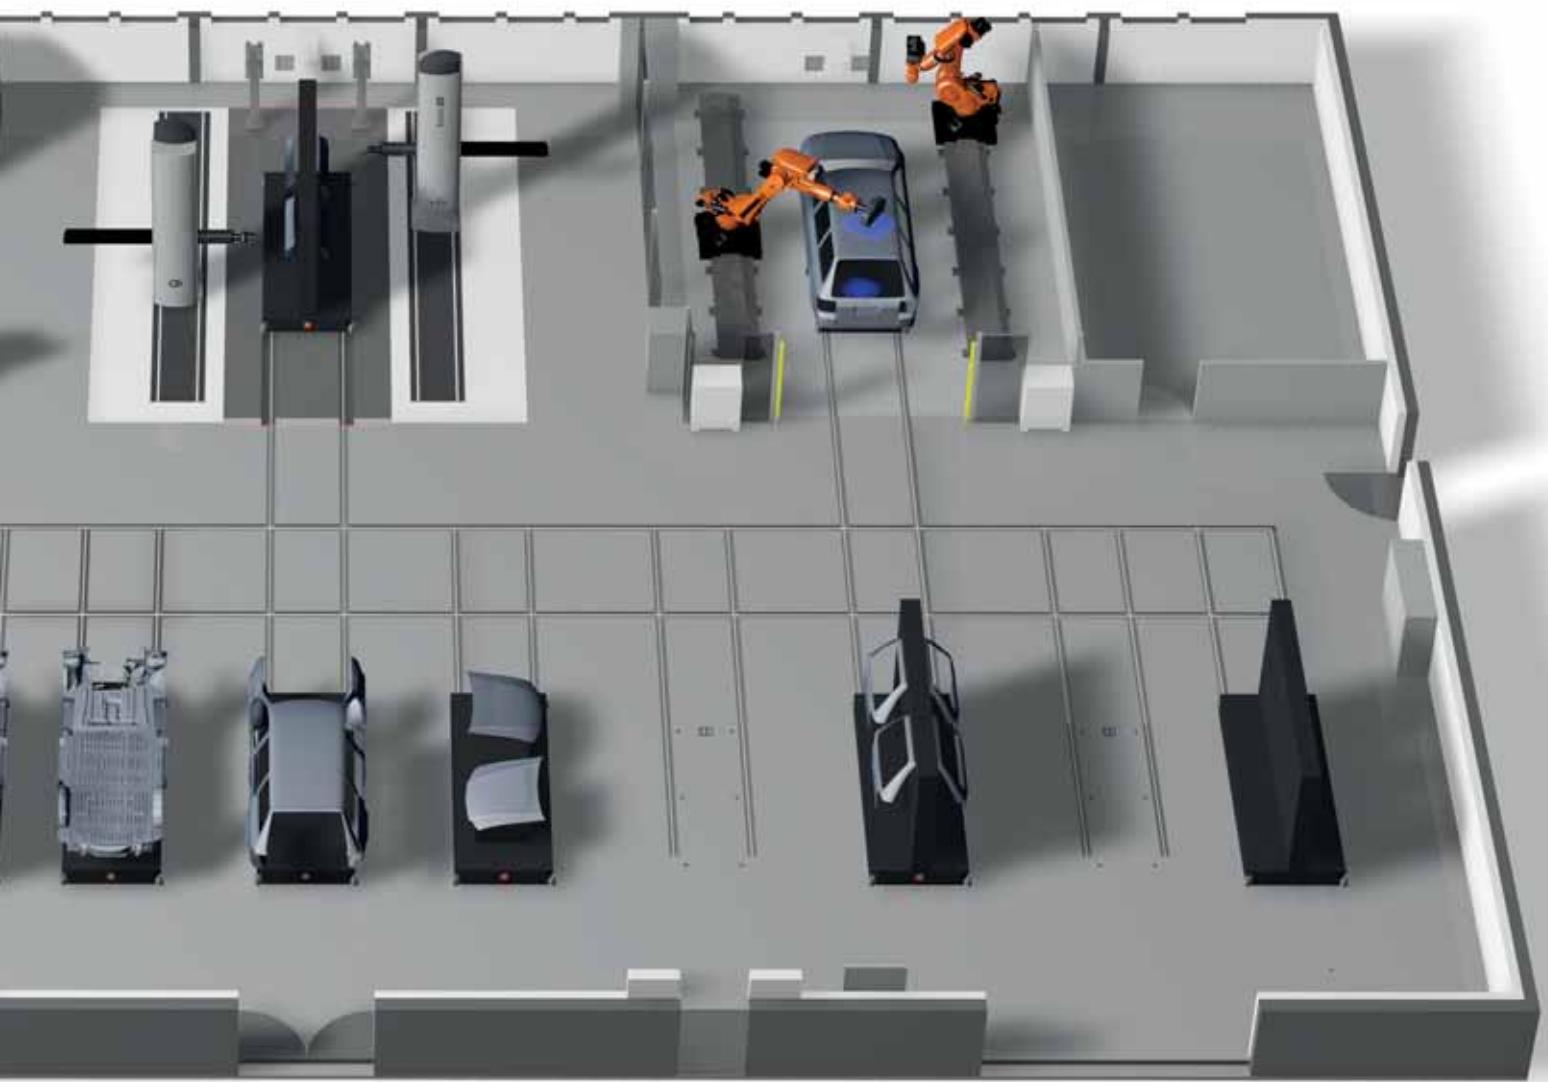

- For fully automatic controlled loading stations
- Quiet forcibly guided run rails embedded in the floor
- No edges or grooves to stumble over
- 90° cross operation due to correspondingly arranged pivoting wheels
- Electro drive with battery operation
- Position monitoring/controlling with RFID transponders and IW-LAN radio network
- Positioning in CMM by lowering on to centering rings

Example of a recent project:

- 6 horizontal, 5 vertical sandwich plates
- Loading of 2 tactile double arm CMM and a duplex robot cell for blue-light photogrammetry
- Plate system and measuring equipment are remote-controlled by a master control station

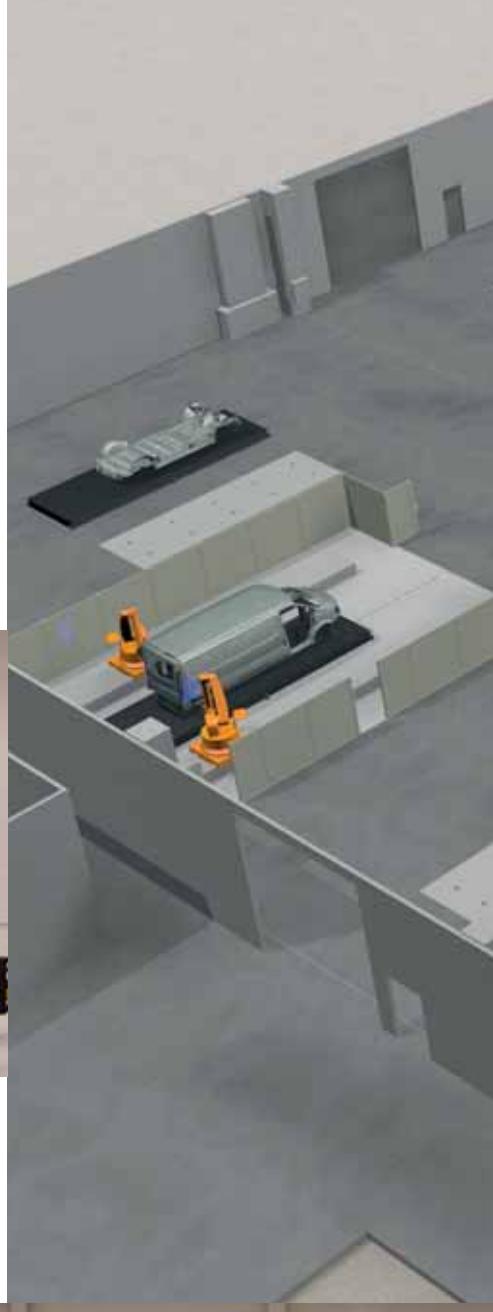

# DTS - Driverless Transport Systems

## With alu Structure Plates, transponder-guided

For fully automatic loading systems

- Quiet, accurate precise running via RFID chips embedded in the ground
- No mechanical travel or guiding elements required
- Straight forward / backward movement and turn on the spot
- Electric motor drive with battery supply
- Position monitoring / control with transponders and IW-LAN wireless network
- Repeatable positioning in the CMM by lowering on centering rings

Example of an implemented system:

- 9 horizontal structure plates 8x2,4m
- loading of 2 tactile double-column CMMs and 4 duplex robotic cells  
For photogrammetry measurement
- independent start / target movement with loading / collision monitoring

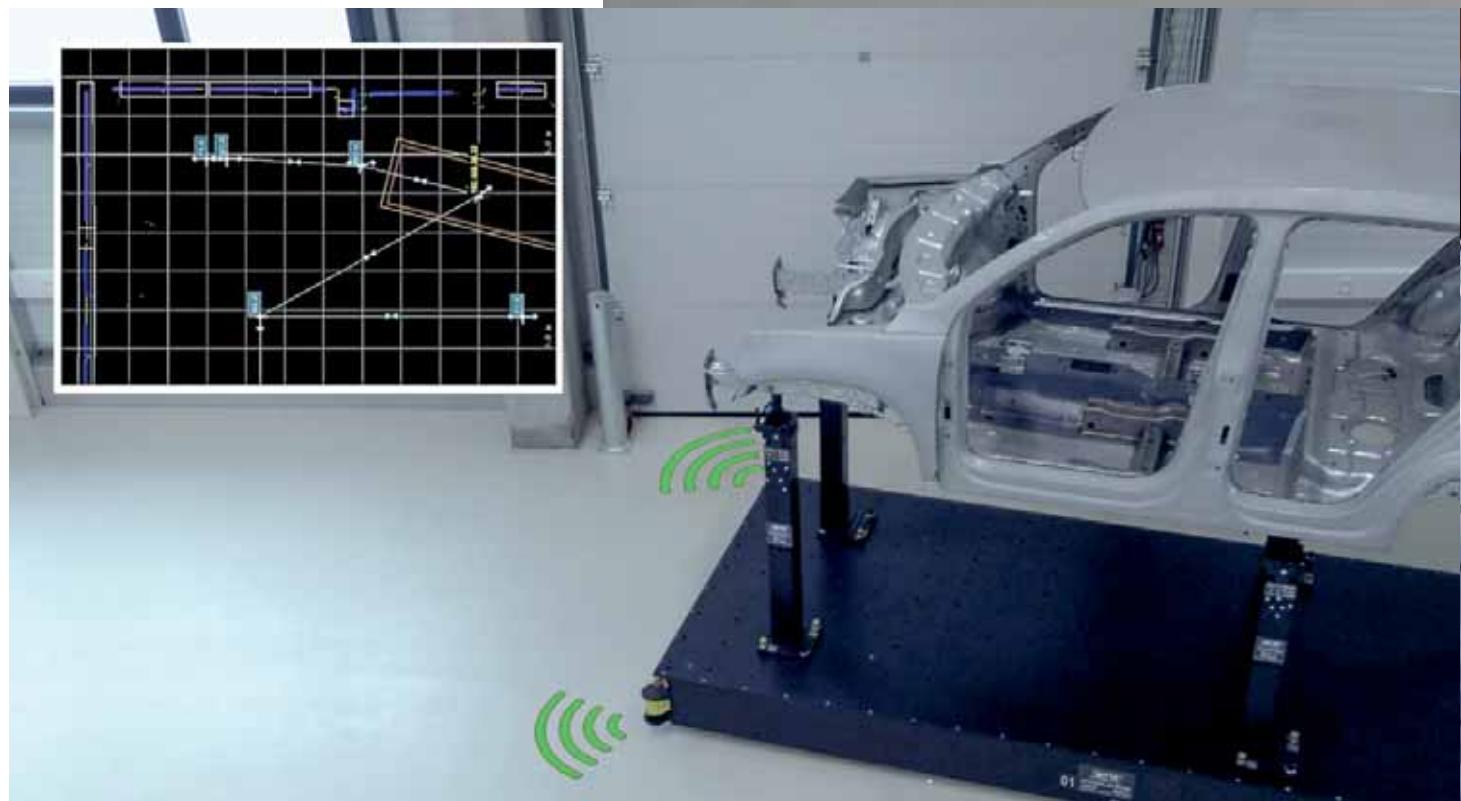

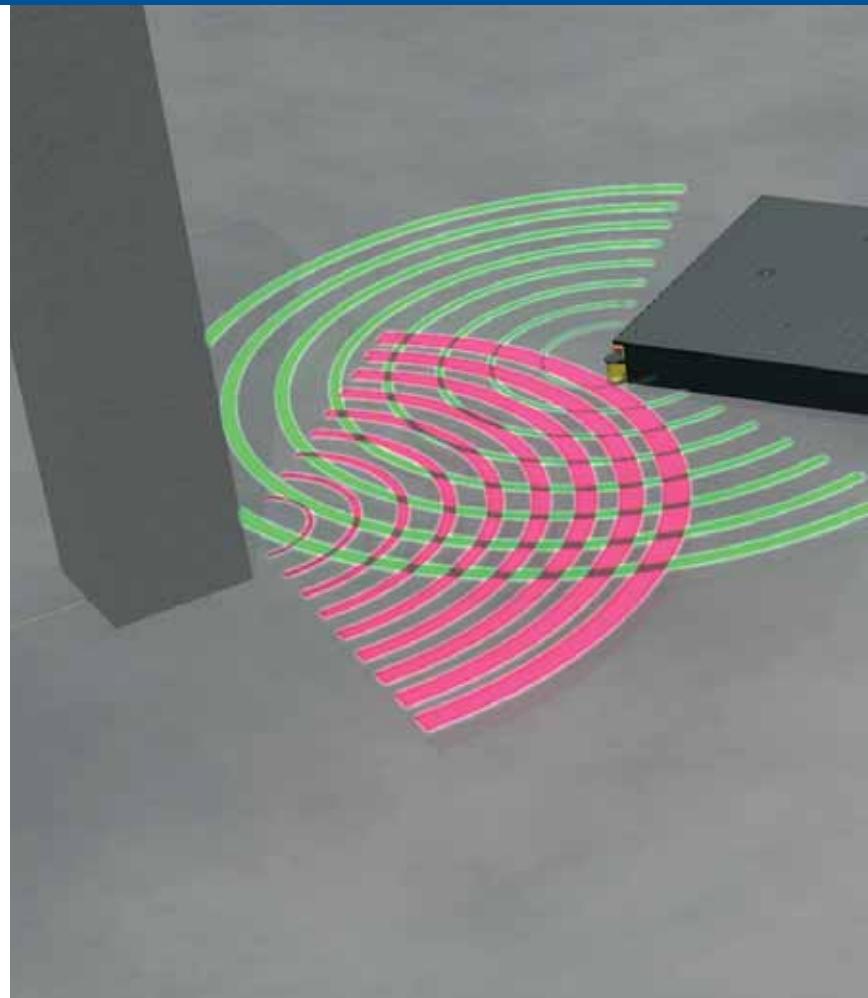

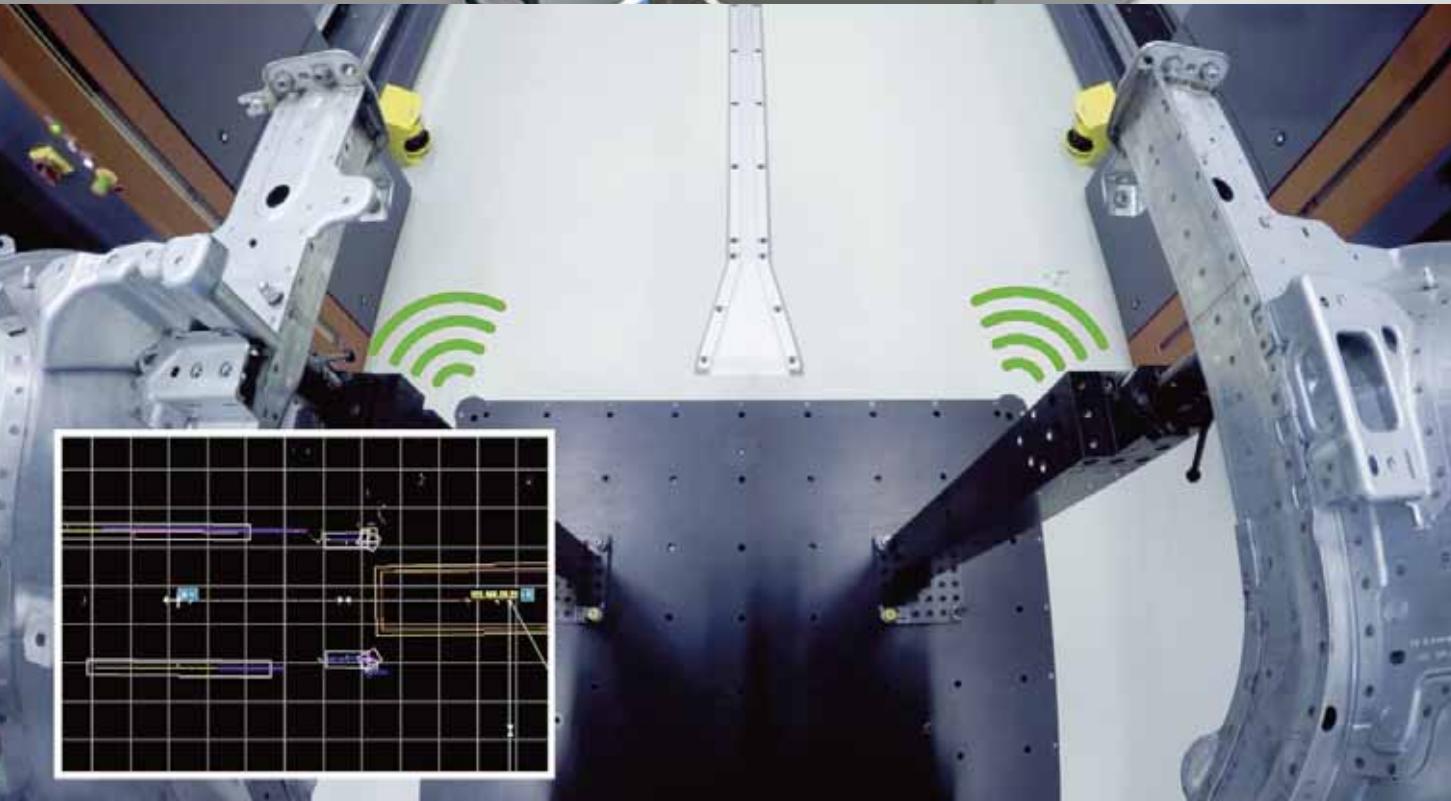

# DTS - Driverless Transport Systems

## Autonom navigation

- For fully automatic controlled loading equipment
- Quiet, accurate running due to permanent, independent orientation and navigation according to hall layout
- No drive or guide elements
- Straight forward / backward movement and turn on the spot, cornering (in preparation)
- Electric motor drive with battery supply
- Repeatable positioning in CMM by lowering on centering rings
- Fast changeover to new halls.  
Layouts customizable, through easy reprogramming of the path tracks
- Independent alternative route calculation possible

## Alu sandwich plates Special solutions

Complete vehicle unit for inspection and measuring of test cars or cars due for delivery. The vehicle is either driven or pulled onto the plate using a winch. After scissor trolleys raise the vehicle it is set down on RPS or car jack up points.

The sandwich plate is equipped with hovercraft and as an option can be driven with friction wheels. Scissor trolleys and winch are power operated.

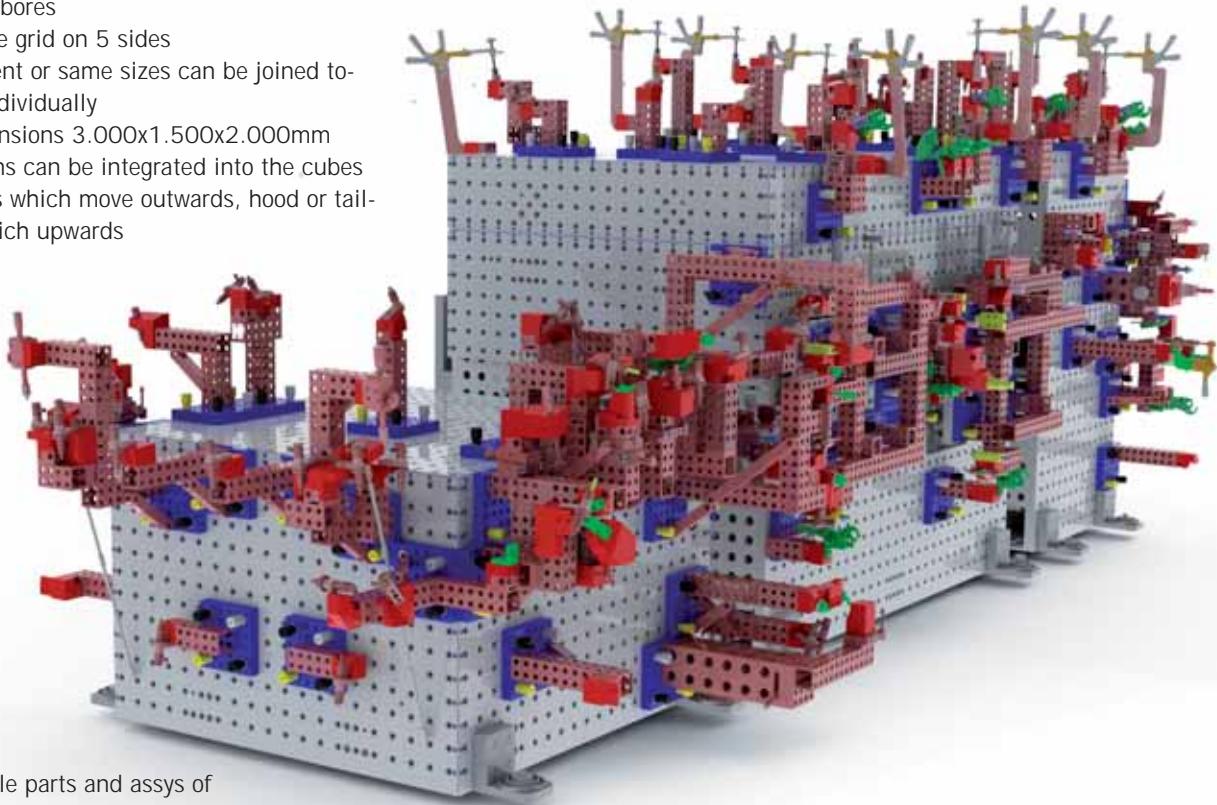

## Alu sandwich plates Heavy load version

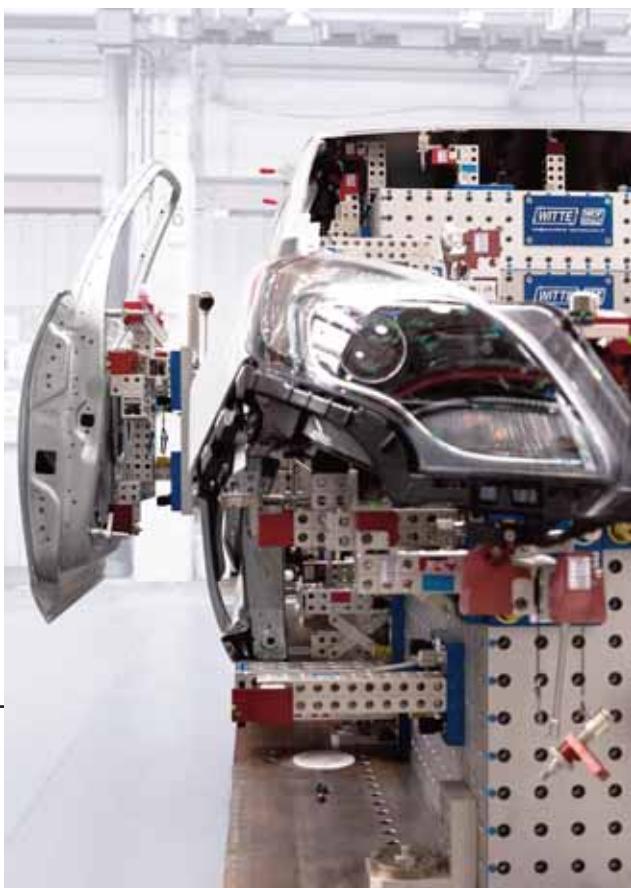

Rib type Alu sandwich plates are especially suitable for very heavy loads. The picture on the left shows a hovercraft Alu sandwich plate with dimensions 2000x4000x300mm. With its own weight of approx 1,5 to the total load capacity is 15 (fifteen!) to. Fully loaded the plate can be moved with only two persons, with the help of the electro mover even by one person on their own.

## FixBase® Cubes

- Cubes mounted with grid plates:
- Grid with fitted bores
- Flat, full surface grid on 5 sides
- Cubes in different or same sizes can be joined together or used individually
- Maximum dimensions 3.000x1.500x2.000mm
- Further functions can be integrated into the cubes i.e. door supports which move outwards, hood or tailgate supports which upwards

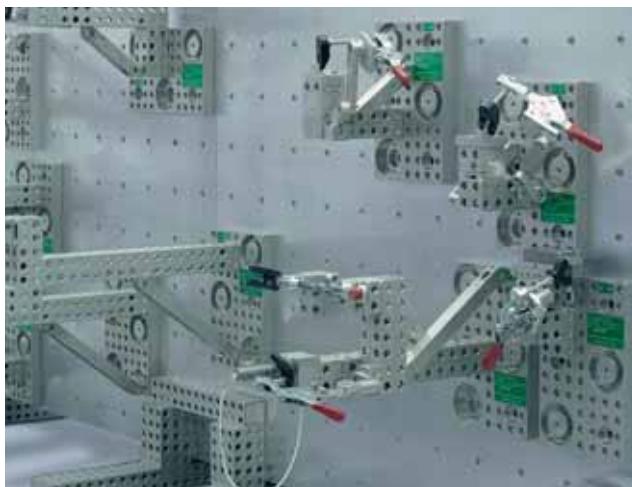

Supports for single parts and assys of various versions and models i.e. two-seater, notchback, limousine, estate, van, SUV are possible using corresponding configurations

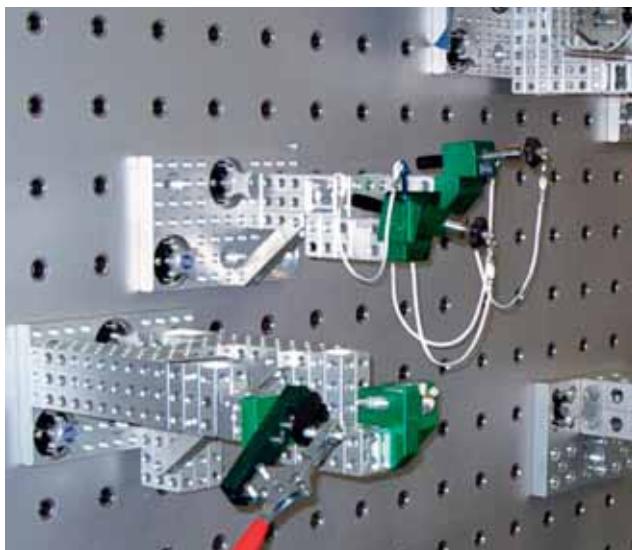

Application example for FixBase cubes

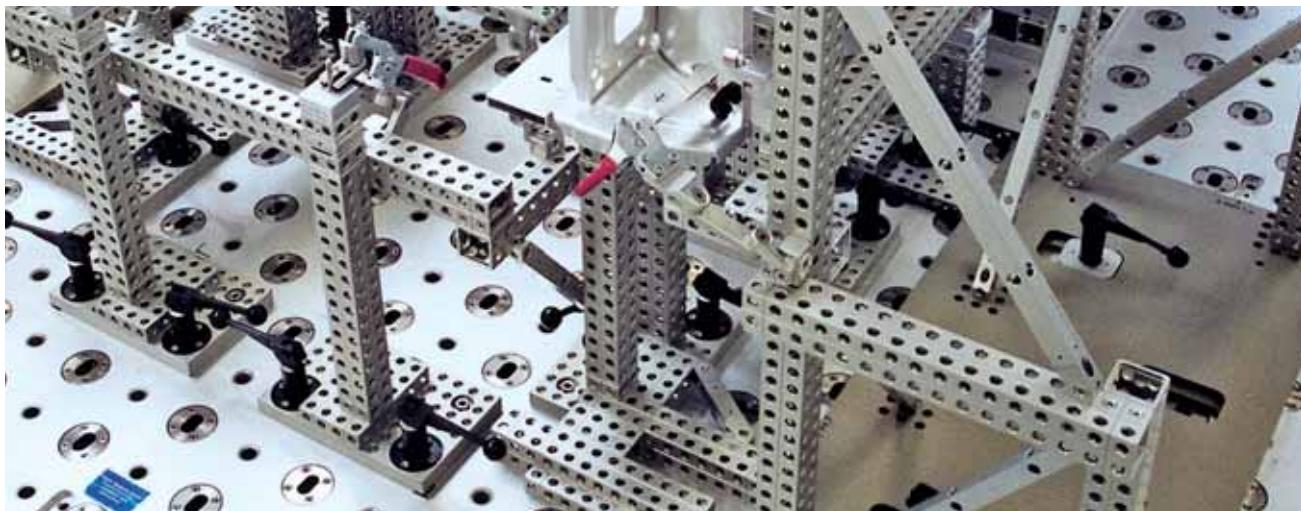

- Single cube for frontend (top)
- Combination of several cubes to mount all parts of a body-in-white

Column supports on footplates with fitted screw connection

Columns connected using PWS system

Columns connected using PPS system bayonet clamps

## Column variations

for use on sandwich plates

Combining a grid plate (conventional or sandwich type) with exchangeable columns offers following advantages:

Use of one base for user-defined assembly of various work-pieces, different assembly degrees of parts (single parts, welded groups, assemblies) different derivatives, match metal function.

Considerably less storage space is required in comparison with complete fixtures. Comprehensive accessories such as multi level trolleys, foldable, stationary or mobile storage stations and tables are available for storing column supports. Multiple use of column supports is possible on different base plates or in different departments.

Pre measuring of supports on small measuring equipment is possible.

Different types of connection:

- Fitted screws,
- PPS (centering bolt and bayonet lever),
- PWS (clutch bolt with centering pin).

Optional simple footplates for Megalu columns or modular footplates for Classic or ECO bars are available.

The supports can be used for further functions or contact points by using folding or quick change couplings.

Longer bars on columns are supported by sharp angled struts or connected with one another when mounted.

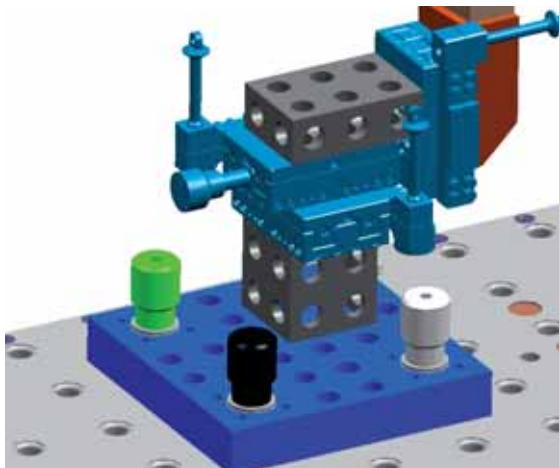

## Column connection

with fitting screws for basic grid holes

Simple and proven version.

Two types of locators are available:

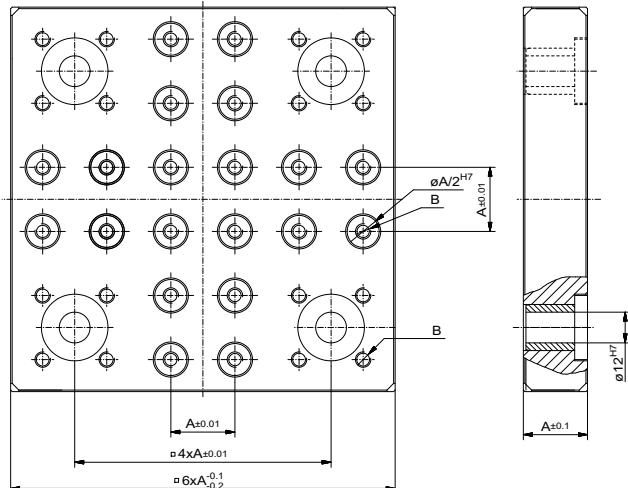

- Snug fit, floating (XY positioning)
- Without fit (only clamping)

## Footplate

150x150, AF 25/50

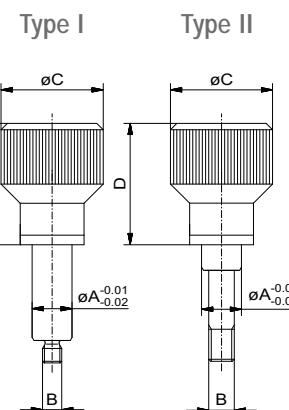

Nr.	A	B	C	
289356	25	M6	ø12H7	1.500

## Fitting screw

Sandwich plate mounted with  
PWS base plates using clutch  
bolts for grid 100mm

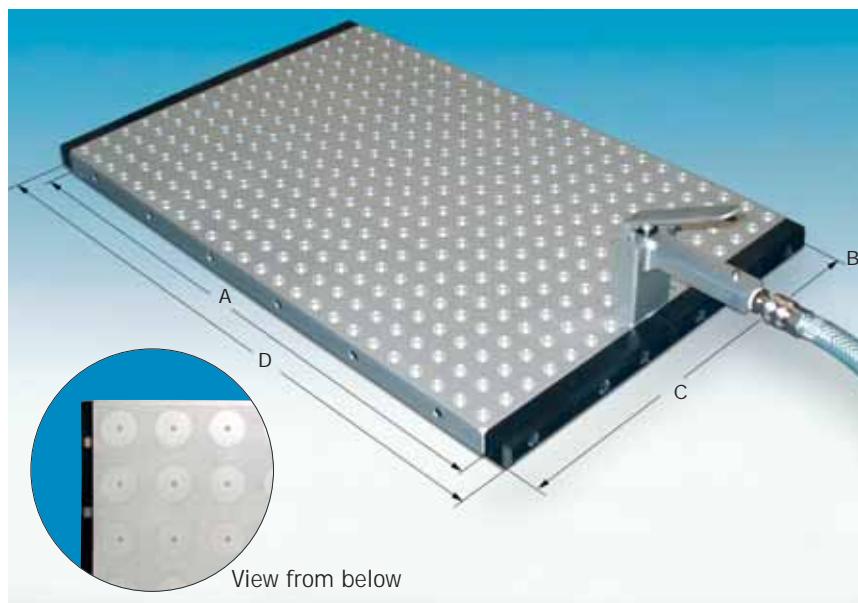

Witte FixBase® elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Accessories such as castors, eye hooks, angle plates and locating pins are shown from page 186

# EUROFIX

## Hovercraft plates

**Material:**

- High tensile aluminium min. F47
- Surface protection:
- Top surface anodized
- Bottom surface PTFE coated
- Grid bores:
- Fitted bores 12,5H7/M6
- grids 25 to 100 mm available

**Load capacity:**

- Depending on surface of measuring machine but min. 200kg

Air pressure required:

>3 bar

minimal air use (volume) required

**Hovercraft Plates**

For moving and positioning heavy workpieces on coordinate measuring machines.

The hovercraft plates have a grid pattern on the top surface.

Underneath the plate an air layer is created in such a manner that thread sleeves, T-slots or small gaps between the measuring machine and setting up area can be bridged easily.

The air is supplied via a rapid-action coupling and a handle valve.

### Hovercraft plates

with handle and integrated hand valve

Nr.	Grid	A	B	C	D	<b>kg</b>
81209	25	400	25	300	450	9
81050	25	600	25	400	650	16
82153	25	600	25	600	650	19
82154	100	600	25	600	650	19

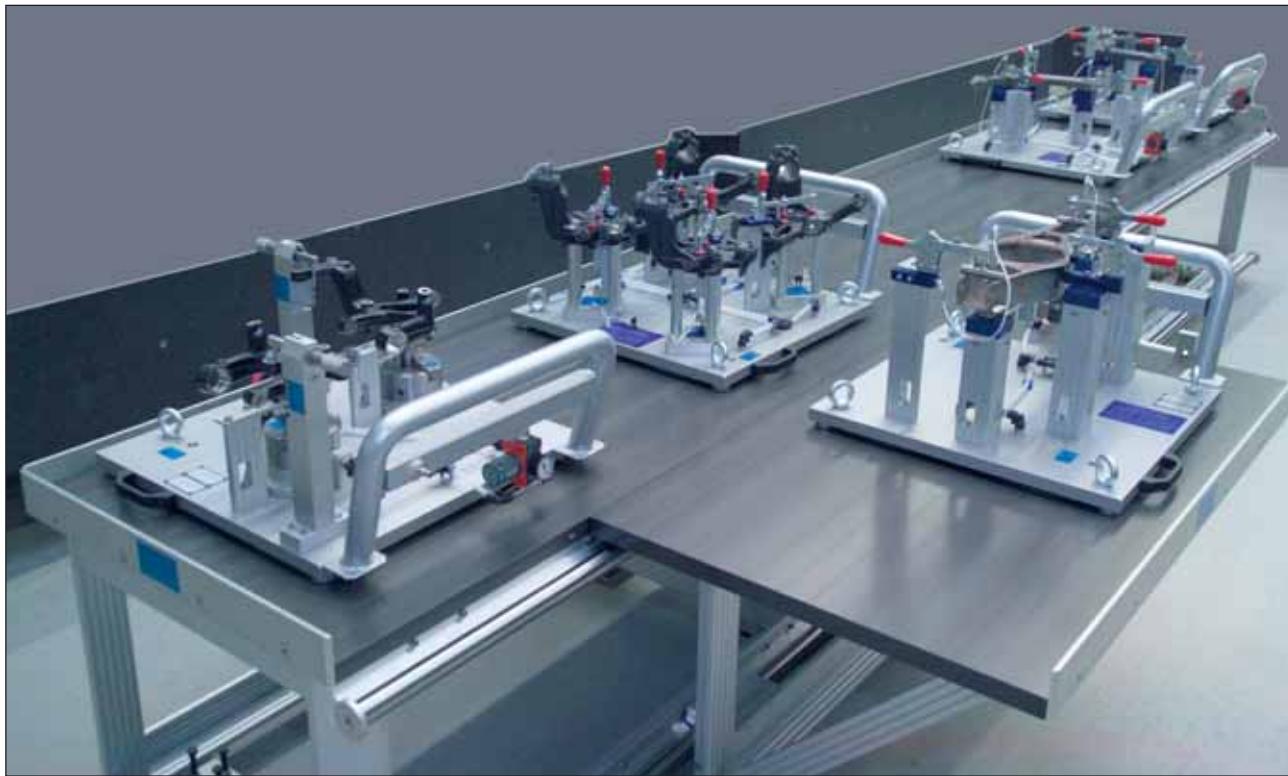

## Jack up trolley

loading systems

Nr.	Table area	Lift	kg
81945	675x675	300	75
82280	725x950	300	80

Jack up trolley with hydraulic height adjustment from 700-1000mm. Surface area is HC coated with rollers on one side for easy transfer from table to measuring area

Loading station with 5 hovercraft plates each mounted with a different measuring fixture

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

**Load Capacity:** 250 kg, from 50kg upwards we recommend a support on the face surface of the measuring machine. Other versions and dimensions on request

## Mobile measuring unit

# 284751, with grid base plate:  
800x1200, height 930mm,  
grid 100 12/5/M6, Weight: 130 kg

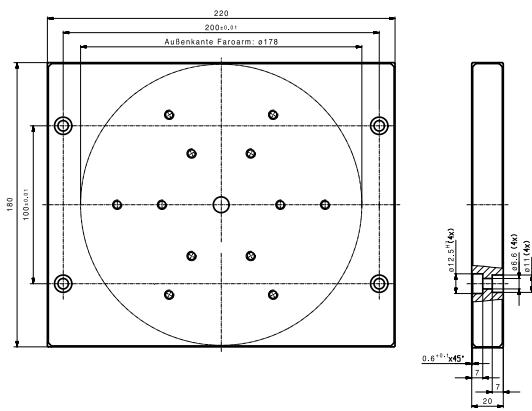

## Mobile measuring unit

Nr. 284452, with height adjustable grid base plate:  
800 x 1200 mm, height 930mm + lift 180mm,  
grid 100, 12,5/M6  
Weight : ca. 140kg

## Mobile measuring unit - double

# 285101, with grid base plate :  
1600x1200, height 930mm,  
grid 100 12/5/M6, Weight: 170 kg

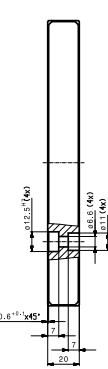

Accessory for above:

## Adapter plate for FARO-Arm

# 91487

Incl. elements for connection to a.m. unit. Further adapter plates for other arms are available on request.

## Vacuum Base

# 282446

This Vacuum Base is designed to be used in conjunction with a mobile measuring arm as a solid and reliably fixed base.

An internal miniature vacuum pump achieves a maximum result for secure clamping within seconds as the clamping plate sucks to the surface.

Warning lights, dial gages and a manometer guarantee safe operation during the measuring process. A variety of grids on the top surface enable mounting of all known mobile measuring arms. The Witte Vacuum Base is fully selfsufficient and needs no supply cables or wires which might hinder operating process.

This gives the operator total flexibility during measuring as long as there is a non porous surface to work from.

The rubber seal is designed to cater for slightly curved rough surfaces.

**Dimensions:** 260 x 80 mm

**Weight:** 3,7 Kgs

**Clamping force:**  
maximal 4200 Newton at sea level

**Battery Charger\***: 100 to 240 volt

**Battery pack\*** power: 12 volt  
Light diodes indicate energy supply:  
**RED** - Battery level low – Charge  
**YELLOW** - Battery level half full  
**GREEN** – Battery level fully charged

Should the battery level drop below the safe operating level then a signal will warn the operator.

End vacuum is adjusted to 200 mbar which equals 80%

(\*): Parts are included in delivery

**ALUFIX CLASSIC** elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Other versions on request

## Milling and modelling table

For creating, positioning, working on clay models.  
Modelling tables are equipped with a mirror enabling visualization of full model using scaled half models.

Milling tables enabling modelling and later machining of mounted models. Models can be positioned repeatably for machining in several steps .

### Dimensions:

Length from 1.000 – 2.500 mm

Width from 800 – 1200 mm

## Modelling table

For preparation and modification of clay models, i.e. inner doors. Models are worked on manually at optimal height and angle and can even be positioned in car line in an inner meisterbock. All linear movements as well as outward movement of castors are hydraulically supported. The base plate is equipped with sleeves so that repeatable exchange of different clay models is possible.

### Technical data:

Length 1.000, width 800 mm

Height (max. when plate vertical) 1.680 mm

Weight including door carrier for clay models 230 kg

Max load capacity (in horizontal end position) 70 kg

## Front interieur model unit

Ergonomic modelling unit comprising four single components

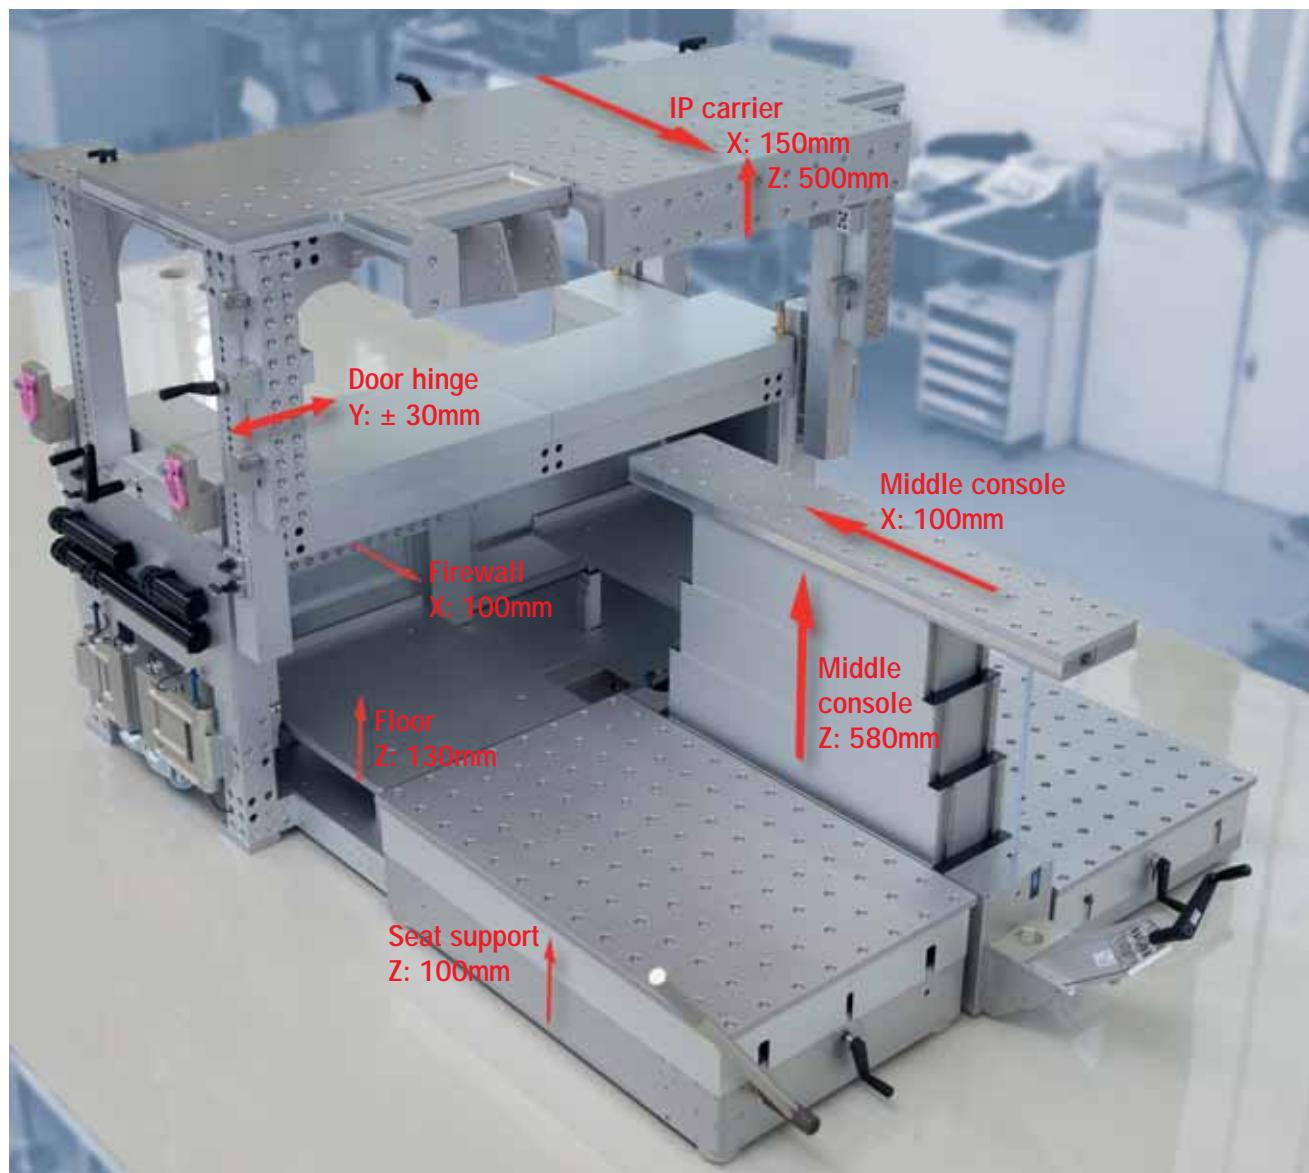

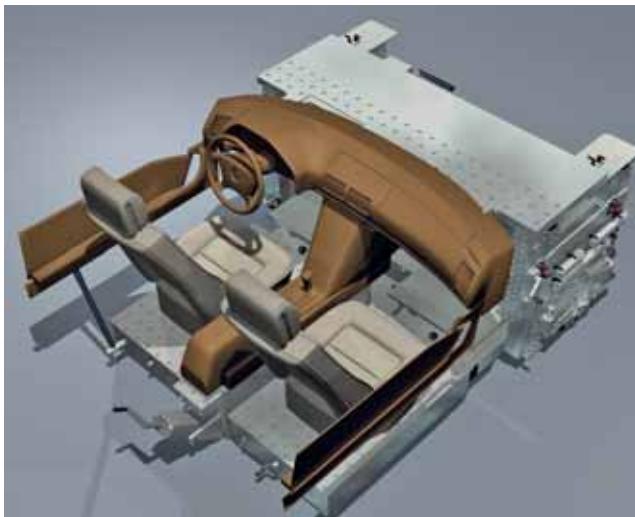

- Instrument panel with steering wheel connection and option to mount inner door models
- 2 dockable seat supports
- Dockable middle tunnel

The I-panel unit has several adjustment possibilities

- Length (X) 150mm
- Height (Z) 500mm
- Pedal supports additional 100mm in X
- Floor 130mm in Z
- Optional door supports +/-30mm in Y

Seat supports are height adjustable by 100mm in Z

The middle tunnel is adjustable in Z by 580mm and in X by 100mm

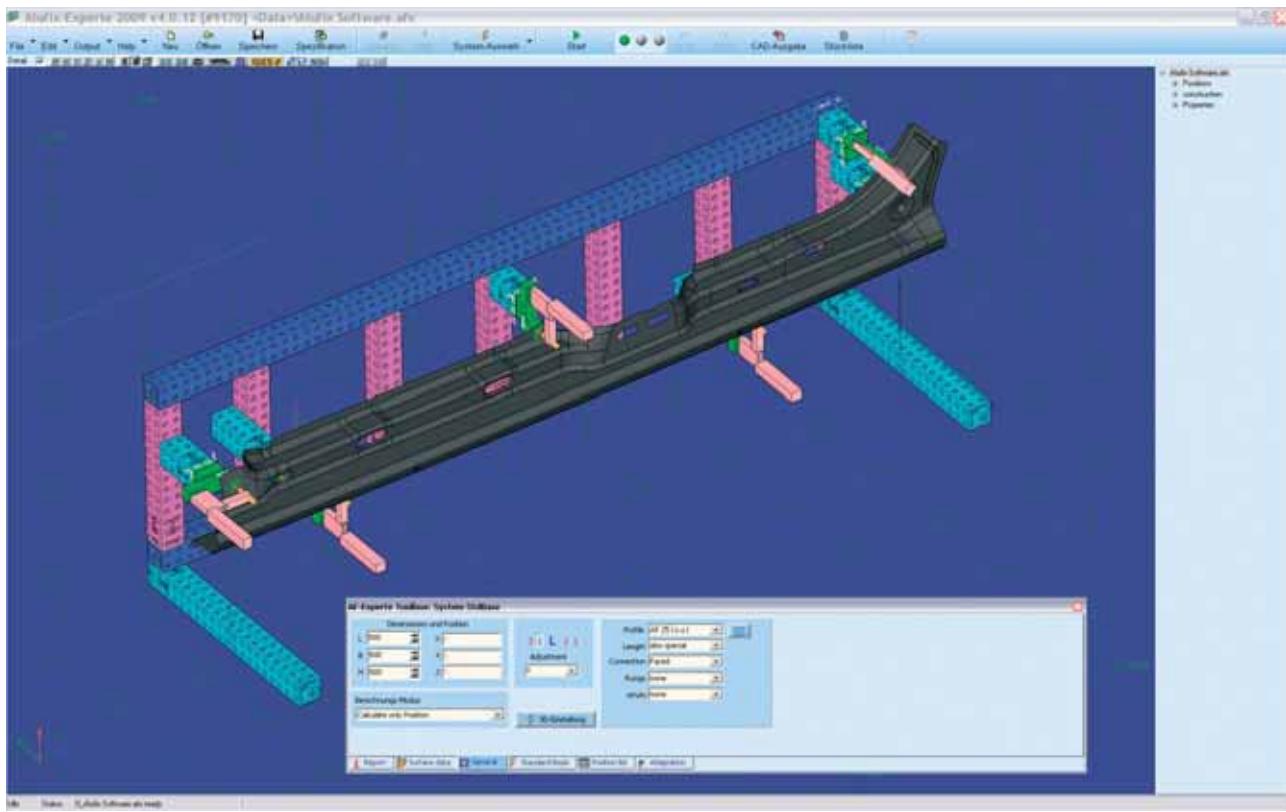

# Alufix Expert 2016

3D Design Software #85344

Alufix Expert software makes automatic designs for fixtures with corresponding partlists. You choose the system and define clamping points. The software calculates on the basis of this information complete solutions and variations of a fixture. Simply select the desired Alufix system, the basic type of build (frame or plate), the grid size and the position and function of clamping points. On the basis of this input the software calculates complete solutions and variations. For checking purposes and measuring off of surface vectors additional part data in all established formats can be im-

ported. Pictures show some variations, which have been calculated by the software. The clearly structured, self-explaining software is easy to learn. Two separate but complementing help functions (Tool tips and Operation Manual) support users at all times. The design data is exported in either IGES, STL or VRML format (i.e. for offline programming of coordinate measuring machines), or can be transferred with a macro and the corresponding parts library in Catia V4/V5, Unigraphics or Autocad.

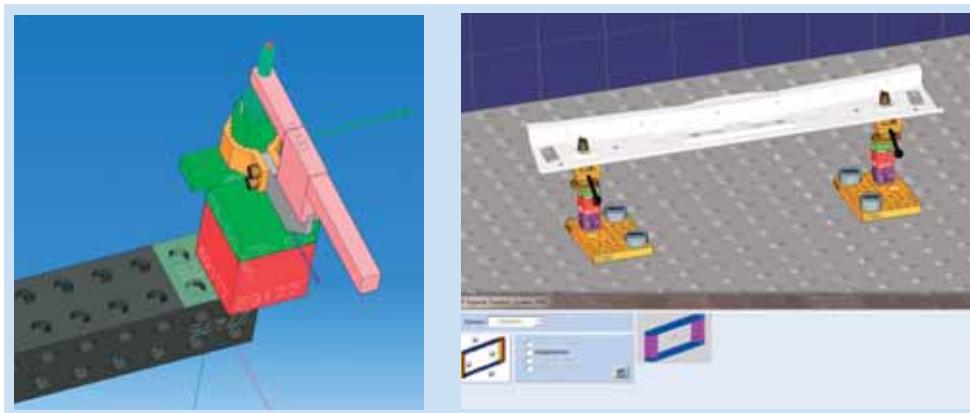

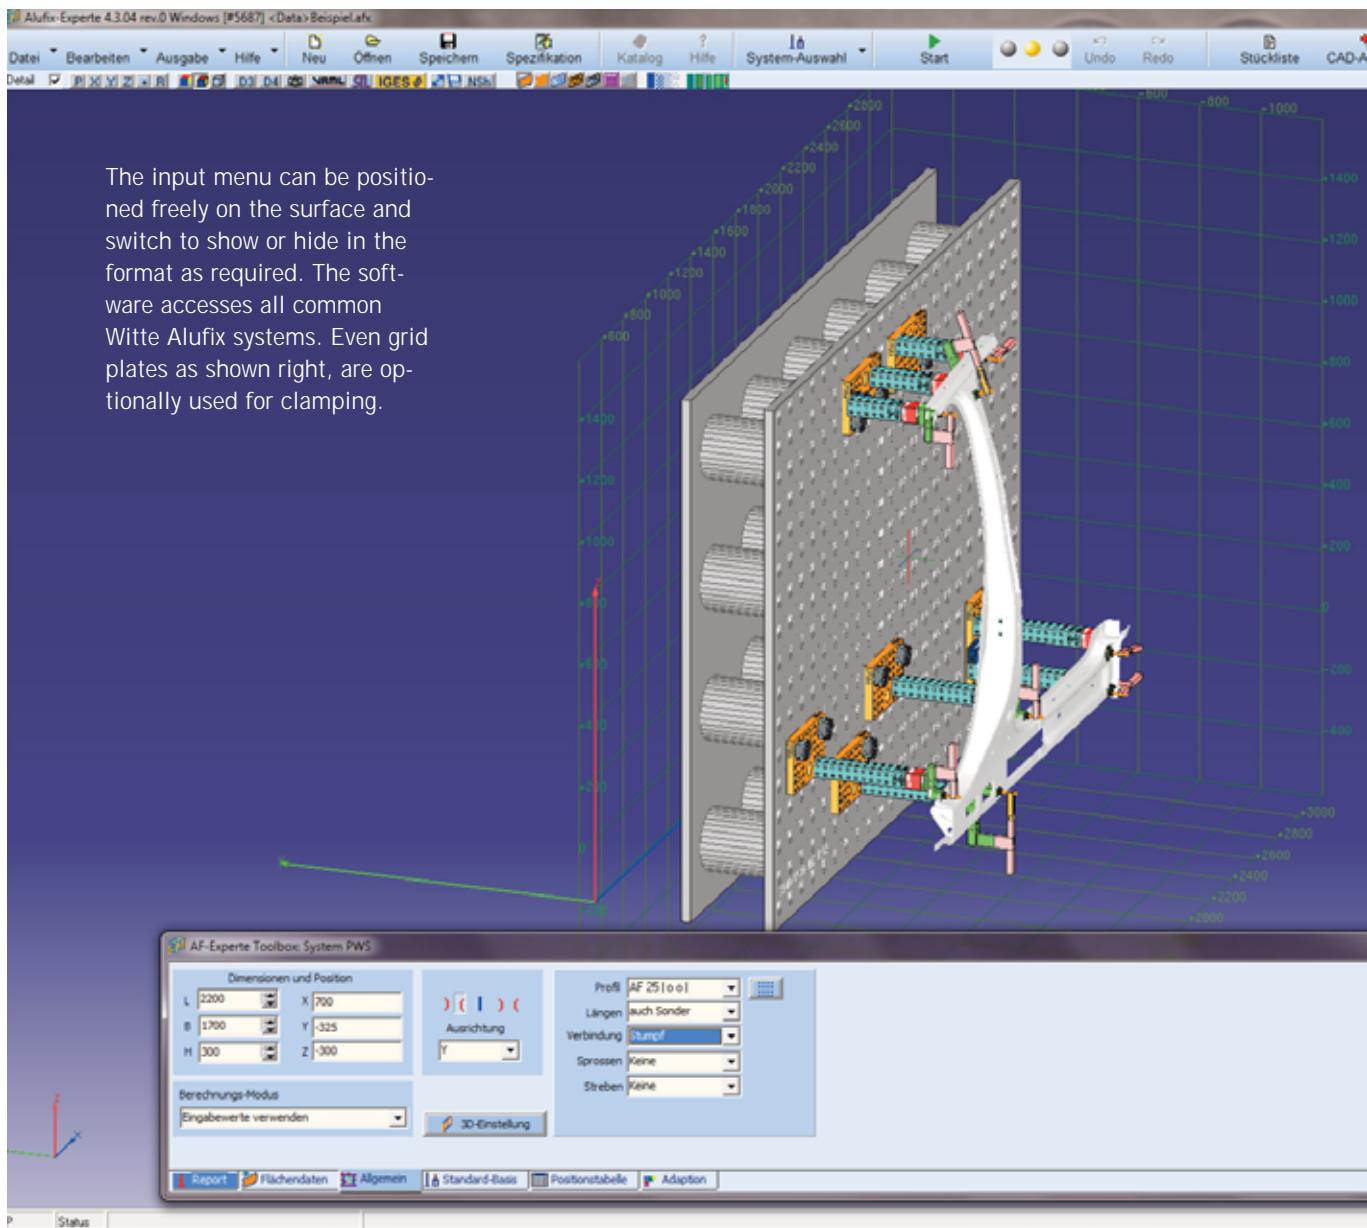

Partslist for C:\Dokumente und Einstellungen\lroebel\Eigene Dateien\...						
Pos	Qty	No.	Description	LF	Dimensions	Weight
1	1	20426	Bar Light	25	50	360

10	1	Sonder	Special	0	Special	151
11	1	Sonder	Special	0	Special	153
12	1	Sonder	Special	0	Special	5

Buttons at the bottom: Print, Save, Editlist, Quick connectors, No connectors, Screw connectors.

The part is positioned in car line using Alufix 25. The software can export parts lists (see left), pictures (JPEG), data (IGES, STL, VRML) or CAD data (Catia, Unigraphics). For direct import of surface data a license is required for the corresponding format.

Individual training is available in house or it can take place on customer's premises under agreement against surcharge

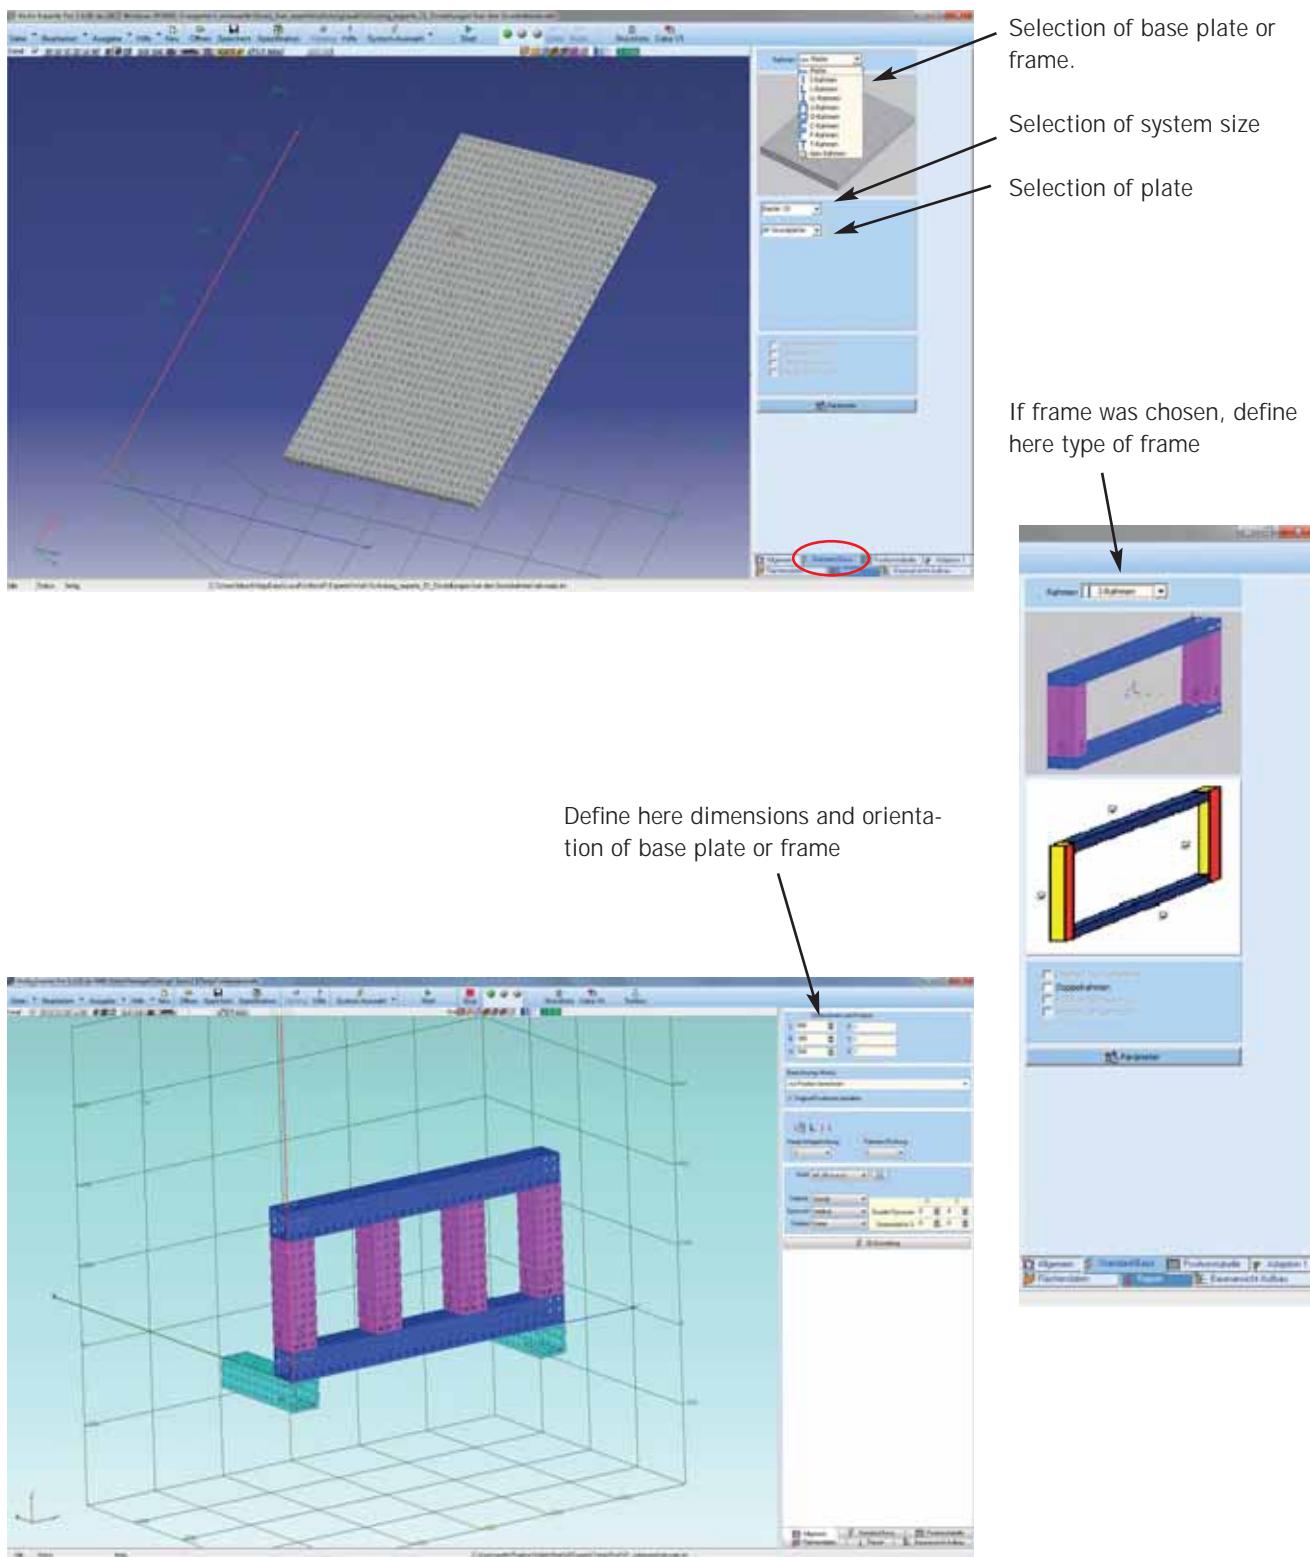

Different colouring shows the user in which modus the software currently is (definition/presentation). The parts marked orange have just been selected for editing, dark components are either already calculated or have been changed in a different programme module (inactive)

#### System requirements EXPERT 2016:

### Example: Measuring contact point and transfer into column

### Complementary modules:

Complementary module: Surface cut  
for contour part

Complementary module: Adapter dimensioning

# FIXMES

## Alufix parts library for CAD systems

Fixmes is an Alufix parts library on a geometric basis for designing and documenting fixtures. Using Alufix standard elements fixtures can be built in a fraction of the time required previously. By designing the fixture on-screen expensive idle-times of the measuring machine are avoided.

### The principle:

at the CAD workplace the user designs a desired fixture for workpiece machining or measuring using Alufix components. To do so he can use all parts available in the Fixmes library.

The selection is made according to one of the following features:

- Item No.
- Name
- Dimension

The parts of the fixture can be displayed as a wire model or solid. For a clearer image and an increase in speed individual planes or elements (holes) can be excluded. A printout of the finished fixture includes a parts list.

### The advantages:

- Shorter design times
- Better prolonged use of measuring machine
- Timely preparation of fixture
- Documentation for later repeat assembly of fixture
- Short term changes can be carried out quickly
- No training necessary,
- CATIA or AutoCAD functions are utilised
- Also for off-line programming

### 83677 Fixmes Library für Catia V5

Elements of Alufix modular fixturing system are stored as \*.catpart and \*.catproduct files.

In addition a CATIA catalogue with parameterized parts is available on request. Elements can be selected according to different criteria such as item number, description or dimensions.

### 92562 Fixmes Library für Unigraphics NX5

Alufix elements stored with attachment \*.prt

### 83676 Fixmes Library for AutoCAD

Alufix elements stored with attachment \*.dwg

### 82157 Fixmes Library IGES Format

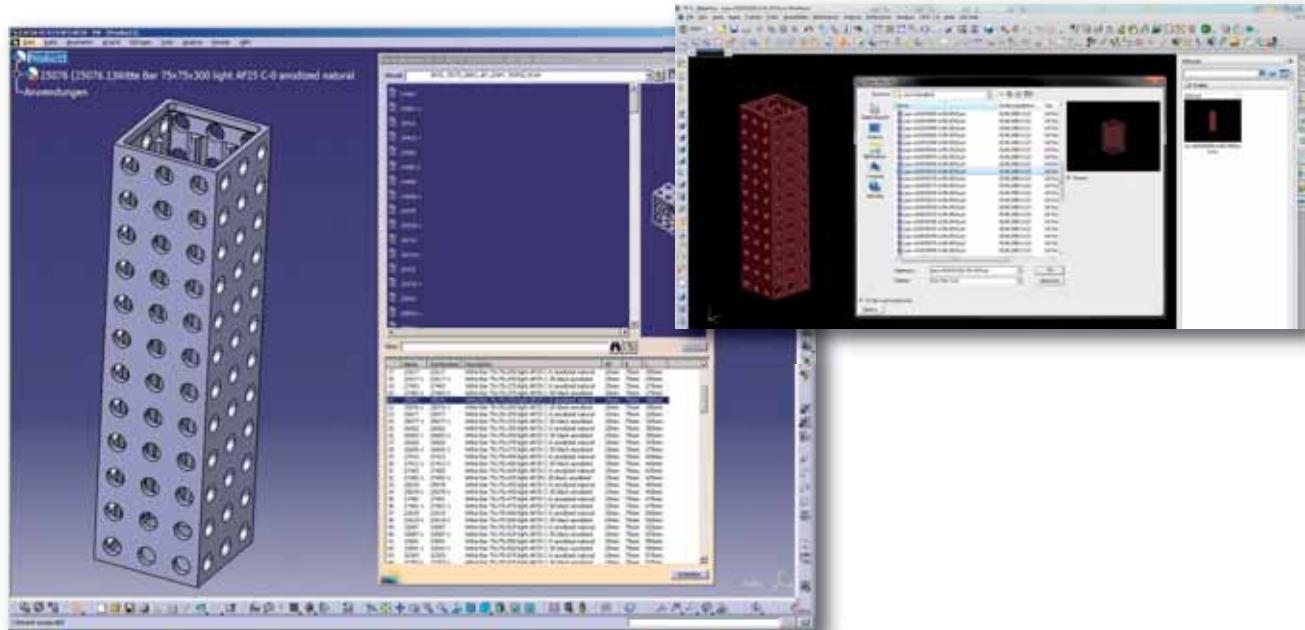

Alufix elements stored with attachment \*.igs

### 82662 Fixmes Library STEP Format

Alufix elements stored with attachment \*.stp.

In addition we also offer a download service from internet under: [www.partserver.de](http://www.partserver.de)

After registration Alufix components can be downloaded free of charge in all native or universal formats under this address.

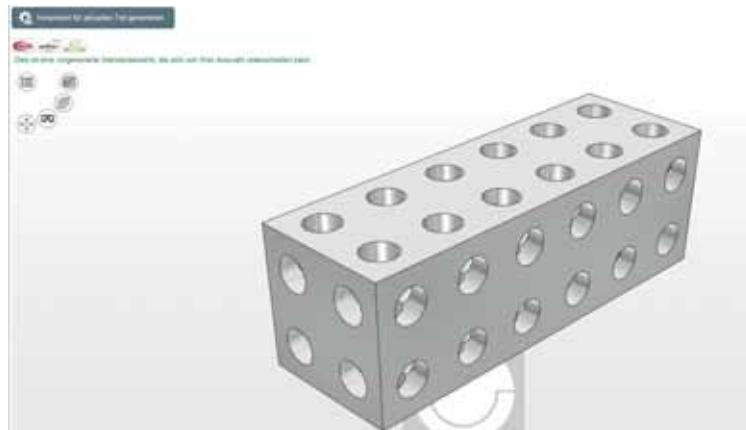

# Modular Fixturing Systems – PDF Catalogue

This catalogue can also be downloaded as PDF or is shown as an E-Book in internet ([www.alufix.de](http://www.alufix.de)).

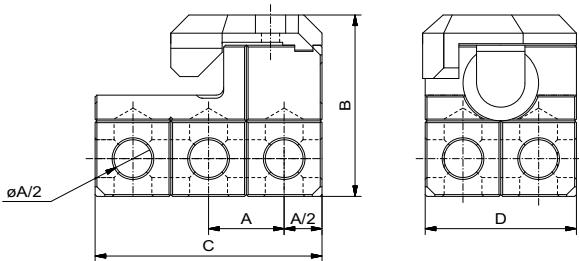

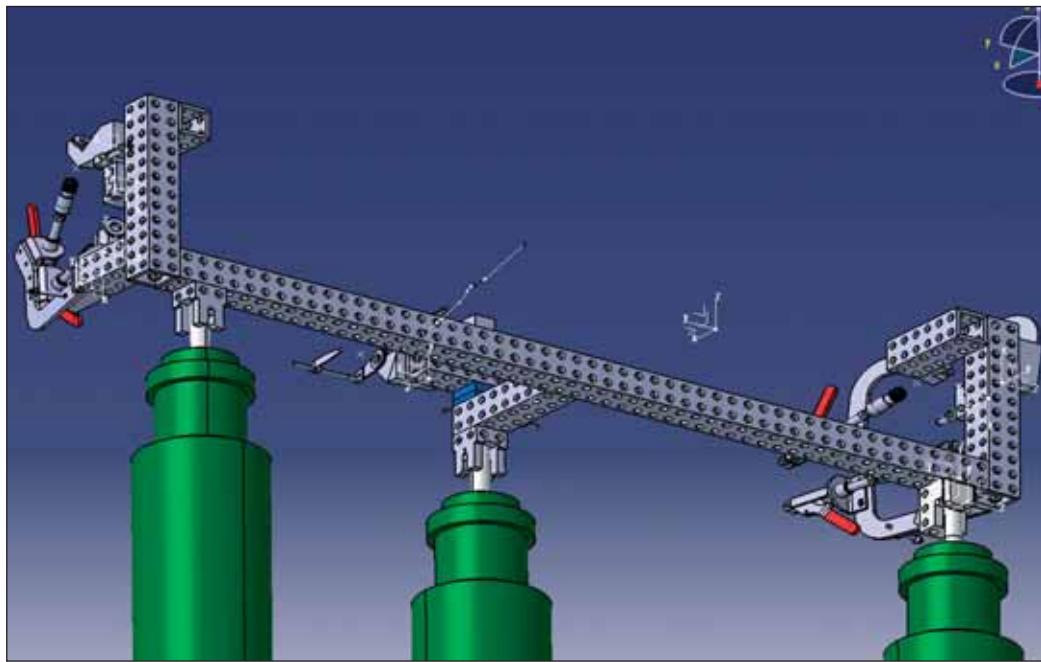

The E-Book offers additional functions:

- Portrayal of items with a 3D viewer, just double click on item number.

- Videos (real or animation) by clicking on blue arrow.

## FIXINSPECT

Fixinspect measuring accessories simplify and considerably speed up tactile and non-contact measuring processes. All Fixinspect accessories are mounted on workpiece features, where dimensional data is required. It is easier and faster to measure the accessories than the features themselves. Defined contact surfaces and high-precision manufacturing of the accessories mean measuring results can be calculated back to the workpiece feature location.

## FIXINSPECT

Measuring accessory  
for tactile measuring

## FIXINSPECT PG

Measuring accessory  
for photogrammetry systems

## FIXINSPECT LT

Measuring accessory  
for Lasertracker

## FIXINSPECT KR

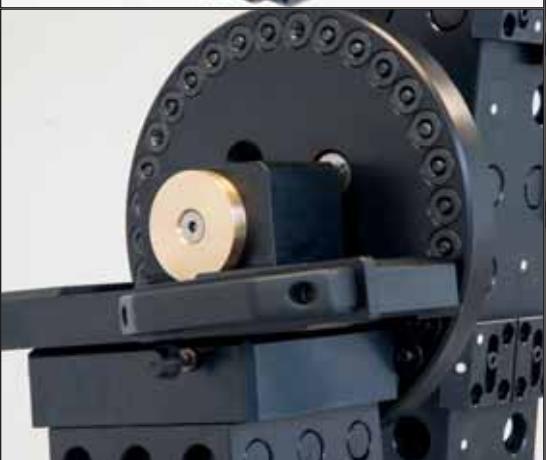

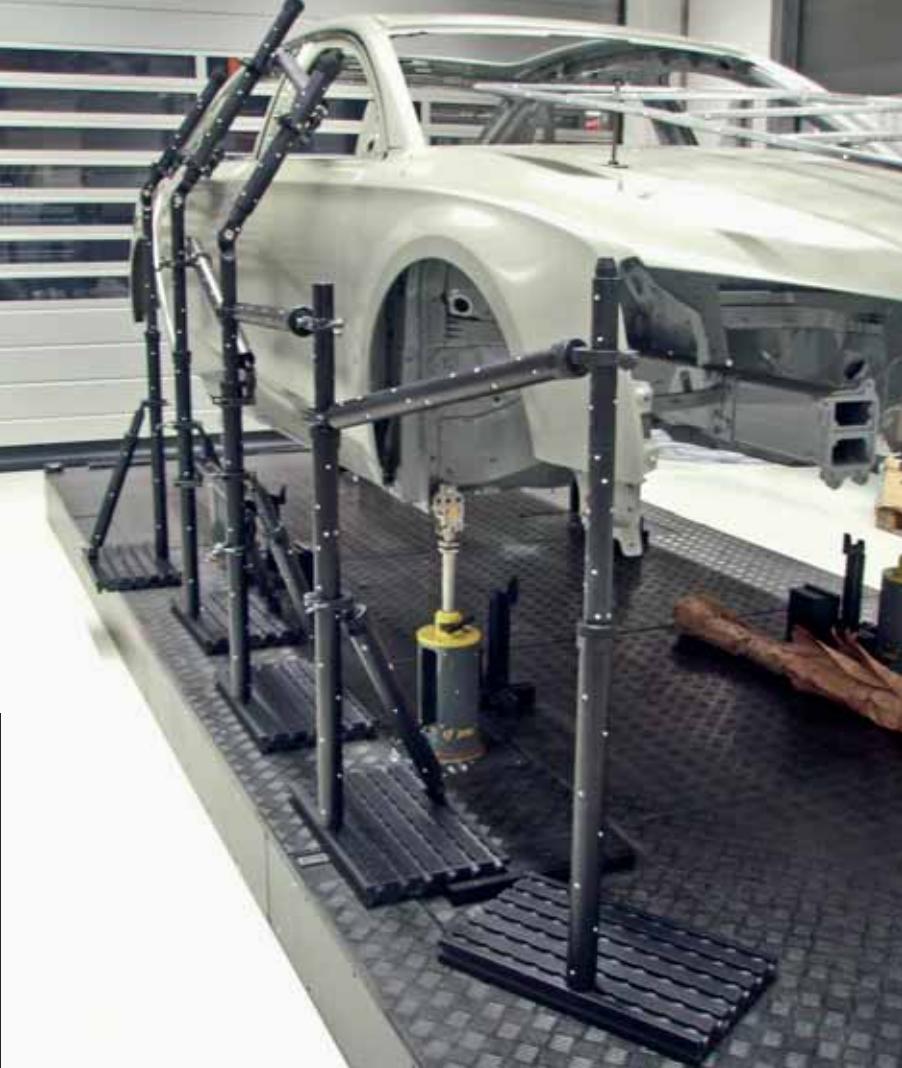

Measuring accessory  
for laser tracker

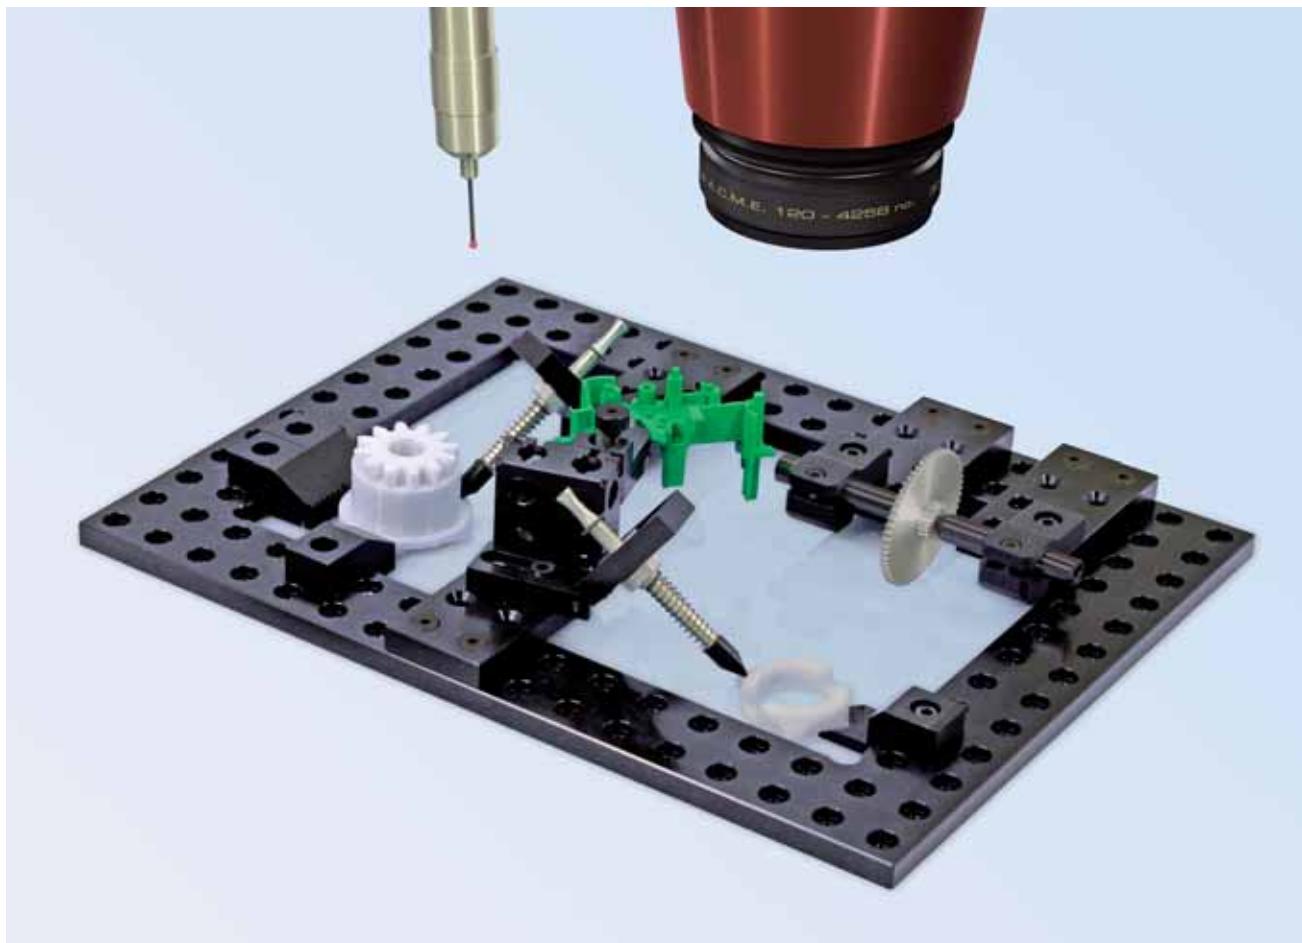

## FIXINSPECT+ ALUFIX

## ALUFIX XS

Fixturing system for small parts

### For improved productivity

Measuring fixtures are prepared away from measuring equipment

### Flexible and economical modular system

Quick and repeatable fixture set up with consistent precision, absolutely compatible to all other ALUFIX systems.

### High precision and quality

CNC-milled elements made of high tensile aluminium or acrylic ensure great accuracy and light weight.

Unlimited setting and adaptation possibilities.  
A multitude of top sections and adapters allow reliable, gentle fixturing of different workpieces.

## MEGALU

Megalu is an extruded profile with medium tensile strength (220N/mm<sup>2</sup>), through holes and is divided by chamfer grooves.

The profile holes are 9,5mm in diameter (for Helicoil inserts M8, direct thread M10 or as access hole for screws M8).

Profiles are available in three versions:

L 64x64, L80x80, □ 80x80.

Megalu connections fulfill high demands on torsion and bending.

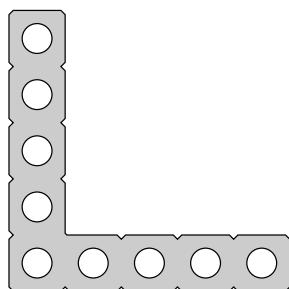

Megalu was designed to be used throughout the whole life of a fixture to ensure stable, repeatable work piece positioning.

Megalu is intended as a dedicated solution so fixture changes are not as easy or convenient as with other systems such as ALUFIX Classic.

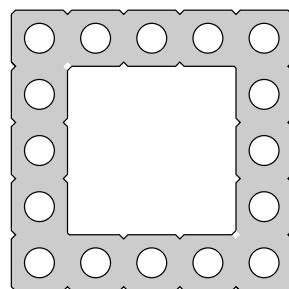

Megalu is a simple yet accurate and economical fixturing system.

This system  
is no longer part of  
our main range:

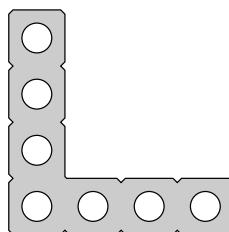

Only  
available on  
request!

Alufix outer meisterbock in combination with simulators for early part alignment,  
the analysis of which lead to improved quality of auto components.

## Meisterbocks, Outline gauges, Cubings

Not only fixtures for single parts or assemblies can be assembled from Alufix profiles and components but all kinds of frames and fixtures up to the size of an original vehicle.

### Meisterbocks

**Outer meisterbocks** are used for mounting outer skin parts or groups of any production step. Structures can be made of different sections or system sizes, to support different derivatives or vehicle families.

**Inner meisterbocks** are made to analyse different interior parts. Part specific machined contours simulate parts or the original body-in-white parts can be mounted.

**Fuegemeisterbocks** (match metal fixtures) are used to position or match sub-groups, sidepanels, front end with each other. Joining of single parts to a complete vehicle is easy with a modular fixturing system. This method of analysis helps early recognition of problem areas, enabling cost and time savings in vehicle development process.

### Outline gauges

Outline gauges help to check parts in relation to neighbouring parts which are represented by outline 3D contours/strike or stripe models. The contours can also be removed from the gauge and added to measuring fixtures using quick change couplings.

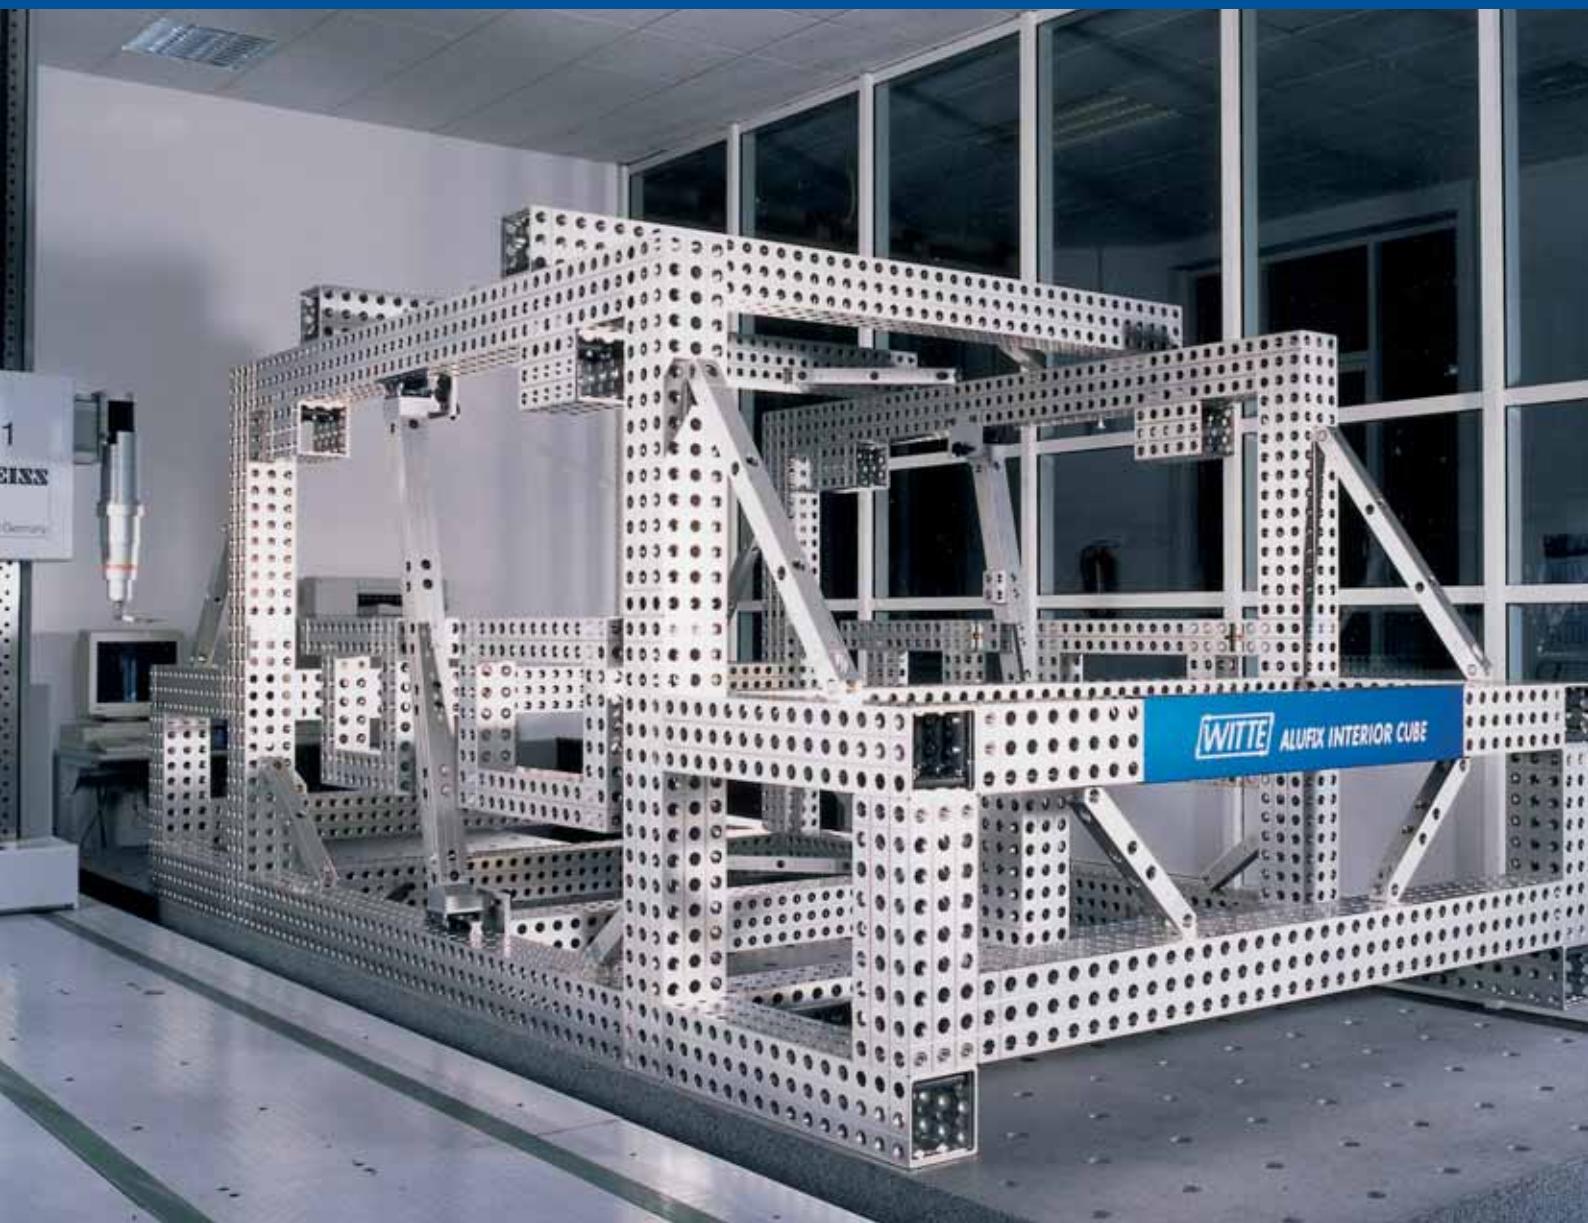

### Cubings

Alufix basic frames are an ideal base for cubing elements because of their rigidity, accuracy and modularity. Cubing base frames for front or rear ends, doors or complete cubings. Because of its reusability and modularity Alufix is pre-destined as a platform for inner cubings, area sections or complete vehicle cubings.

## Outline gauge

for 4 door vehicle mounted on horizontal and vertical sandwich plate combination. B pillar can be rotated out for single door check.

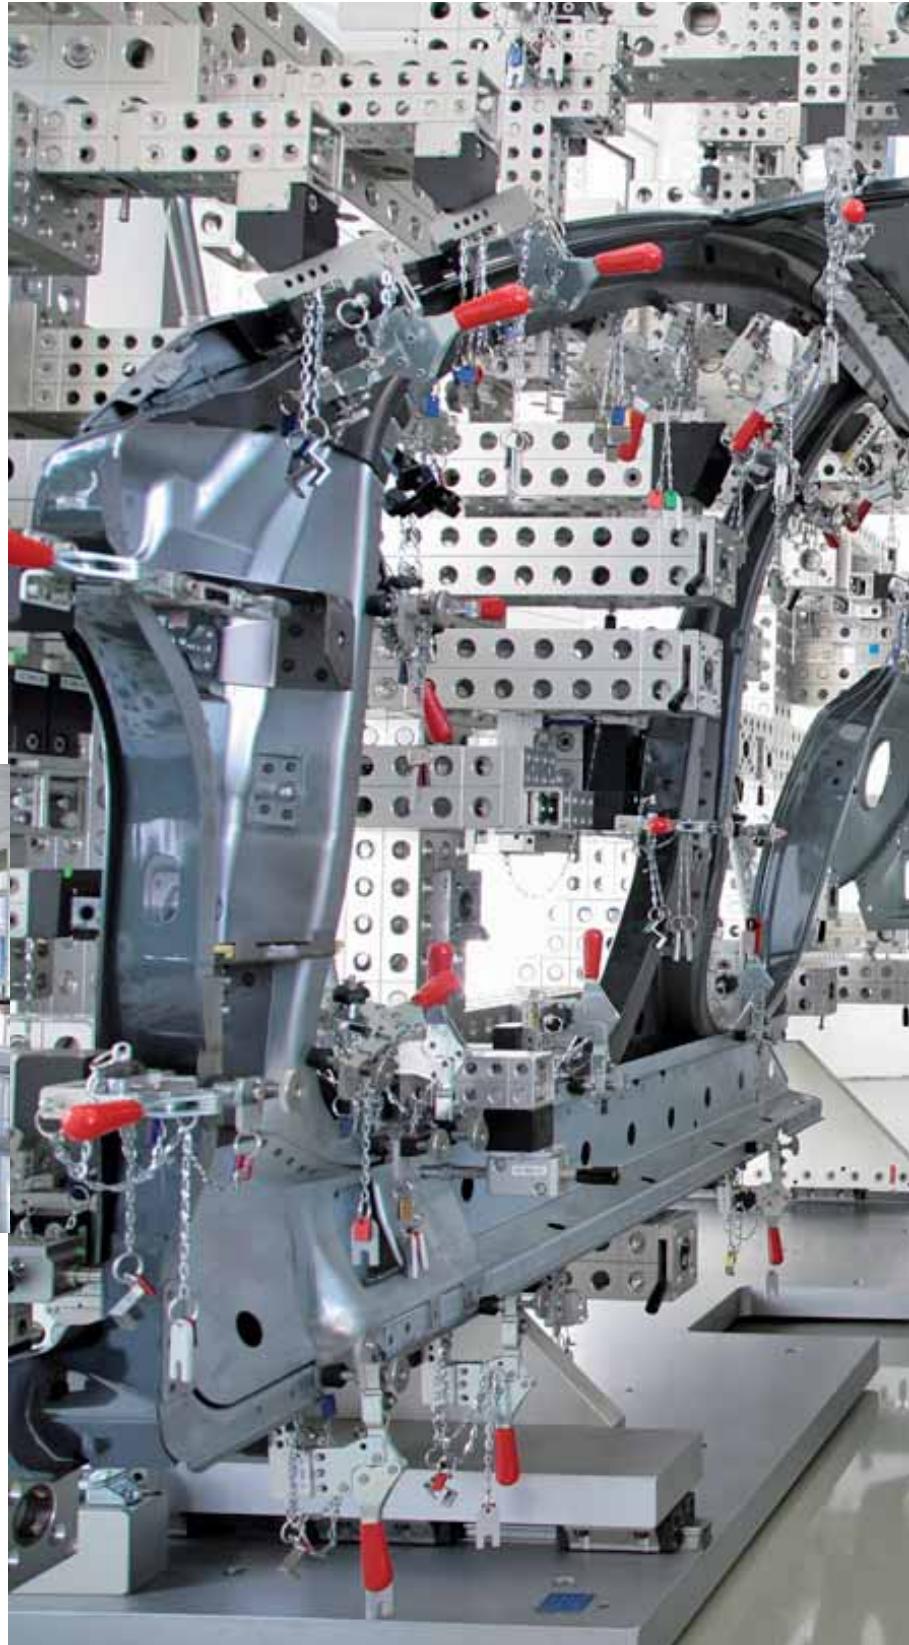

## Inner meisterbock

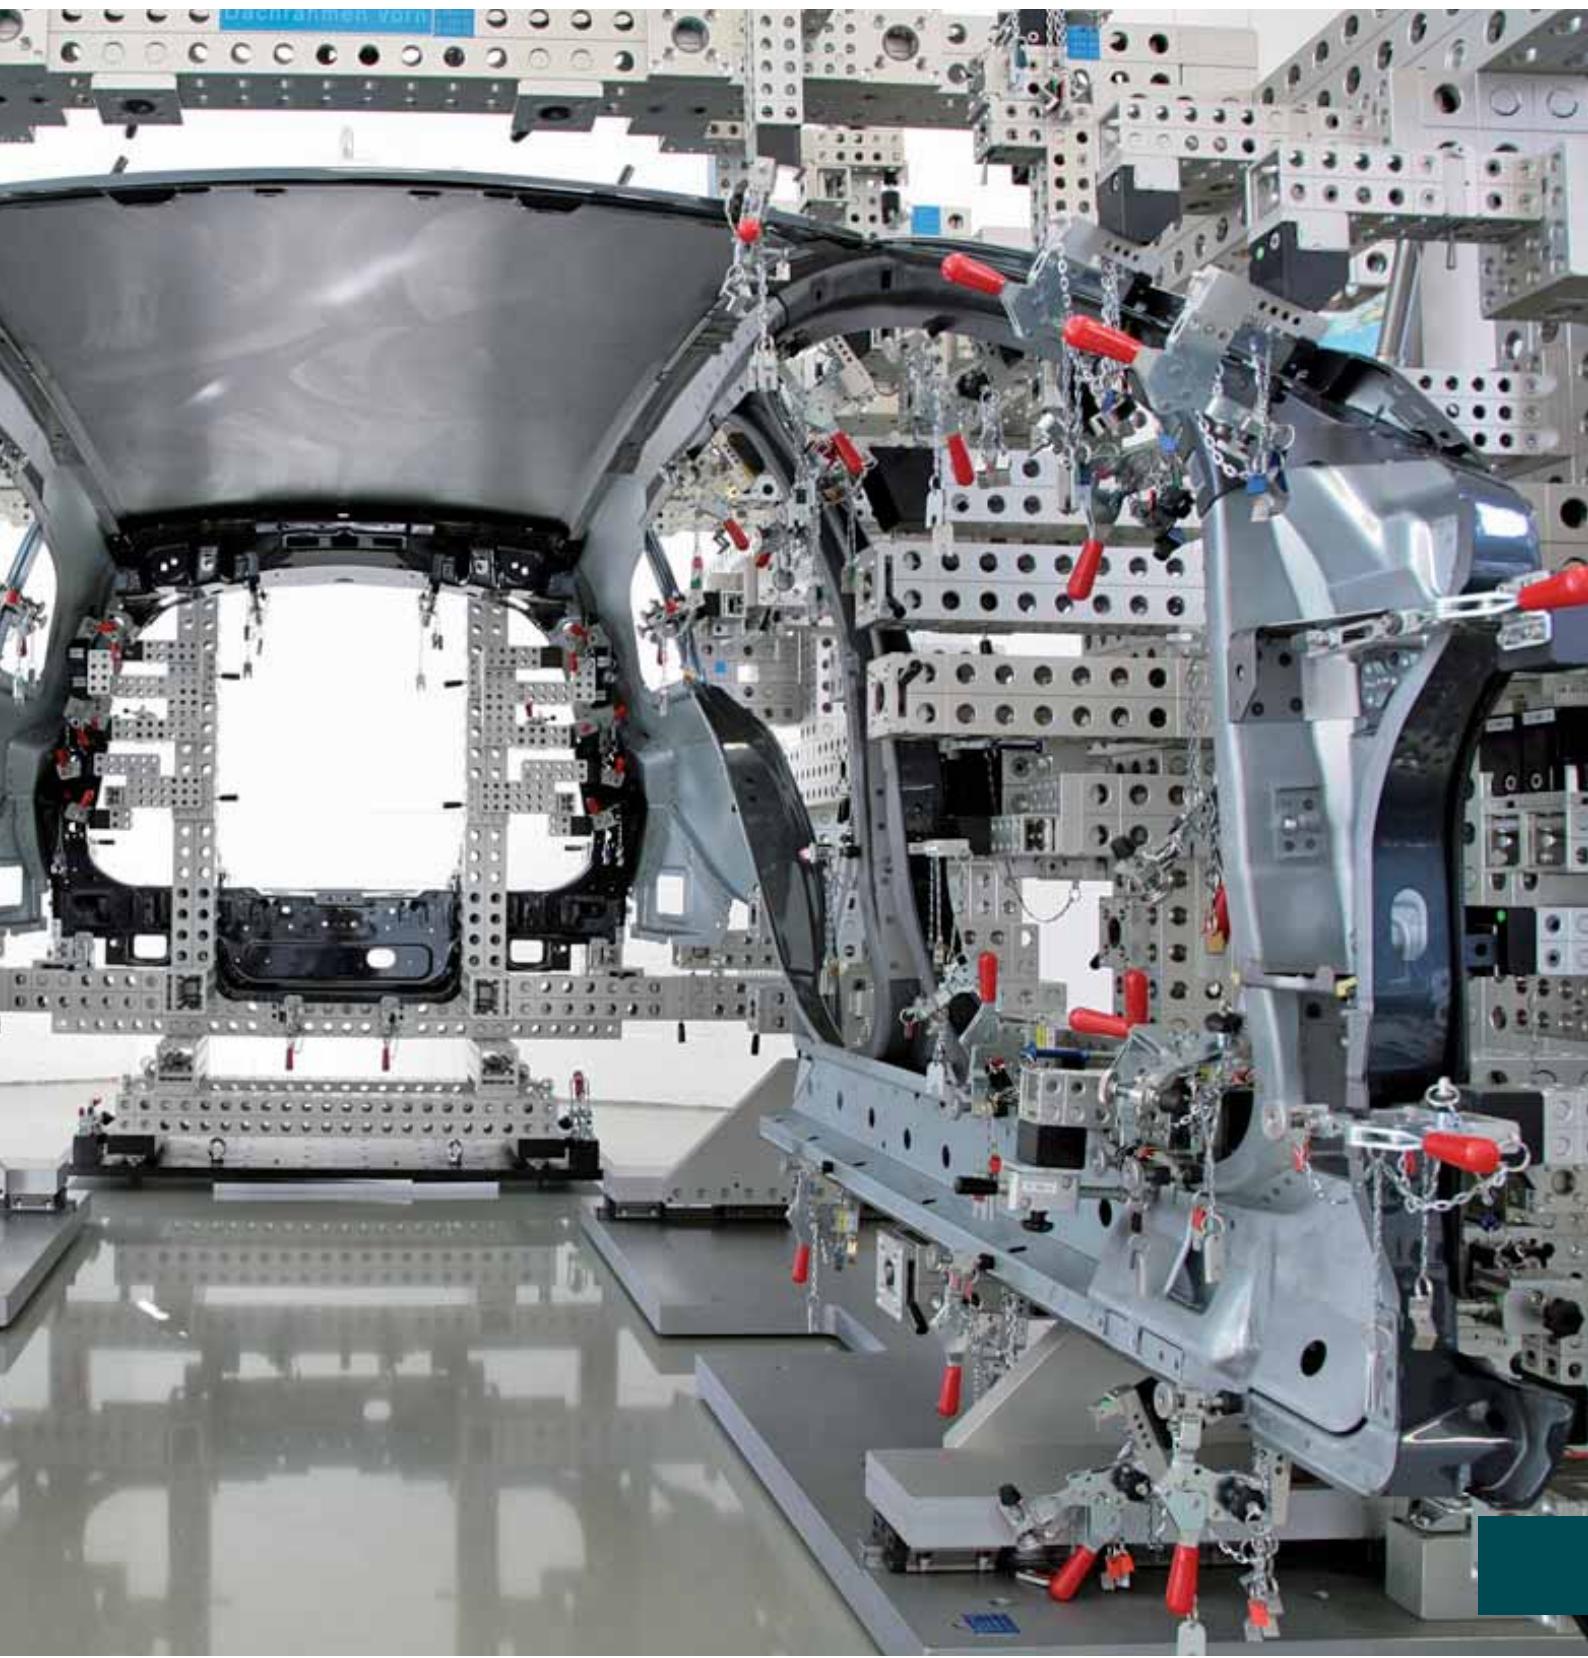

with movable support strut  
for B-pillar enabling use for 2  
and 4 door models.

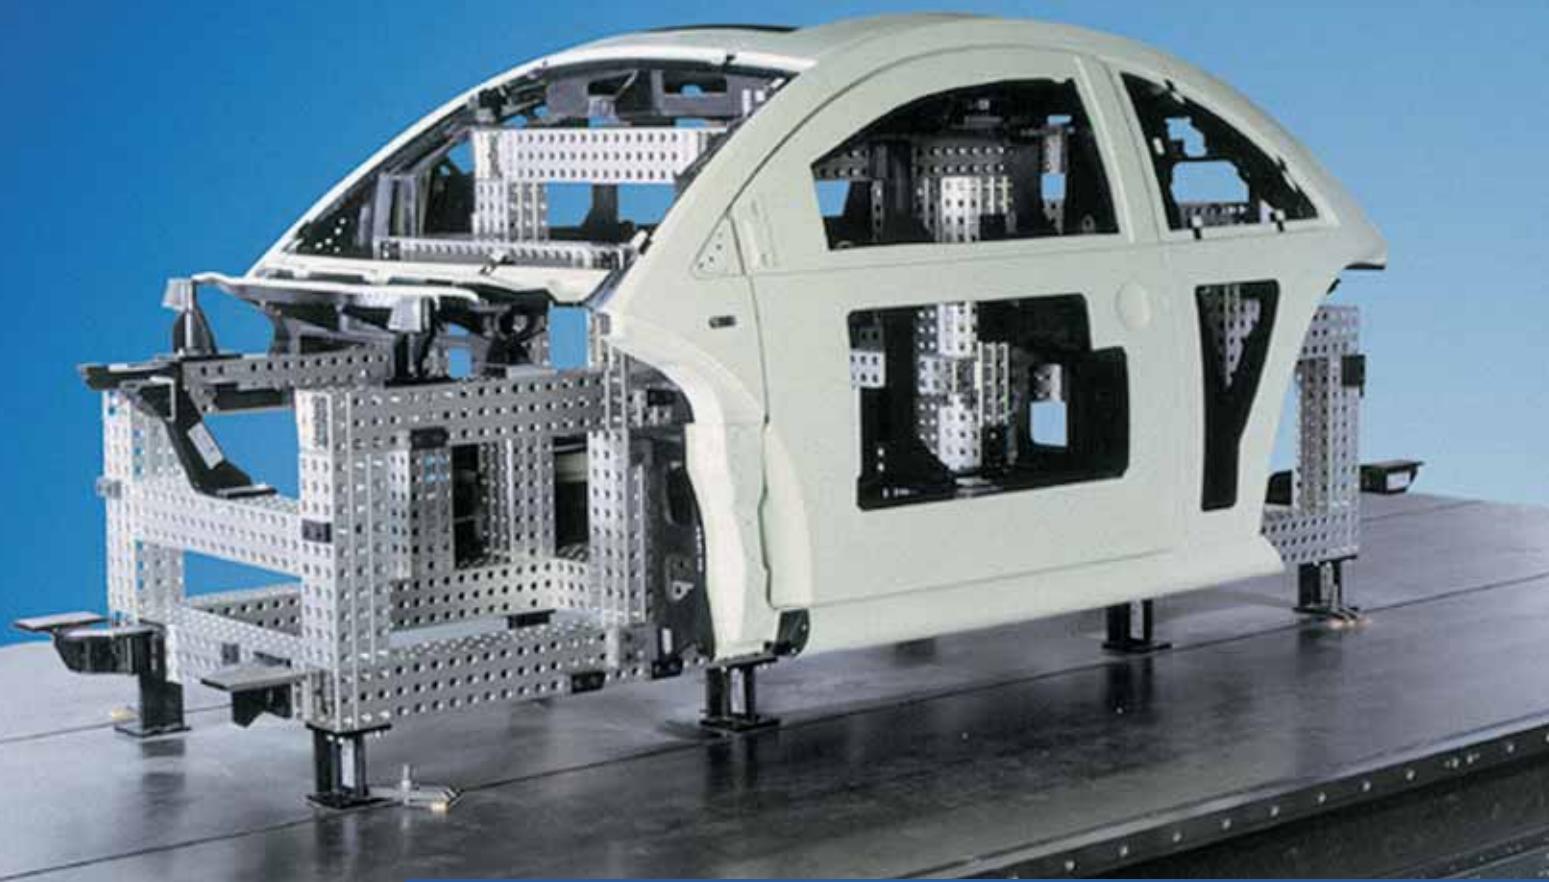

## Fuegemeisterbock (match metal fixture)

For passenger vehicle comprising independent match metal floor, left and right side, rear wall fixtures as well as cross member supports for roof reinforcement. Floor group is joined on floor FMB, sidepanels are joined on separate side FMBs. These three units are then joined and enable mounting of roof reinforcements and roof.

## Information:

Weights mentioned in the catalogue are non-committal and approximate, and can deviate considerably i.e. through technical changes.

- We reserve the right to make technical changes.
- Where differences between photos and parts lists exist, the parts lists are decisive.
- Due to fluctuations of copper content in aluminum - alloy colour deviations may occur during anodizing or other treatment processes.
- All Alufix components are also available anodized black e.g. for use with optical measuring systems.  
Exceptions are standard hard anodized items such as pins, connection elements in steel etc.  
These items maintain their usual characteristics but can be changed on request.

All details on our products in this catalogue, especially illustrations, drawings, dimensions and statements on performance are to be regarded as approximate average values. We reserve the right to change design, technical data, dimensions and weights.

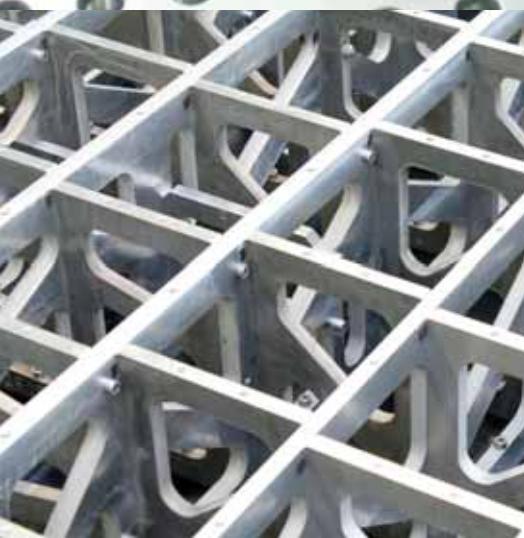

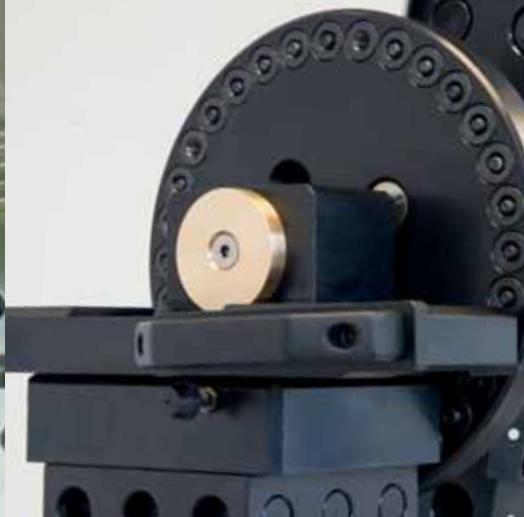

The indicated standards, similar technical regulations as well as technical details, descriptions and illustrations are valid at time of printing. Our general trading conditions are valid. Our quotations are decisive.
